**Casino Gambling** Dennis R. Harrison,2000 A professional gambler offers his secrets for winning at all major casino games, with tips on betting strategies, successful money management, and self-control under pressure. 64 illustrations.

**Slots** David V. Forrest,2012-01-03 A renowned psychiatrist explores the world of slot machine gambling and the almost religious devotion that has turned it into a billion-dollar industry. This astonishing book reveals that there's a lot more to playing slot machines—one of America's fastest growing forms of entertainment—than good fun, deep relaxation and the dream of a multi-million-dollar jackpot. Slots tells how the machines work, how the random numbers that govern them are generated, and how the casinos make their profit . . . slowly but surely . . . as they keep only a dime of every dollar invested. It also offers strategies of slot play, and suggests alternate activities to distract us when casinos become harmfully habitual. But ultimately, as Dr. Forrest writes, to spend one's time feeding money to the machines is to participate in, well . . . a form of prayer. And the gaming industry seems very much aware of it, as players annually plunge more than \$365-billion into slots (of which casinos keep about \$30-billion); and as casinos—70 to 85 percent of whose profits are earned by slot machines—have spread to more than a dozen states and even into a number of racetracks (where they're called "racinos"). What this book describes with both humor and a sense of awe is the way slots emporia have steadily been transformed from underground grottos to soaring cathedral-like structures where congregants sit and commune—all to the end of worshipping the god of chance.

**Your Happiness Was Hacked** Vivek Wadhwa,Alex Salkever,2018-06-26 Wadhwa and Salkever have written a great book to help us understand our addiction to technology and suggest what we can do about it." —Andrés Oppenheimer, columnist for the Miami Herald, joint winner of the 1987 Pulitzer Prize Technology: your master, or your friend? Do you feel ruled by your smartphone and enslaved by your email or social-network activities? Digital technology is making us miserable, say bestselling authors and former tech executives Vivek Wadhwa and Alex Salkever. We've become a tribe of tech addicts—and it's not entirely our fault. Taking advantage of vulnerabilities in human brain function, tech companies entice us to overdose on technology interaction. This damages our lives, work, families, and friendships. Swipe-driven dating apps train us to evaluate people like products, diminishing our relationships. At work, we email on average seventy-seven times a day, ruining our concentration. At home, light from our screens is contributing to epidemic sleep deprivation. But we can reclaim our lives without dismissing technology. The authors explain how to avoid getting hooked on tech and how to define and control the roles that tech is playing and could play in our lives. And they provide a guide to technological and personal tools for regaining control. This readable book turns personal observation into a handy action guide to adapting to our new reality of omnipresent technology. "Technology is a great servant but a terrible master. This is the most important book ever written about one of the most significant aspects of our lives—the consequences of our addiction to online technology and how we can liberate ourselves and our children from it." —Dean Ornish, New York Times-bestselling author of Undo It
