See The Air Sotirios Papathanasiou,2020-05 Since my first book
See The Air - The Essential Guide for Optimal Air Quality in Your
Life was published back in 2017 many have read it, and many have
followed my example and tried to write and describe the problem too.
There is some interest in the field, and I want to contribute even
more by gathering all the available information regarding air pollution
and its impact on health in this book. My intention here is clear, I
want to shock people and authorities and make it clear that there is
proof. Air pollution kills millions of people every year and there is no
excuse not to listen to brilliant scientists and the noble work they
have done.

The Cost of Air Pollution Control to Cotton Ginners Charles
Archibald Wilmot,Zolon Marion Looney,Oliver L. McCaskill,1974
Under present and anticipated control regulations, cotton gins will
need to reduce air pollution. Estimates for the cost of installing
cyclones (which remove particles from the air by centrifugal force)
and inline air filters, plus the costs of overhead storage hoppers and
trucks for hauling, range from nearly $24,000 for a 6-bale per hour gin
designed for machine-picked cotton to well over $53,000 for a plant
capable of ginning 36 bales of stripper-harvested cotton per hour. If
future air pollution regulations require all of the approximately 3,900
active gins to install this equipment, total investment cost would
exceed $100 million.--Page iv.
