Media Power in Central America Rick Rockwell,Noreene Janus,2010-10-01 Media Power in Central America is the first book in a generation to explore the media landscape in Central America. It captures the political and cultural interplay between the media and those in power in Costa Rica, El Salvador, Guatemala, Honduras, Panama, and Nicaragua. Highlighting the subtle strangulation of opposition media voices in the region, the authors show how the years since the guerrilla wars have not yielded the free media systems that some had expected. Country by country, the authors deal with the specific conditions of government-sponsored media repression, economic censorship, corruption, and consumer trends that shape the political landscape. Challenging the notion of the media as a democratizing force, Media Power in Central America shows how the media are used to block democratic reforms in the region and outlines the difficulties of playing watchdog to rulers who use the media as a tool of power.

The Trade and Culture Debate Gilbert Gagne,2016-10-17 As the first exporter of cultural goods and services, the United States has long held that such products should be treated like any other merchandise and be liberalized. On the other hand, for countries such as France and Canada who are concerned about the impact of economic globalization and the digital revolution on their cultural identity, cultural products should be exempted from economic liberalization or subject to a cultural exception. conflicting views and interests between states as to the treatment of cultural products in international economic law lie at the hearth of the trade and culture debate. These differences have led to serious tensions over the liberalization of cultural services within the World

Trade Organization, as well as to a Convention within UNESCO to recognize the economic and cultural character of cultural products and the states’ right to pursue cultural policies. With most states still not keen on liberalizing the cultural sector and the stalemate in the Doha Round, the United States has turned to preferential trade agreements to secure its policy preferences on the treatment of cultural products. Since the beginning of the twenty-first century, the US government has concluded eleven trade agreements grouping sixteen countries and has been involved in three sets of plurilateral negotiations, with major implications for the evolution of the trade and culture debate.
