Adsorptive Bubble Separation Techniques Robert

Lemlich,2012-12-02 Adsorptive Bubble Separation Techniques focuses on the mechanisms of the various adsorptive bubble separation methods. This book examines the various adsorptive bubble separation techniques, including ion flotation, foam fractionation, precipitate flotation, mineral flotation, bubble fractionation, and solvent sublation. Organized into 20 chapters, this book starts with an overview of the certain important properties of foam. This text then examines the results of several separations, as well as the results of additional studies into the mechanisms of the different techniques. Other chapters explain the studies of foam separation in the case of synthetic solutions, which provide a good knowledge of the extraction mechanisms of the radioactive cations, cesium, cerium, and strontium. This book discusses as well the experimental and theoretical work on foam separation done in Israel. The final chapter deals with the separation of surfactants and metallic ions at various places around the world. This book is a valuable resource for materials scientists, engineers, and chemists.

The Exile Mark Ames,Matt Taibbi,2000 The eXile is the controversial tabloid founded by Ames and Taibbi that Rolling

Stone has called cruel, caustic, and funny and a must-read. In the tradition of gonzo journalists like Hunter S. Thompson, the authors cover everything from decadent club scenes to the nation's collapsing political and economic systems--no one is spared. Illustrations.

All the Wrong Moves Merline Lovelace,2009-11-03 USAF Lieutenant Samantha Spade and her techies try out the latest gizmos for the military. On a test run with the Ergonomic Exoskeletal Extension (EEEEK), Sam stumbles over two dead

bodies in the desert. With the help of handsome Border Patrol Agent Jeff Mitchell, Sam must unravel a cover-up involving an illegal arms deal.

Menergy Louis Niebur,2022 Menergy tells the story of a post-disco recording industry in San Francisco between the years 1978-1984. For most of America, disco died in 1979. Gay men, however, continued to dance, and in the gay enclave of the Castro neighborhood in San Francisco, enterprising gay DJs, record producers, and musicians started their own small dance music record labels to make up for the lack of new, danceable music. These independent labels' music did more than copy what the larger industry had been doing, however. Instead, the upstart companies built upon the musical experiments their roster of local musicians and producers had been exploring over the last several years, developing a distinctive style of its own. Known as high energy, the music reveled in electronics, fast tempos, disco and DJ culture, and, above all, gay liberation as it had emerged over the previous decade in the Castro neighborhood by so called Castro clones (a gay subculture of exaggerated masculinity with a strong presence in the city's nightlife). The sound, like the new revolutionary ethos, derived its aesthetic from San Francisco's

unique configuration of elements, but immediately this music had a reach far beyond the Bay, with Megatone Records, Moby Dick Records, and other labels achieving worldwide success with San Francisco artists such as Sylvester, Patrick Cowley, Paul Parker, Lisa, Loverde, and Jolo, creating the world's first gay-owned, gay-produced music for a dancing audience--

Digital Performance Steve Dixon, 2015-01-30 The historical roots, key practitioners, and artistic, theoretical, and technological trends in the incorporation of new media into the performing arts. The past decade has seen an extraordinarily intense period of experimentation with computer technology within the performing arts. Digital media has been increasingly incorporated into live theater and dance, and new forms of interactive performance have emerged in participatory installations, on CD-ROM, and on the Web. In Digital Performance, Steve Dixon traces the evolution of these practices, presents detailed accounts of key practitioners and performances, and analyzes the theoretical, artistic, and technological contexts of this form of new media art. Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the deus ex machina of classical Greek drama to Wagner's Gesamtkunstwerk (concept of

the total artwork), and draws parallels between contemporary work and the theories and practices of Constructivism, Dada, Surrealism, Expressionism, Futurism, and multimedia pioneers of the twentieth century. For a theoretical perspective on digital performance, Dixon draws on the work of Philip Auslander, Walter Benjamin, Roland Barthes, Jean Baudrillard, and others. To document and analyze contemporary digital performance practice, Dixon considers changes in the representation of the body, space, and time. He considers virtual bodies, avatars, and digital doubles, as well as performances by artists including Stelarc, Robert Lepage, Merce Cunningham, Laurie Anderson, Blast Theory, and Eduardo Kac. He investigates new media's novel approaches to creating theatrical spectacle, including virtual reality and robot performance work, telematic performances in which remote locations are linked in real time, Webcams, and online drama communities, and considers the extratemporal illusion created by some technological theater works. Finally, he defines categories of interactivity, from navigational to participatory and collaborative. Dixon challenges dominant theoretical approaches to digital performance—including what he calls postmodernism's denial of the new—and offers a series of boldly original arguments in their place.

Catch Her If You Can Merline Lovelace,2011-01-04 Even a robot dog can sniff out trouble... USAF Lieutenant Samantha Spade is in the heat of the west Texas desert testing a dog-like robot for military use, when the device leads her and her team to a pick-up truck. The driver comes at them with a gun-and is shot in self-defense by Sam's friend. And then a gruesome discovery is made: three human heads in a cooler in the back of the truck. Because the dead man was on the FBI's most wanted list, Sam stands to get a hefty reward. Too bad the technology to keep her shady ex-husband from sniffing out cash has yet to be invented. His appearance, along with frightening issues from her boyfriend's past, make it hard to tell just who is responsible for the pipe-wielding thug who attacks her. All Sam knows is that her luck has

taken a doggone turn for the worse...
