The Tetris Effect Dan Ackerman,2016-09-06 The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

Mediterranean Rhinoplasty Pier Giorgio Giacomini, 2022-07-28 The book offers a thorough description of rhinoplasty techniques for patients from the Mediterranean area. Noses come in different shapes and colors, depending on the various biotypes of the different geographic regions. This represents a topical issue for rhinoplasty surgeons, since different nasal morphologies imply different anatomic conditions. Moreover, beauty ideal varies from one region to the other, and those differences need to be taken into consideration. Based on these premises, the ethnic rhinoplasty is becoming more and more important among facial plastic surgeons. In order to broaden the understanding of anatomo-functional and cultural or cosmetic aspects specific to the Mediterranean nasal biotype, the book collects and discusses the experiences of surgeons operating on patients from the various regions of the Mediterranean area. Mediterranean Rhinoplasty represents a valuable resource not only for surgeons who are already experts in facial plastic surgery, but also for young otorhinolaryngologists, plastic surgeons and maxillofacial surgeons.

She visits famous places and discovers obscure ones - in the end embracing all that is Italian.--BOOK JACKET.

Teaching and Learning with Technology Concetta M. Stewart, Catherine C. Schifter, Melissa E. Markaridian Selverian, 2010-07-02 Today, new media is both augmenting and extending the traditional classroom with a variety of technology-based tools available to both students and faculty, and has created new virtual classrooms for anywhere, anytime availability to education. Despite the enormous potential for technology to support the educational enterprise in this emerging creative economy, technologies are still not yet fully integrated in the classroom and their association with educational outcomes is as-yet unclear. This book profiles scholarly work from around the world to examine closely the effectiveness of the newest media in education at bridging the gaps among and between teachers, students and subject matter at all levels, from K-12 through adult education. These pieces are theory-based investigations with implications for future research, theory and application. Contributors examine how the fields of education and new media have evolved and are continuing to evolve pedagogically and practically, from predominantly instructivist, with a passive, one-way teaching format; to constructivist, including teacher- and learner-controlled, sensorially immersive and socially interactive exchanges. This book will be of interest to students and faculty in the areas of new media in education, including distance learning, online learning and virtual learning.

Game Preview Nicolae Sfetcu, 2014-05-04 A guide for game preview and rules: history, definitions, classification, theory, video game consoles, cheating, links, etc. While many different subdivisions have been proposed, anthropologists classify games under three major headings, and have drawn some conclusions as to the social bases that each sort of game requires. They divide games broadly into, games of pure skill, such as hopscotch and target shooting; games of pure strategy, such as checkers, go, or tic-tac-toe; and games of chance, such as craps and snakes and ladders. A guide for game preview and rules: history, definitions, classification, theory, video game consoles, cheating, links, etc.

How to Play Video Games Nina Huntemann, 2019-03-26 Forty original contributions on games and gaming culture What does Pokémon Go tell us about globalization? What does Tetris teach us about rules? Is feminism boosted or bashed by Kim Kardashian: Hollywood? How does BioShock Infinite help us navigate world-building? From arcades to Atari, and phone apps to virtual reality headsets, video games have been at the epicenter of our ever-evolving technological reality. Unlike other media technologies, video games demand engagement like no other, which begs the question—what is the role that video games play in our lives, from our homes, to our phones, and on global culture writ large? How to Play Video Games brings together forty original essays from today's leading scholars on video game culture, writing about the games they know best and what they mean in broader social and cultural contexts. Read about avatars in Grand Theft Auto V, or music in The Legend of Zelda: Ocarina of Time. See how Age of Empires taught a generation about postcolonialism, and how Borderlands exposes the seedy underbelly of capitalism. These essays suggest that understanding video games in a critical context provides a new way to engage in contemporary culture. They are a must read for fans and students of the medium.
