**Ecology of Arctic Environments** Sarah J. Woodin,Mick Marquiss,1997-08 Once thought of as a pristine environment, it is now all too apparent that the Arctic is a sink for pollutants transported northwards over long distances in the atmosphere and oceans, and is also likely to be subject to major climate change as a result of global warming. Many ecologists are currently seeking to further our understanding of how arctic ecosystems function, and to detect and predict anthropogenic changes which may occur within them. This book, resulting from a British Ecological Society Special Symposium, addresses these issues.

*Ecology of a Subarctic Mire* Mats Sonesson, 1980 15 papers dealing with the structure and processes of a mire ecosystem under extreme environmental conditions. The mire is situated near Abisko, north Sweden, and represents a type of tundra on permafrost characteristic of the subarctic parts of Fennoscandia. Study was part of the International Biological Program, 1964-1974.

Fennoscandian Tundra Ecosystems Frans Emil Wielgolaski,P. Kallio,T. Rosswall,2012-12-06 The term Fennoscandia is used to denote Finland and the Scandinavian peninsula, which comprises Norway and Sweden and sometimes also neigh bouring districts of the USSR. The western part of the Scandinavian peninsula is mountainous with peaks mostly within the range 1000-2000 m above sea level. Permafrost is not usually found in the southern districts of these alpine zones, but occurs in the northeastern part of Fennoscandia in mire, even at a low elevation. If tundra is defined as areas of permafrost, only very limited regions of Fennoscandia could be included. However, in the present volumes, we have used the word tundra in a broader sense as approximating areas with mean annual air 0 temperature below 0 C at meteorological standard height (1.5-2 m); it is often used in this sense in North America. This usage allows all alpine zones to be included, along with the subalpine birch zone and certain open subarctic woodland (forest tundra in Russian usage).
