The Word Isaac Mozeson,2000 This landmark dictionary proves that English words can be traced back to the universal, original language, Biblical Hebrew. Genesis II supports a 'Mother Tongue' thesis, and the Bible also claims that Adam named the animals. This may seem difficult to accept, but then why do the translations of the following animals' names: Skunk, Gopher, Giraffe and Horse actually have corresponding meanings in Biblical Hebrew, such as: Stinker, Digger, Neck and Plower? The book features overwhelming data suggesting that the roots of all human words are universal, and that words have related synonyms and antonyms that must have been intelligently designed (perhaps by the designer of life himself!) The current hypothesis that language evolved from grunting ape-men may seem like the flat earth theory after reading this book. The 22,000 English-Hebrew links provide surprising evidence, and open new worlds of understanding, once we consider that all of these similar words could not be coincidences.

Seeing the Unseen Florian Förg,2020-04 Vision reports occupy large space in the Book of Ezekiel and the texts put special emphasis on the details of receiving a vision. In Thailand, Buddhist monks or Hindu priests also have seen visions. Mediums travel to distant places in visions and meet with spirits. Christian churches set goals for the future and call them visions. This study takes a closer look at visions both in the Book of Ezekiel and in the Thai context by focusing on the Thai translation of Hebrew terms for visions. Besides that, it compares the Hebrew concepts behind visions with the Thai understanding.
