**Short Message Service (SMS)** Friedhelm Hillebrand, 2010-01-21

Contributions from Finn Trosby, Kevin Holley, Ian Harris Written to celebrate the 25th anniversary of SMS standardization by the people who produced the standards, Short Message Service (SMS): The Creation of Personal Text Messaging, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the

only messaging service, and so an SMS evolution is put forward.

Prostitution and Sex Work Melissa Hope Ditmore, 2010-12-16

A fascinating overview of prostitution and sex work in the United States, from the Colonial era to today, examines the issue as it

affects men, women, and transgender individuals of all races and classes. *Prostitution and Sex Work* is the first book since 1921 to offer a historic overview of this controversial topic—and what our views on it say about American society. Exploring key people, places, and events, the guide includes descriptions of the myriad variations of the sale of sex and of the venues where prostitution occurs, as well as recurring themes such as panics about sexually transmitted diseases and the ever-present issue of violence in the sex trade. After reviewing the history of prostitution and sex work over the past 400 years, the book offers detailed information about the legal context of prostitution in America during the last century. It focuses particularly on the period since prostitution was criminalized during a panic over white slavery in the early 20th century, drawing parallels with current sex trafficking topics. An appendix of materials produced by sex workers is especially informative for those wishing to truly understand both sides of the issue.

**The Cult of the Amateur** Andrew Keen, 2007-06-05 Amateur hour has arrived, and the audience is running the show In a hard-hitting and provocative polemic, Silicon Valley insider and pundit Andrew Keen exposes the grave consequences of today's new

participatory Web 2.0 and reveals how it threatens our values, economy, and ultimately the very innovation and creativity that forms the fabric of American achievement. Our most valued cultural institutions, Keen warns—our professional newspapers, magazines, music, and movies—are being overtaken by an avalanche of amateur, user-generated free content. Advertising revenue is being siphoned off by free classified ads on sites like Craigslist; television networks are under attack from free user-generated programming on YouTube and the like; file-sharing and digital piracy have devastated the multibillion-dollar music business and threaten to undermine our movie industry. Worse, Keen claims, our “cut-and-paste” online culture—in which intellectual property is freely swapped, downloaded, remashed, and aggregated—threatens over 200 years of copyright protection and intellectual property rights, robbing artists, authors, journalists, musicians, editors, and producers of the fruits of their creative labors. In today’s self-broadcasting culture, where amateurism is celebrated and anyone with an opinion, however ill-informed, can publish a blog, post a video on YouTube, or change an entry on Wikipedia, the distinction between trained expert and uninformed amateur becomes dangerously blurred. When anonymous bloggers and

videographers, unconstrained by professional standards or editorial filters, can alter the public debate and manipulate public opinion, truth becomes a commodity to be bought, sold, packaged, and reinvented. The very anonymity that the Web 2.0 offers calls into question the reliability of the information we receive and creates an environment in which sexual predators and identity thieves can roam free. While no Luddite—Keen pioneered several Internet startups himself—he urges us to consider the consequences of blindly supporting a culture that endorses plagiarism and piracy and that fundamentally weakens traditional media and creative institutions. Offering concrete solutions on how we can reign in the free-wheeling, narcissistic atmosphere that pervades the Web, *THE CULT OF THE AMATEUR* is a wake-up call to each and every one of us.

Communication Perspectives on HIV/AIDS for the 21st Century

Timothy Edgar, Seth M. Noar, Vicki S. Freimuth, 2009-04-09

Reflecting the current state of research into the communication aspects of HIV/AIDS, this volume explores AIDS-related communication scholarship, moving forward from the 1992

publication *AIDS: A Communication Perspective*. Editors Timothy Edgar, Seth M. Noar, and Vicki S. Freimuth have developed this up-to-date collection to focus on today's key communication issues in the HIV/AIDS epidemic. Chapters herein examine the interplay of the messages individuals receive about AIDS at the public level as well as the messages exchanged between individuals at the interpersonal level. Acknowledging how the face of HIV/AIDS has changed since 1992, the volume promotes the perspective that an understanding of effective communication through both mediated and interpersonal channels is essential to winning the continued battle against AIDS. Issues addressed here include: Social stigma associated with the disease, social support and those living with HIV/AIDS, and the current state of HIV testing Parent-child discussions surrounding HIV/AIDS and safer sexual behavior, and cultural sensitivity relating to developing HIV prevention and sex education programs The effectiveness of health campaigns to impact attitudes, norms, and behavior, as well as the current state of entertainment education and its ability to contribute to HIV prevention News media coverage of HIV/AIDS and the impact of the agenda-setting function on public opinion and policy making Health literacy and its importance to the health and well-being of

those undergoing HIV treatment. The role of technological innovations, most notably the Internet, used for both prevention interventions as well as risky behavior. The volume also includes exemplars that showcase the diversity of approaches to health communication used to combat the HIV/AIDS epidemic. These cases include interpersonal and mass communication mediums; traditional along with new media and technology; research by academics and practitioners; individual as well as community-based approaches; work based in the United States and internationally; and campaigns directed at at-risk, HIV- positive, as well as general populations. With new topics, new contributors, and a broadened scope, this book goes beyond a revision of the 1992 volume to reflect the current state of communication research on HIV/AIDS across key contexts. It is designed for academics, researchers, practitioners, and students in health communication, health psychology, and other areas of AIDS research. As a unique examination of communication research, it makes an indelible contribution to the growing knowledge base of communication approaches to combating HIV/AIDS.

Loving Bravely Alexandra H. Solomon, 2017-02-02 As seen on The TODAY Show! “A godsend to anyone searching for, but

struggling to find, true love in their lives.” —Kristin Neff, PhD, author of *Self-Compassion Empowering and compassionate*, and its lessons are universal. —Publishers Weekly Real love starts with you. In order to attract a life partner and build a healthy intimate relationship, you must first become a good partner to yourself. This book offers twenty invaluable lessons that will help you explore and commit to your own emotional and psychological well-being so you can be ready, resilient, and confident in love. Many of us enter into romantic relationships full of expectation and hope, only to be sorely disappointed by the realization that the partner we’ve selected is a flawed human being with their own neuroses, history, and desires. Most relationships end because one or both people haven’t done the internal work necessary to develop self-awareness and take responsibility for their own experiences. We’ve all heard “You can’t love anyone unless you love yourself,” but amid life’s distractions and the myth of perfect, romantic love, how exactly do you do that? In *Loving Bravely*, psychologist, professor and relationship expert Alexandra H. Solomon introduces the idea of relational self-awareness, encouraging you to explore your personal history to gain an understanding of your own relational patterns, as well as your strengths and weaknesses in

relationships. By doing so, you'll learn what relationships actually require, beyond the fairytale notions of romance. And by maintaining a steady but gentle focus on yourself, you'll build the best possible foundation for making a loving connection. By understanding your past relationship experiences, cultivating a strong sense of self-awareness, and determining what it is you really want in a romantic partner—you'll be ready to find the healthy, lasting love your heart desires.
