Natural Building Techniques Tom Woolley,2022-04-25 Natural materials are increasingly being valued for their use in a wide range of techniques and solutions, not just for building cabins in the countryside, but also for housing, schools and city structures. As the need to respond to climate change becomes a serious requirement for all building projects, so too does our understanding of how these bio-based and renewable materials can help to reduce carbon emissions. With convincing evidence that natural materials work as well as, if not better than, conventional materials, this helpful guide offers an outline of many of the materials, products and methods of construction that are available, equipping readers with confidence to create healthy, ecological homes. This comprehensive book will be of interest to self-builders, home owners, architects, housing developers and specifiers,

as well as environmentalists, eco builders and campaigners who want to reduce the impact of construction on the planet.

**Children, Nature, Cities** Ann Marie F. Murnaghan, Laura J. Shillington, 2016-05-26 Why does the way we think about urban children and urban nature matter? This volume explores how dichotomies between nature/culture, rural/urban, and child/adult have structured our understandings about the place of children and nature in the city. By placing children and youth at the center of re-theorising the city as a socio-natural space, the book illustrates how children and youth's relations to and with nature can change adultist perspectives and help create more ecologically and socially just cities. As a key contribution to children's studies, the book engages and enlivens debates in urban political ecology and urban theory, which have not yet treated age as an important axis of difference. With examples from ten localities, the chapters in this volume ask how we can subvert both romanticized and modernist conceptualizations of nature and childhood that conflate innocence and purity with children and nature; the volume asks what happens when we re-invent urban natures with children's needs and perspectives in mind.

Consciousness Inside and Out: Phenomenology, Neuroscience, and the Nature of Experience

Richard Brown, 2013-08-23 This volume is product of the third online consciousness conference, held at <http://consciousnessonline.com> in February and March 2011. Chapters range over epistemological issues in the science and philosophy of perception, what neuroscience can do to help us solve philosophical issues in the philosophy of mind, what the true nature of black and white vision, pain, auditory, olfactory, or multi-modal experiences are, to higher-order theories of consciousness, synesthesia, among others. Each chapter includes a target article, commentaries, and in most cases,

a final response from the author. Though wide-ranging all of the papers aim to understand consciousness both from the inside, as we experience it, and from the outside as we encounter it in our science. The Online Consciousness Conference, founded and organized by Richard Brown, is dedicated to the rigorous study of consciousness and mind. The goal is to bring philosophers, scientists, and interested lay persons together in an online venue to promote high-level discussion and exchanging of views, ideas and data related to the scientific and philosophical study of consciousness.

The Best American Science and Nature Writing 2016 Amy Stewart, 2016-10-04 This anthology collects some of the year's best science and nature writing—from climate change to killer beetles, an exposé of nail salons, and more. As guest editor Amy Stewart says in her introduction, “science writers get into the game with all kinds of noble, high-minded ambitions. We want to educate. To enlighten...But at the end of the day, we're all writers. We're just like novelists, memoirists, and poets. We're entertainers.” The writers in this anthology pull off that wonderful feat of turning hard research into page-turning narrative. From a Pulitzer Prize-winning essay on the earthquake that could decimate the Pacific Northwest to the astonishing work of investigative journalism that transformed the nail salon industry, this is a collection of hard-hitting and beautifully composed writing on the wonders, dangers, and oddities of scientific innovation and our natural world. The Best

American Science and Nature Writing 2016 includes Kathryn Schulz, Sarah Maslin Nir, Charles C. Mann, Oliver Sacks, Elizabeth Kolbert, Gretel Ehrlich, and others.
