Mobile Influence Chuck Martin, 2013-06-11 The explosion of mobile access across the globe has shaken the foundations of the traditional sales funnel, and businesses are scrambling to adapt and find new ways to tap into the market. For all their effort, many have failed to realize that the issue is not how to reach the customer where they are, but where they are going and their mindset at the moment. With the staggering growth in the use of mobile technology as both product research and purchase point, businesses have yet to fully understand the important role mobile devices play in the basic structure of the traditional shopping model and the new importance on linking behavior with location. With the death of the traditional sales funnel comes author Chuck Martin's new model, the Mobile Shopping Life Cycle. Based on the author's in-depth research, Martin has identified the six specific moments in the timeline of the sale which marketers must target effectively in order to reach the mobile buyer. From location-based marketing to mobile payment systems, Martin's model gives marketers access to the tools necessary to build a new sales framework that properly addresses the future of the market.

Natural Selection Elizabeth MacDougall, 2014-08-25 Nate Stevens is a fairly normal guy...at least on the outside. He lives for his job, working as a medic, caring for patients on board his ambulance. Nate has one good friend, Donny, a cop. He also has a few demons which have haunted him since he was a kid. Hold on tight for a scary ass ride through the gritty streets of Toronto. This one hot call changes the lives of two long time friends, forever. What happens in the aftermath would rock even the most secure of friendships but Nate and Donny's bond survives. In fact, things seem pretty sweet...that is until one of Toronto's most notorious crime figures, the Mutt, locks on to Stevens and orders a kill. While one friend searches frantically to catch the rats inside Toronto Police Services, the other is being hunted in the wilds of Algonquin Park. Do the strongest always survive? Or will Darwin's postulate of Natural Selection hold true?

on efficiency, renewables, electrification, and possibly complementary technologies like nuclear energy and carbon capture and storage, it will be all but impossible to avoid the worst impacts of climate change. In this book, Daniel Fiorino provides a comprehensive introduction to the politics and policies of a clean energy transition and how it may unfold nationally and globally. Across its nine chapters, he explores the current energy landscape and the different pathways and pitfalls on the road to decarbonization. All scenarios for decarbonizing, he argues, rely on aggressive efficiency, the rapid scale-up of renewables, and the electrification of most of what is left. Yet this transition has to be accelerated and done effectively. There is little time left for second chances if we are to decarbonize later this century. The Clean Energy Transition will be an indispensable resource for students of energy politics, environmental studies, and public policy, as well as anyone interested in the energy issues of the day.

Encyclopedia of Scientific Principles, Laws, and Theories [2 volumes] Robert E.

Krebs, 2008-06-30 What is a scientific theory? How is it different from a law or a principle? And what practical use is it? Science students, especially those new to studying the sciences, ask these questions everyday about these essential parts of a science education. To support these students, the Encyclopedia of Scientific Principles, Laws, and Principles is designed to be an easy-to-understand, accessible, and accurate description of the most famous scientific concepts, principles, laws, and theories that are known in the areas of astronomy, biology, chemistry, geology, mathematics, medicine, meteorology, and physics. The encyclopedia contributes to the scientific literacy of students and the general public by providing them with a comprehensive, but not overwhelming source of those scientific concepts, principles, laws and theories that impact every facet of their daily lives. The Encyclopedia of Scientific Principles, Laws, and Theories includes several hundred entries. For ease of use, entries are arranged alphabetically by the names of the men or women who are best-known for their discovery or development or after whom the particular scientific law or theory is named. Entries include a short biography of the main discoverers, as well as any information that was of particular relevance in the evolution of the scientific topic. The encyclopedia includes sidebars and examples of the usefulness of the theories, principles, and laws in everyday life, demonstrating that understanding these concepts have practical use. Each entry also includes resources for further research, and the encyclopedia includes a general bibliography of particularly useful primary and secondary source materials.

The United States, 1865-1920 Adam Burns, 2020-04-27 The United States, 1865-1920: Reuniting a Nation explores how the U.S. attempted to heal Civil War-era divisions, as well as maintain and strengthen its unity as new rifts developed in the conflict's aftermath. Taking a broadly thematic approach to the period, Adam Burns examines the development of the United States from political, social, and foreign relations perspectives. Concise and accessible, the volume uses a variety of primary source documents to help stimulate discussion and encourage the use of historical evidence as support for different interpretations of the era. By exploring controversies over issues such as citizenship, ethnicity, regionalism, and economic disparity, all of which resonate strongly in the nation's political discourse today, the book will be an important staple for undergraduate students of American History and the period that followed the Civil War, as well as general enthusiasts.

Nick and Tesla's Super-Cyborg Gadget Glove Bob Pflugfelder, Steve

Hockensmith, 2014-10-07 Einstein is running amok! Darwin is losing his head! The science museum in Half Moon Bay is in big trouble because its robotic replicas of history's greatest scientists keep going kablooey! As 11-year-old amateur inventors Nick and Tesla Holt try to uncover the cause, they'll need to keep adding all-new gadgets to their latest creation, a customized super-cyborg glove. Follow the action, and then follow the illustrated instructions to build your own gadget glove with four incredible functions: LED signal light, emergency alarm, sound recorder, and UV secret-message revealer!

Messi@ Andrei Codrescu, 2015-07-21 At the end of the millennium, as Armageddon looms, two young women from opposite sides of the world unite as humanity's last hope for salvation In New

Orleans, private investigator Felicity LeJeune has made it her mission to bring down the corrupt televangelist Reverend Mullin, leader of the United Ministries, who filched two million dollars in lottery winnings from Felicity's unassuming grandmother. Meanwhile, Mullin's flock of religious fundamentalists bombards the media with threats of catastrophic horror if people refuse to accept him as their savior. Across the globe, the mysterious Sarajevan orphan Andrea Isbik escapes a Serbian POW camp and finds asylum in Jerusalem, where she seduces cavalcades of religious scholars before finally landing in the Big Easy herself. There, amid the reverie of Mardi Gras, something dark is building. Surrounded by a wild cast of characters, Andrea and Felicity join forces to combat the impending apocalypse, fending off millennial fervor and Mullin's fanatical followers as the world's religions converge on New Orleans for the end of days. This riveting novel links our most ancient imaginings of Armageddon with our contemporary worship of technology.

The Fashion Committee Susan Juby, 2017-05-23 The Fashion Committee is another winner by one of my all time favorite authors.--Meg Cabot, New York Times bestselling author of the The Princess Diaries and Mediator series Charlie Dean is a style-obsessed girl who eats, sleeps, and breathes fashion. John Thomas-Smith is a boy who forges metal sculptures in his garage and couldn't care less about clothes. Both are gunning for a scholarship to the private art high school that could make all their dreams come true. Whoever wins the fashion competition will win the scholarship—and only one can win. Told in the alternating voices of Charlie's and John's journals, this hilarious and poignant YA novel perfectly captures what it's like to have an artistic drive so fierce that nothing—not your dad's girlfriend's drug-addicted ex-boyfriend, a soul-crushing job at Salad Stop, or being charged with a teensy bit of kidnapping—can stand in your way. With black and white art custom-created by fashion and beauty illustrator Soleil Ignacio, the book is a collector's item, perfect for anyone with a passion for fashion.

Loving Little Egypt Thomas McMahon, 2010-08-15 In the early 1920s, nearly blind physics prodigy Mourly Vold finds out how to tap into the nation's long distance telephone lines. With the help of Alexander Graham Bell, Vold tries to warn the phone companies that would-be saboteurs could do the same thing, but they ignore him. Unfortunately, his taps do catch the notice of William Randolph Hearst, who hires Thomas Edison to get to the bottom of them—and the chase is on!
