Reconstructing Political Economy William K. Tabb,2002-01-22 This volume offers an original perspective on the questions the great economists have asked and looks at their significance for today's world. Written in a provocative and accessible style, it examines how the diverse traditions of political economy have conceptualised economic issues, events and theory. Going beyond the orthodoxies of mainstream economics it shows the relevance of political economy to the debates on the economic meaning of our times. Reconstructing Political Economy is a timely and thought-provoking contribution to a political economy for our time. In this light it offers fresh insights into such issues as modern theories of growth, the historic relations between state and market and the significance of globalisation for modern societies.

Contextualizing Disaster Gregory V. Button,Mark Schuller,2016-09-01 Contextualizing Disaster offers a comparative analysis of six recent highly visible disasters and several slow-burning, hidden, crises that include typhoons, tsunamis, earthquakes, chemical spills, and the unfolding consequences of rising seas and climate change. The book argues that, while disasters are increasingly represented by the media as unique, exceptional, newsworthy events, it is a mistake to think of disasters as isolated or discrete occurrences. Rather, building on insights developed by political ecologists, this book makes a compelling argument for understanding disasters as transnational and global phenomena.

A Comparative History of Literatures in the Iberian Peninsula Fernando Cabo Aseguinolaza,Anxo Abuín Gonzalez,César Domínguez,2010-05-26 A Comparative History of Literatures in the Iberian Peninsula is the second comparative history of a new subseries with a regional focus, published by the Coordinating Committee of the International Comparative Literature Association. As its predecessor for East-Central Europe, this two-volume history distances itself from traditional histories built around periods and movements, and explores, from a comparative viewpoint, a space considered to be a powerful symbol of inter-literary relations. Both the geographical pertinence and its symbolic condition are obviously discussed, when not even contested. Written by an international team of researchers who are specialists in the field, this history is the first attempt at applying a comparative approach to the plurilingual and multicultural literatures in the Iberian Peninsula. The aim of comprehensiveness is abandoned in favor of a diverse and extensive array of key issues for a comparative agenda. A Comparative History of Literatures in the Iberian Peninsula undermines the primacy claimed for national and linguistic boundaries, and provides a geo-cultural account of literary inter-systems which cannot otherwise be explained.

Urban & Suburban Meadows Catherine B. Zimmerman,2010 Urban & Suburban Meadows has been revised with a new forward by Heather Holm, more photos and resources! Urban & Suburban Meadows, Bringing Meadows to Big and Small Spaces is an enticing introduction to meadowscaping. Author and photographer, Catherine Zimmerman, combines her expertise in photography, storytelling, environmental issues, horticulture and organic practices to offer meadowscaping as an alternative to reduce monoculture lawns. Zimmerman crafts a guide that provides step-by-step instructions on organically creating and maintaining beautiful meadow gardens. Four experts in meadow establishment lend their knowledge for site preparation, design, native plants, planting and maintenance. The book provides plant lists and resource sections for nine regions across the United States along with local sources to assist the meadow creator in bringing diversity back to urban and suburban landscapes. Meadows can be big or small, short or tall. However large, the benefits are great. Meadows sequester carbon, retain water, filter pollutants, eliminate the need for fertilizers or pesticides and provide habitat for wildlife. Reduce your carbon footprint. Improve your neighborhood. Enjoy a meadow in your backyard!--Provided by publisher

Poetry in Pieces Michelle Clayton,2011-01-10 Set against the cultural and political backdrop of interwar Europe and the Americas, Poetry in Pieces is the first major study of the Peruvian poet César Vallejo (1892–1938) to appear in English in more than thirty years. Vallejo lived and wrote in two distinct settings—Peru and Paris—which were continually crisscrossed by new developments in aesthetics, politics, and practices of everyday life; his poetry and prose therefore need to be read in connection with modernity in all its forms and spaces. Michelle Clayton combines close readings of Vallejo's writings with cultural, historical, and theoretical analysis, connecting Vallejo—and Latin American poetry—to the broader panorama of international modernism and the avant-garde, and to writers and artists such as Rainer Maria Rilke, James Joyce, Georges Bataille, and Charlie Chaplin. Poetry in Pieces sheds new light on one of the key figures in twentieth-century Latin American literature, while exploring ways of rethinking the parameters of international lyric modernity.

Developmental Mindset Elizabeth Thurbon, 2016-06-09 The Asian financial crisis of 1997–1998 was supposed to be the death knell for the developmental state. The International Monetary Fund supplied emergency funds for shattered economies but demanded that states liberalize financial markets and withdraw from direct involvement in the economy. Financial liberalization was meant to spell the end of strategic industry policy and the state-directed policy lending it involved. Yet, largely unremarked by analysts, South Korea has since seen a striking revival of financial activism. Policy lending by state-owned development banks has returned the state to the core of the financial system. Korean development banks now account for one quarter of all loans and take the lead in providing low-cost finance to local manufacturing firms in strategic industries. Elizabeth Thurbon argues that an ideational analysis can help explain this renewed financial activism. She demonstrates the presence of a developmental mindset on the part of political leaders and policy elites in Korea. This mindset involves shared ways of thinking about the purpose of finance and its relationship to the productive economy. The developmental mindset has a long history in Korea but is subject to the vicissitudes of political and economic circumstances. Thurbon traces the structural, institutional, political, and ideational factors that have strengthened and at times weakened the developmental consensus, culminating in the revival of financial activism in Korea. In doing so, Thurbon offers a novel defense of the developmental state idea and a new framework for investigating the emergence and evolution of developmental states. She also canvasses the implications of the Korean experience for wider debates concerning the future of financial activism in an era of financialization, energy insecurity, and climate change.

Ashen Stars, 2011-09-01 Ashen Stars is the newest full-length, stand-alone GUMSHOE product from RPG legend, Robin D. Laws. They call you lasers. Sometimes you're called scrubbers, regulators, or shiestars. To the lawless denizens of the Bleed, whether they be pirates, gangsters or tyrants, you're known in less flattering terms. According to official Combine terminology, the members of your hard-bitten starship crew are known as Licensed Autonomous Zone Effectuators. You're the seasoned freelancers local leaders call when a situation proves too tough, too baffling, or simply too weird to handle on their own. In the abandoned fringe of inhabited planets known as the Bleed, you're as close to a higher authority as they come. In this gritty space opera game, the PCs are Lasers, freelance troubleshooters and law enforcers operating in a remote sector called the Bleed. They're needed in the wake of a massive retreat by the Combine, the utopian empire that colonized it. Amid the ashes of a devastating war, the lasers solve mysteries, fix thorny problems, and explore strange corners of space all on a contract basis. They balance the immediate rewards of a quick buck against their need to maintain their reputation, so that they can continue to quickly secure lucrative contracts and pay the upkeep on their ship and their cyber- and viroware enhancements. Featuring seven new and highly detailed playable species. Ashen Stars also contains extensive, streamlined rules for space combat, 14 different types of ship, a rogues gallery of NPC threats and hostile species and a short adventure to get you started in the Bleed.

Digital Memory Studies Andrew Hoskins, 2017-09-27 Digital media, networks and archives reimagine and revitalize individual, social and cultural memory but they also ensnare it, bringing it under new forms of control. Understanding these paradoxical conditions of remembering and forgetting through today's technologies needs bold interdisciplinary interventions. Digital Memory Studies seizes this challenge and pioneers an agenda that interrogates concepts, theories and histories of media and memory studies, to map a holistic vision for the study of the digital remaking of memory. Through the lenses of connectivity, archaeology, economy, and archive, contributors illuminate the uses and abuses of the digital past via an array of media and topics, including television, videogames and social media, and memory institutions, network politics and the digital afterlife.

Recreating Asia Frank-Jürgen Richter, Pamela C. M. Mar, 2002-11-07 The World Economic Forum is an international organization committed to improving the state of the world. It provides a framework for the world's leaders to address global issues. This work offers an insight into how Asia is managing its own political change and national governance challenges. It is based on discussions held during the East Asia Economic Summit, which took place in Hong Kong, October 2001. The summit, an annual event of the WEF, brings together around 800 business leaders, heads of state and government ministers, commentators and experts.

Globalization in Practice N. J. Thrift, Adam Tickell, Steve Woolgar, William H. Rupp, 2014 The concept of globalization has become ubiquitous in social science and in the public consciousness and is often invoked as an explanation for a diverse range of changes to economies, societies, politics and cultures - both as a positive liberating force and as a wholly negative one. While our understanding of the politics, economics, and social resonance of the phenomenon has become increasingly sophisticated at the macro-level, this book argues that globalization too often continues to be depicted as a set of extra-terrestrial forces with no real physical manifestation, except as effects. The essays challenge this dominant understanding of 'globalization from above' through explorations of the mundane means by which globalization has been achieved. Instead of a focus on the meta-political economy of global capitalism, the book concentrates on the everyday life of capitalism, the not-so-'little' things that keep the 'large' forces of globalization ticking over. With its eye on the mundane, the book demonstrates that a series of everyday and, consequently, all but invisible formations critically facilitate and create the conditions under which globalization has flourished. The emphasis is on concrete moments in the history of capitalism when these new means of regular reproduction were invented and deployed. Only by understanding these infrastructures can we understand the dynamics of globalization. In short, punchy essays by distinguished researchers from across a range of disciplines, this book provides a new way of understanding globalization, moving away from the standard accounts of global forces, economic flows, and capitalist dynamics, to show how ordinary practices and artefacts are crucial elements and symbols of globalization.

Routledge Handbook of Industry and Development John Weiss, Michael Tribe, 2015-09-16 The Routledge Handbook of Industry and Development is a global overview of industrialisation. Each chapter will provide readers with contemporary insights into this essential aspect of economic development. Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics. But over the last fifty years, the manufacturing sectors of different countries and regions have grown at strikingly different rates. In 1960 developing countries took a very small share of global manufacturing production. Today the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world, particularly in China and the rest of East Asia. On the other hand, countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation. This volume aims to illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies. This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries. Key themes include, the role of manufacturing in growth, the nature of structural change at different stages of development, the role of manufacturing in employment creation, alternative options for trade and industrial policy, the key role of technology and technical change, and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation. Several chapters discuss individual country experiences with examples from India, Mexico, South Africa and Tanzania, as well as an overview of African industrialisation. This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development. Offering inspiration and direction for future research, this landmark volume will be of crucial importance to all development economics scholars and researchers.

Youth Engaging with the World Thomas Tufte, Florencia Enghel, 2009

Community, Solidarity and Multilingualism in a Transnational Social Movement Maria Rosa Garrido Sardà, 2020-09-01 *RUNNER UP FOR 2022 BAAL BOOK PRIZE* Community, solidarity and multilingualism in a transnational social movement presents a critical sociolinguistic ethnography of the Emmaus movement that analyses linguistic and discursive practices in two local communities in order to provide insight into solidarity discourses and transnational communication more broadly. Integrating perspectives from a range of disciplines, the monograph seeks to understand the ways in which social movements are maintained across disparate communities grounded in shared cultural referents and communicative practices but not necessarily a shared language. The book focuses on Emmaus, the solidarity movement that emerged in post-war France which brings formerly marginalised people together with others looking for an alternative lifestyle into live-in communities dedicated to recycling work and social projects. The book first offers a historical overview of the Emmaus movement more generally, moving into an account of its development and spread across national and linguistic borders. The volume draws on data from two Emmaus communities in Barcelona and London to analyse the everyday communicative and discursive practices that appropriate and resignify the shared transnational movement ideas in different socio-political, economic, historical and linguistic contexts. Community, solidarity and multilingualism in a transnational social movement considers the social implications of local practices on the situated (re)production and evolution of transnational social movements more generally and will be of particular interest to students and researchers in sociolinguistics, linguistic anthropology, discourse studies, cultural studies, and sociology.
