Cell Migration in Inflammation and Immunity Daniele D'Ambrosio, Francesco Sinigaglia, 2008-02-02 Chemokines and their receptors play a central role in the pathogenesis of numerous, perhaps all, acute and chronic inflammatory diseases. About 50 distinct chemokines produced by a variety cell types and tissues either constitutively or in response to inflammatory stimuli are involved in a plethora of biological processes. These small secreted proteins exert their exquisitely variegated functions upon binding to a family of seven-transmembrane spanning G-protein coupled receptors (GPCRs) composed of almost 20 distinct entities. The biological activities of chemokines range from the control of leukocyte trafficking in basal and inflammatory conditions to the regulation of hematopoiesis, angiogenesis, tissue architecture, and organogenesis. The basis for such diversified activities rests, on one hand, upon the ubiquitous nature of chemokine production and chemokine receptor expression. Virtually every cell type can produce chemokines and expresses a unique combination of chemokine receptors. On the other hand, chemokine receptors make use of a flexible and complex network of intracellular signaling machineries that can regulate a variety of cellular functions ranging from cell migration, growth, and differentiation to death. As knowledge of the size of chemokine and chemokine receptor families rapidly reaches completeness, much is still to be uncovered in terms of functional architecture of the chemokine system. The disparity between the large number of chemokines and that smaller number of receptors is balanced by the promiscuity in ligand–receptor interactions, with multiple chemokines binding to the same receptor and several chemokines binding to more than one receptor.

The Spirit's Tether Mary Ellen Konieczny, 2013-07-01 Cultural conflicts about the family - including those surrounding women's social roles, abortion, same-sex marriage, and contraception - have intensified over the last few decades among Catholics, as well as among Americans generally. In fact, they are the source of much of the political polarization we see. But how do individuals in local settings and cultures - especially religious ones - experience and participate in these conflicts? Why are they so resonant? By exploring how religion and family life are intertwined in local parish settings, Mary Ellen Konieczny seeks to explain how and why Catholics are divided about the family. The Spirit's Tether presents a detailed comparative ethnographic analysis of the families and local religious cultures in two Catholic parishes, one conservative and one progressive. Through an examination of the activities of parish life and the faith stories of parishioners, this book reveals how parishes support and shape the ways in which Catholics work out the routines of marriage, childrearing, and work-family balance, as well as how they connect these everyday challenges to public politics. Local parishes, Konieczny argues, promote polarization through practices that unintentionally fragment the Catholic tradition.

The Encyclopedia & Guide to Diving with a Full Face Mask Matthew W. Robinson, 2012-10 Diving is an exciting sport as well as a requirement of some vocations such as commercial diving, military diving, public safety diving, and scientific diving. In sport diving, most learn to dive with a half mask to cover their eyes and nose. A second stage regulator supplies their breathing gas (air). This method of diving is safe, simple, and time-tested over the last half century. The diving scenarios that appear throughout this guide are actual situations that occurred to divers. The author spoke with these divers and recorded their experiences for the educational benefit of the reader. The scenarios are described as the author interpreted each of the experiences. All the divers and the people that might be associated with their dive experience should not be faulted for any bad situations they came to be in. Every person has had some type of mishap in life, and the purpose for sharing these scenarios is to teach and help avoid future incidents that might cost someone their life.

Design Considerations for Space Elevator Tether Climbers Cathy Swan, Peter Swan, Robert "Skip" Penny, John Knapman, Peter Glaskowsky, 2014-04 The subject selected for this 2013 study is the Space Elevator Tether Climber. The objective of the one year study was to survey current concepts and technologies related to tether climbers, identify critical issues, questions, and concerns, assess their impact on the development of space elevators, and project towards the future. The following are a few of the conclusions: - The study used the concept of constant power as a baseline because of its ability to lower design requirements on the tether climber. - The mass breakout of 6 MT for a climber and 14 MT for customer payloads seems feasible. The estimate is that with a travel time of one week to GEO seven tether climbers can be on a tether simultaneously. - The communication architecture should be integrated into the space elevator infrastructure and nodal layout. - Solar power, as the sole source, appears achievable. - The use of laser power as the sole source also seems achievable.

Youth - Heart of Darkness - The End of the Tether Joseph Conrad, 2020-09-17 This vintage book contains three short stories written by Joseph Conrad. These stories do not share the same narrative, but do share a theme: the stages of life. 'Youth' focuses on a young man's first sea-voyage to the East; 'Heart of Darkness' concerns a particularly unenlightened maturity; and 'The end of the Tether' deals with the old age of an ex-military man. Conrad's masterful writing has influenced many important twentieth-century writers and artists, including T. S. Eliot, Jorge Luis Borges, and Werner Herzog. This text is highly recommended for fans of Conrad's seminal work, and it would make for a worthy addition to any collection. This antiquarian volume is being republished now in an affordable, modern edition - complete with a specially commissioned biography of the author.

The End of the Tether Joseph Conrad, Philip Davis, 2022-11-10 '(Conrad) thought of civilised and morally tolerable human life as a dangerous walk on a thin crust of barely cooled lava which at any moment might break and let the unwary sink into fiery depths' - Bertrand Russell This selection of four tales by Conrad is about radical insecurity: lone human beings involuntarily forced into confrontation with a terrifying universe in which they can never be wholly at home. It leads with 'The End of the Tether' and includes also 'The Duel', 'The Return', and 'Amy Foster' - Sailor, Soldier, Rich Man, Immigrant. These powerful shorter works remind readers that Conrad is not just the teller of sea stories and tales of imperialist action, and not only the author of the ubiquitous 'Heart of Darkness'. This is the Conrad who is master of the terror element - global crisis, individual test, and personal trauma - in modern literature. For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.
