Plato's Alarm Clock James M. Russell,2018-11-01 We all like to think we are pretty smart. New medical advances seem to come along every day; space travel suddenly doesn't seem so difficult; self-driving cars are no longer a thing of the future . but if we were stranded on a desert island tomorrow, most of us wouldn't know how to catch a fish or start a fire, let alone rebuild all that extraordinary technology we now rely on. The truth is that we're not necessarily more clever than our ancestors, we just have an accumulation of centuries of technological progress on which we can rely. As this book shows, many of the ancients were much more advanced than we realize - indeed there are recent inventions that had actually been discovered centuries earlier and then forgotten. And what about all those modern day devices and machines that rely on ancient inventions such as paper, levers and gears? From brain surgery in the Stone Age to Chinese whisky from the 7th century BC, to Damascus steel - once the hardest metal in the world, which we no longer know how to make - this insightful book collects together the stories of hundreds of ancient devices, inventions and breakthroughs from around the world and across the centuries, giving us a fascinating glimpse into past eras that were far more technologically advanced than we sometimes realize.

The Poetry Alarm Clock Jill Jennings,2008-05 In The Poetry Alarm Clock, you will meet a drunk with smeared lipstick who shows up only at midnight; a lady enshrined forever on a restaurant wall; a little boy with Shaken Child Syndrome who just wants a home; a backyard with magical properties; a colonel in the Army who wears orange socks; and a factory worker in a drug plant who runs out of pills for herself. Images like these you won't be able to get out of your mind, and they are on every page of this volume. Poems set like jewels in a jester's crown of the ironic, the ridiculous and the tragic, The Poetry Alarm Clock brings you people you feel you already know as well as new ones you want to know more about. Coming from the mind of a woman who worked in television, newspapers, magazines and public relations, and then gave it all up to teach Latin in the public schools, this book of poetry will appeal to you, even if you hated poetry in high school.

sound. All the while, Brad Basely is haunted in the darkness of his own bedroom that there is somebody or something watching him. It's eerie, inconspicuous, non-stop sound in the blackened night goes tick-tock.

But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

Alarm Clock Everett Cole,2012-03-25 Many years had passed since the original country rock had been broken, cut and set, to form solid pavement for the courtyard at Opertal Prison. And over those years the stones had suffered change as countless feet, scuffing and pressing against once rough edges, had smoothed the bits of rock, burnishing their surfaces until the light of the setting sun now reflected from them as from polished mosaic.As Stan Graham crossed the wide expanse from library to cell block, his shoe soles added their small bit to the perfection of the age-old polish.He looked up at the building ahead of him, noting the coarse, weathered stone of the walls. The severe, vertical lines of the mass reminded him of Kendall Hall, back at the Stellar Guard Academy. He smiled wryly.There were, he told himself, differences. People rarely left this place against their wishes. None had wanted to come here. Few had any desire to stay. Whereas at the Academy-
