Protecting Human Rights Defenders in Latin America Ulisses Terto Neto, 2017-09-21 This book offers a legal and socio-political analysis of the Brazilian Program for the Protection of Human Rights Defenders. Discussing Colombian, Guatemalan and Mexican experiences, it fills a gap in the literature regarding Latin American public policy by investigating the creation, work, beneficiaries, broader effects, challenges, and effective ways to improve the Brazilian Program.

Defenders of the Faith Samuel C. Heilman, 2023-11-10 In this first in-depth portrait of ultra-Orthodox Jews in Israel today, Samuel Heilman introduces a community that to many may seem to be the very embodiment of the Jewish past. To outsiders who stumble upon these neighborhoods and find bearded men in caftans, children with earlocks, and women in long dresses, black kerchiefs and stockings, it may appear that these people still hold fast to every tradition while turning their backs to the contemporary world. But rather than being a relic from the past, ultra-Orthodox Jews, or haredim, are very much part of the contemporary landscape and are playing an increasingly prominent role in the Jewish world and in Israeli politics. *Defenders of the Faith* takes us inside the world of this contemporary fundamentalist community, its lifestyle and mores, including education, religious practices and beliefs, sexual ethics, and marriage. Heilman explores the reasons why this group is more militant and extreme than its pre-Holocaust brethren, and provides insight into the worldview of this small but influential sector of modern Jewry.

Reckoning Day Jacqueline Foertsch, 2013-09-30 Too often lost in our understanding of the American Cold War crisis, with its nuclear brinkmanship and global political chess game, is the simultaneous crisis on the nation's racial front. *Reckoning Day* is the first book to examine the relationship of African Americans to the atom bomb in postwar America. It tells the wide-ranging story of African Americans' response to the atomic threat in the postwar period. It examines the anti-nuclear writing and activism of major figures such as W.E.B. Du Bois, Dr. Martin Luther King Jr., and Lorraine Hansberry as well as the placement (or absence) of black characters in white-authored doomsday fiction and nonfiction. Author Jacqueline Foertsch analyzes the work of African American thinkers, activists, writers, journalists, filmmakers, and musical performers in the atomic decades of 1945 to 1965 and beyond. Her book tells the dynamic story of commitment and interdependence, as these major figures spoke with force and eloquence for nuclear disarmament, just as they argued unstintingly for racial equality on numerous other occasions. Foertsch also examines the location of African American characters in novels, science fiction, and survivalist nonfiction such as government-sponsored forecasts regarding post-nuclear survival. In these, black characters are often displaced or absented entirely: in doomsday narratives they are excluded from executive decision-making and the stories' often triumphant conclusions; in the nonfiction, they are rarely envisioned amongst the typical American survivors charged with rebuilding US society. Throughout *Reckoning Day*, issues of placement and positioning provide the conceptual framework: abandoned at ground zero (America's inner cities) during the height of the atomic threat, African Americans were figured in white-authored survival fiction as compliant servants aiding white victory over atomic adversity, while as historical figures they were often perceived as elsewhere (indifferent) to the atomic threat. In fact, African Americans' position on the bomb was rarely one of silence or indifference. Ranging from

appreciation to disdain to vigorous opposition, atomic-era African Americans developed diverse and meaningful positions on the bomb and made essential contributions to a remarkably American dialogue.

The Water Defenders Robin Broad, John Cavanagh, 2021-03-23 Winner of the 2021 Duke University Juan Mendez Award Named one of The Progressive's "Favorite Books of 2021" and one of the "Best of Books 2021" by Foreign Affairs The David and Goliath story of ordinary people in El Salvador who rallied together with international allies to prevent a global mining corporation from poisoning the country's main water source At a time when countless communities are resisting powerful corporations—from Flint, Michigan, to the Standing Rock Reservation, to Didipio in the Philippines, to the Gualcarque River in Honduras—The Water Defenders tells the inspirational story of a community that took on an international mining corporation at seemingly insurmountable odds and won not one but two historic victories. In the early 2000s, many people in El Salvador were at first excited by the prospect of jobs, progress, and prosperity that the Pacific Rim mining company promised. However, farmer Vidalina Morales, brothers Marcelo and Miguel Rivera, and others soon discovered that the river system supplying water to the majority of Salvadorans was in danger of catastrophic contamination. With a group of unlikely allies, local and global, they committed to stop the corporation and the destruction of their home. Based on over a decade of research and their own role as international allies of the community groups in El Salvador, Robin Broad and John Cavanagh unspool this untold story—a tale replete with corporate greed, a transnational lawsuit at a secretive World Bank tribunal in Washington, violent threats, murders, and—surprisingly—victory. The husband-and-wife duo immerses the reader in the lives of the Salvadoran villagers, the journeys of the local activists who sought the truth about the effects of gold mining on the environment, and the behind-the-scenes maneuverings of the corporate mining executives and their lawyers. The Water Defenders demands that we examine our assumptions about progress and prosperity, while providing valuable lessons for those fighting against destructive corporations in the United States and across the world.

Castles, Battles, and Bombs Jurgen Brauer, Hubert van Tuyl, 2008-11-15 Castles, Battles, and Bombs reconsiders key episodes of military history from the point of view of economics—with dramatically insightful results. For example, when looked at as a question of sheer cost, the building of castles in the High Middle Ages seems almost inevitable: though stunningly expensive, a strong castle was far cheaper to maintain than a standing army. The authors also reexamine the strategic bombing of Germany in World War II and provide new insights into France's decision to develop nuclear weapons. Drawing on these examples and more, Brauer and Van Tuyl suggest lessons for today's military, from counterterrorist strategy and military manpower planning to the use of

private military companies in Afghanistan and Iraq. In bringing economics into assessments of military history, [the authors] also bring illumination. . . . [The authors] turn their interdisciplinary lens on the mercenary arrangements of Renaissance Italy; the wars of Marlborough, Frederick the Great, and Napoleon; Grant's campaigns in the Civil War; and the strategic bombings of World War II. The results are invariably stimulating.—Martin Walker, *Wilson Quarterly*

This study is serious, creative, important. As an economist I am happy to see economics so professionally applied to illuminate major decisions in the history of warfare.—Thomas C. Schelling, Winner of the 2005 Nobel Prize in Economics

Keepers of the Gate: Defenders of the Free World Adrian P. Stubbs, 2011-08-02 Keepers of the Gate What began as a grand experiment to form a multi-national counter-terrorist special operations group (MCTSOG), to combat the global spread of terrorism in the 21st century, eventually became the worlds premier special ops organization. The SOG commandos tackle traditional terrorism as well as threats from beyond the skies leading up to December 2012. This special military command employs the use of traditional military hardware and technologies, as well as technology that some would refer to as, Tools of the gods. Making Friends with Hitler Ian Kershaw,2005-10-25 Ian Kershaw's biography of Adolf Hitler is widely regarded as the definitive work on the subject, as well as one of the most brilliant biographies of our time. In Making Friends with Hitler, the great scholar shines remarkable new light on decisions that led to war by tracing the extraordinary story of Lord Londonderry—one of Britain's wealthiest aristocrats, cousin of Winston Churchill, confidant of the king, and the only British cabinet member to outwardly support the Nazi party. Through Londonderry's tragic tale, Kershaw shows us that behind the accepted dogma of English appeasement and German bullying is a much more complicated and interesting reality—full of miscalculations on both sides that proved to be among the most fateful in history.
