Learning to Love the Bomb Sean M. Maloney,2011-07 In Learning to Love the Bomb, Sean M. Maloney explores the controversial subject of Canada's acquisition of nuclear weapons during the Cold War. Based on newly declassified Canadian and U.S. documents, it examines policy, strategy, operational, and technical matters and weaves these seemingly disparate elements into a compelling story that finally unlocks several Cold War mysteries. For example, while U.S. military forces during the 1962 Cuban Missile Crisis were focused on the Caribbean Sea and the southeastern United States, Canadian forces assumed responsibility for defending the northern United States, with aircraft armed with nuclear depth charges flying patrols and guarding against missile attack by Soviet submarines. This defensive strategy was a closely guarded secret because it conflicted with Canada's image as a peacekeeper and therefore a more passive member of NATO than its ally to the south. It is revealed here for the first time. The place of nuclear weapons in Canadian history has, until now, been a highly secret and misunderstood field subject to rumor, rhetoric, half-truths, and propaganda. Learning to Love the Bomb reveals the truth about Canada's role as a nuclear power.

The 20th Century A-GI Frank N. Magill,2013-05-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

Korean War Comic Books Leonard Rifas,2021-05-11 Comic books have presented fictional and fact-based stories of the Korean War, as it was being fought and afterward. Comparing these comics with events that inspired them offers a deeper understanding of the comics industry, America's forgotten war, and the anti-comics movement, championed by psychiatrist Fredric Wertham, who criticized their brutalization of the imagination. Comics--both newsstand offerings and government propaganda--used fictions to justify the unpopular war as necessary and moral. This book examines the dramatization of events and issues, including the war's origins, germ warfare, brainwashing, Cold War espionage, the nuclear threat, African Americans in the military, mistreatment of POWs, and atrocities.

Sad Macs, Bombs, and Other Disasters Ted Landau,2000 Landau, contributing editor to Macworld magazine and the Webmaster for MacFixIt, a Web site for Mac troubleshooting, offers clear, step-by-step instructions that are as useful for near-beginners as for pros. Not only does Landau show readers how to fix things and prevent problems, but he sharpens their diagnostic skills so they can fix problems that aren't discussed in the book.

21st-Century Statecraft Nayef R.F. Al-Rodhan,2022-01-01 From civilisational frontier risks associated with new challenges like disruptive technologies, to the shifting nature of great-power conflicts and subversion, the 21st century requires a new approach to statecraft. In 21st-Century Statecraft, Professor Nayef Al-Rodhan proposes five innovative statecraft concepts. He makes the case for a new method of geopolitical analysis called 'meta-geopolitics', and for 'dignity-based governance'. He shows how, in an interdependent and interconnected world, traditional thinking must move beyond zero-sum games and focus on 'multi-sum and symbiotic realist' interstate relations. This requires a new paradigm of global security premised on five dimensions of security, and a new concept of power, 'just power', which highlights the centrality of justice to state interests. These concepts enable states to balance competing interests and work towards what the author calls 'reconciliation statecraft'. Throughout, Professor Al-Rodhan brings his philosophical and neuroscientific expertise to bear, providing a practical model for conducting statecraft in a sustainable way.

Priorities ,1943-12

The Victim as Hero James J. Orr,2001-04-01 This is the first systematic, historical inquiry into the emergence of victim consciousness (higaisha ishiki) as an essential component of Japanese pacifist national identity after World War II. In his meticulously crafted narrative and analysis, the author reveals how postwar Japanese elites and American occupying authorities collaborated to structure the parameters of remembrance of the war, including the notion that the emperor and his people had been betrayed and duped by militarists. He goes on to explain the Japanese reliance on victim consciousness through a discussion of the ban-the-bomb movement of the mid-1950s, which raised the prominence of Hiroshima as an archetype of war victimhood and brought about the selective focus on Japanese war victimhood; the political strategies of three self-defined war victim groups (A-bomb victims, repatriates, and dispossessed landlords) to gain state compensation and hence valorization of their war victim experiences; shifting textbook narratives that reflected contemporary attitudes and structured future generations' understanding of the war; and three classic antiwar novels and films that contributed to the shaping of a sentimental humanism that continues to leave a strong imprint on the collective Japanese conscience.

The Royal Navy and the Mediterranean Convoys Malcolm Llewellyn-Jones,2013-09-05 This book contains the Naval Staff History originally issued by the Admiralty in 1957 as a confidential book for use within the Royal Navy. It has since been declassified and is published here for the first time, along with an extended preface. This volume describes the dangerous convoy operations in the Mediterranean which were necessary to relieve the garrison and people of Malta, covering the period from the beginning of 1941 until the end of 1942. These convoys had to be fought through against determined attack by German and Italian surface, submarine and, particularly, air forces. Although casualties were proportionately higher than in Atlantic convoys, Malta was successfully re-supplied and remained a considerable impediment to enemy's attempts to supply their armies in North Africa. These operations reveal the dedication, courage and professionalism of the sailors (of both naval and merchant services) as well as the airmen who supported them. A new preface sets the scene for the Staff History. The Royal Navy and the Mediterranean Convoys will be of great interest for students interested in the Mediterranean Convoys, Second World War and naval and military history.
