**Living Books** Janneke Adema, 2021-08-31 Reimagining the scholarly book as living and collaborative--not as commodified and essentialized, but in all its dynamic materiality. In this book, Janneke Adema proposes that we reimagine the scholarly book as a living and collaborative project--not as linear, bound, and fixed, but as fluid, remixed, and liquid, a space for experimentation. She presents a series of cutting-edge experiments in arts and humanities book publishing, showcasing the radical new forms that book-based scholarly work might take in the digital age. Adema's proposed alternative futures for the scholarly book go beyond such print-based assumptions as fixity, stability, the single author, originality, and copyright, reaching instead for a dynamic and emergent materiality. Adema suggests ways to unbind the book, describing experiments in scholarly book publishing with new forms of anonymous collaborative authorship, radical open access publishing, and processual, living, and remixed publications, among other practices. She doesn't cast digital as the solution and print as the problem; the problem in scholarly publishing, she argues, is not print itself, but the way print has been commodified and essentialized. Adema explores alternative, more ethical models of authorship; constructs an alternative genealogy of openness; and examines opportunities for intervention in current cultures of knowledge production. Finally, asking why it is that we cut and bind our research together at all, she examines two book publishing projects that experiment with remix and reuse and try to rethink and reperform the book-apparatus by taking responsibility for the cuts they make.

**Effective Practice in Youth Justice** Martin Stephenson, Henri Giller, Sally Brown, 2010-12-21 Providing a comprehensive and up-to-date review of research and the implications for practice, the second edition of *Effective Practice in Youth Justice* considers core areas of youth justice practice, such as how to engage young people effectively within the context of recent changes to the youth justice system brought about by the introduction of the scaled approach and the Youth Rehabilitation Order. It also provides an overview of the available research in specific areas of practice, including assessment; planning interventions and supervision; mental health; substance misuse; restorative justice; education, training and employment; and custody and resettlement. The content has been specifically developed to meet the needs of students taking Youth Justice Board (YJB) sponsored courses with the Open University and is required reading for many of these. The book is also an essential resource for professionals working within the youth justice system, those training to work in youth justice, and students taking courses in youth justice or related subjects.

*Solutions Manual to Accompany Introduction to Bioengineering* Stanley A. Berger, E. R. Lewis, E. W. Goldsmith, 2000 This is a solutions manual available free to adopters of the textbook *Introduction to Bioengineering*. The parent text contains answers to problems at the end of the book. This solutions manual contains detailed worked-through solutions to most of the problems in the parent book, written by the authors of the relevant chapters in the main text. The scope of the parent text, which covers a wide spectrum of topics, means that few lecturers will be expert in all the areas discussed, so detailed solutions will be welcomed.
