The Crowd John Plotz, 2000-12-03 Between 1800 and 1850, political demonstrations and the tumult of a ballooning street life not only brought novel kinds of crowds onto the streets of London, but also fundamentally changed British ideas about public and private space. *The Crowd* sets out to demonstrate the influence of these new crowds, riots, and demonstrations on the period's literature. John Plotz offers compelling readings of works by Thomas De Quincey, Thomas Carlyle, William Wordsworth, Maria Edgeworth, and Charlotte Bronte, arguing that new representative crowds became a potent rival for the representational claims of literary texts themselves. As rivals in representation, these crowds triggered important changes not simply in how these authors depicted crowds, but in their notions of public life and privacy in general. *The Crowd* is the first book devoted to an analysis of crowds in British literature. In addition to this being a noteworthy and innovative contribution to literary criticism, it addresses ongoing debates in political theory on the nature of the public-political realm and offers a new reading of the contested public discourses of class, nation, and gender. In the end, it provides a sophisticated and rich analysis of an important facet of the beginning of the modern age.

The Crowd & The Psychology of Revolution Gustave Le Bon, 2024-01-17 This edition brings to you Le Bon's two most celebrated works, *The Crowd: A Study of the Popular Mind* and *The Psychology of Revolution*, which made a

breakthrough in what is now known as crowd psychology. Le Bon theorised about a new entity, psychological crowd, which emerges from incorporating the assembled population not only forms a new body but also creates a collective unconsciousness. As a group of people gather together and coalesces to form a crowd, there is a magnetic influence given out by the crowd that transmutes every individual's behaviour until it becomes governed by the group mind. Gustave Le Bon was a French polymath whose areas of interest included anthropology, psychology, sociology, medicine, invention, and physics. Ignored or maligned by sections of the French academic and scientific establishment during his life due to his politically conservative and reactionary views, Le Bon was critical of democracy and socialism. Le Bon's works were influential to such disparate figures as Theodore Roosevelt and Benito Mussolini, Sigmund Freud and José Ortega y Gasset, Adolf Hitler and Vladimir Lenin.

The Crowd Gustave Le Bon, 2012-03-15 One of the most influential books on social psychology ever written, brilliantly instructive in the general characteristics and mental unity of a crowd. A must-read for students, politicians, and investors.

The Crowd A Study of the Popular Mind Gustave Le Bon, 2023-08-11 The evolution of the present age—The great changes in civilisation are the consequence of changes in National thought—Modern belief in the power of crowds—It transforms the traditional policy of the European states—How the

rise of the popular classes comes about, and the manner in which they exercise their power—The necessary consequences of the power of the crowd—Crowds unable to play a part other than destructive—The dissolution of worn-out civilisations is the work of the crowd—General ignorance of the psychology of crowds— Importance of the study of crowds for legislators and statesmen. The great upheavals which precede changes of civilisations such as the fall of the Roman Empire and the foundation of the Arabian Empire, seem at first sight determined more especially by political transformations, foreign invasion, or the overthrow of dynasties. But a more attentive study of these events shows that behind their apparent causes the real cause is generally seen to be a profound modification in the ideas of the peoples. The true historical upheavals are not those which astonish us by their grandeur and violence. The only important changes whence the renewal of civilisations results, affect ideas, conceptions, and beliefs. The memorable events of history are the visible effects of the invisible changes of human thought. The reason these great events are so rare is that there is nothing so stable in a race as the inherited groundwork of its thoughts. The present epoch is one of these critical moments in which the thought of mankind is undergoing a process of transformation. Two fundamental factors are at the base of this transformation. The first is the destruction of those religious, political, and social beliefs in which all the elements of our civilisation are rooted. The second is the creation of entirely new conditions of existence and

thought as the result of modern scientific and industrial discoveries. The ideas of the past, although half destroyed, being still very powerful, and the ideas which are to replace them being still in process of formation, the modern age represents a period of transition and anarchy. It is not easy to say as yet what will one day be evolved from this necessarily somewhat chaotic period. What will be the fundamental ideas on which the societies that are to succeed our own will be built up? We do not at present know. Still it is already clear that on whatever lines the societies of the future are organised, they will have to count with a new power, with the last surviving sovereign force of modern times, the power of crowds. On the ruins of so many ideas formerly considered beyond discussion, and to-day decayed or decaying, of so many sources of authority that successive revolutions have destroyed, this power, which alone has arisen in their stead, seems soon destined to absorb the others. While all our ancient beliefs are tottering and disappearing, while the old pillars of society are giving way one by one, the power of the crowd is the only force that nothing menaces, and of which the prestige is continually on the increase. The age we are about to enter will in truth be the ERA OF CROWDS. Scarcely a century ago the traditional policy of European states and the rivalries of sovereigns were the principal factors that shaped events. The opinion of the masses scarcely counted, and most frequently indeed did not count at all. To-day it is the traditions which used to obtain in politics, and the individual tendencies and rivalries

of rulers which do not count; while, on the contrary, the voice of the masses has become preponderant. It is this voice that dictates their conduct to kings, whose endeavour is to take note of its utterances. The destinies of nations are elaborated at present in the heart of the masses, and no longer in the councils of princes. The entry of the popular classes into political life—that is to say, in reality, their progressive transformation into governing classes—is one of the most striking characteristics of our epoch of transition. The introduction of universal suffrage, which exercised for a long time but little influence, is not, as might be thought, the distinguishing feature of this transference of political power. The progressive growth of the power of the masses took place at first by the propagation of certain ideas, which have slowly implanted themselves in men's minds, and afterwards by the gradual association of individuals bent on bringing about the realisation of theoretical conceptions. It is by association that crowds have come to procure ideas with respect to their interests which are very clearly defined if not particularly just, and have arrived at a consciousness of their strength. The masses are founding syndicates before which the authorities capitulate one after the other; they are also founding labour unions, which in spite of all economic laws tend to regulate the conditions of labour and wages. They return to assemblies in which the Government is vested, representatives utterly lacking initiative and independence, and reduced most often to nothing else than the spokesmen

of the committees that have chosen them. To-day the claims of the masses are becoming more and more sharply defined, and amount to nothing less than a determination to utterly destroy society as it now exists, with a view to making it hark back to that primitive communism which was the normal condition of all human groups before the dawn of civilisation. Limitations of the hours of labour, the nationalisation of mines, railways, factories, and the soil, the equal distribution of all products, the elimination of all the upper classes for the benefit of the popular classes, &c., such are these claims. Little adapted to reasoning, crowds, on the contrary, are quick to act. As the result of their present organisation their strength has become immense. The dogmas whose birth we are witnessing will soon have the force of the old dogmas; that is to say, the tyrannical and sovereign force of being above discussion. The divine right of the masses is about to replace the divine right of kings. The writers who enjoy the favour of our middle classes, those who best represent their rather narrow ideas, their somewhat prescribed views, their rather superficial scepticism, and their at times somewhat excessive egoism, display profound alarm at this new power which they see growing; and to combat the disorder in men's minds they are addressing despairing appeals to those moral forces of the Church for which they formerly professed so much disdain. They talk to us of the bankruptcy of science, go back in penitence to Rome, and remind us of the teachings of revealed truth. These new converts forget that it is too late. Had they been

really touched by grace, a like operation could not have the same influence on minds less concerned with the preoccupations which beset these recent adherents to religion. The masses repudiate to-day the gods which their admonishers repudiated yesterday and helped to destroy. There is no power, Divine or human, that can oblige a stream to flow back to its source. There has been no bankruptcy of science, and science has had no share in the present intellectual anarchy, nor in the making of the new power which is springing up in the midst of this anarchy. Science promised us truth, or at least a knowledge of such relations as our intelligence can seize: it never promised us peace or happiness. Sovereignly indifferent to our feelings, it is deaf to our lamentations. It is for us to endeavour to live with science, since nothing can bring back the illusions it has destroyed. Universal symptoms, visible in all nations, show us the rapid growth of the power of crowds, and do not admit of our supposing that it is destined to cease growing at an early date. Whatever fate it may reserve for us, we shall have to submit to it. All reasoning against it is a mere vain war of words. Certainly it is possible that the advent to power of the masses marks one of the last stages of Western civilisation, a complete return to those periods of confused anarchy which seem always destined to precede the birth of every new society. But may this result be prevented? Up to now these thoroughgoing destructions of a worn-out civilisation have constituted the most obvious task of the masses. It is not indeed to-day merely that this can be traced.

History tells us, that from the moment when the moral forces on which a civilisation rested have lost their strength, its final dissolution is brought about by those unconscious and brutal crowds known, justifiably enough, as barbarians. Civilisations as yet have only been created and directed by a small intellectual aristocracy, never by crowds. Crowds are only powerful for destruction. Their rule is always tantamount to a barbarian phase. A civilisation involves fixed rules, discipline, a passing from the instinctive to the rational state, forethought for the future, an elevated degree of culture—all of them conditions that crowds, left to themselves, have invariably shown themselves incapable of realising. In consequence of the purely destructive nature of their power crowds act like those microbes which hasten the dissolution of enfeebled or dead bodies. When the structure of a civilisation is rotten, it is always the masses that bring about its downfall. It is at such a juncture that their chief mission is plainly visible, and that for a while the philosophy of number seems the only philosophy of history. Is the same fate in store for our civilisation? There is ground to fear that this is the case, but we are not as yet in a position to be certain of it. However this may be, we are bound to resign ourselves to the reign of the masses, since want of foresight has in succession overthrown all the barriers that might have kept the crowd in check. We have a very slight knowledge of these crowds which are beginning to be the object of so much discussion. Professional students of psychology, having lived far from

them, have always ignored them, and when, as of late, they have turned their attention in this direction it has only been to consider the crimes crowds are capable of committing. Without a doubt criminal crowds exist, but virtuous and heroic crowds, and crowds of many other kinds, are also to be met with. The crimes of crowds only constitute a particular phase of their psychology. The mental constitution of crowds is not to be learnt merely by a study of their crimes, any more than that of an individual by a mere description of his vices. However, in point of fact, all the world's masters, all the founders of religions or empires, the apostles of all beliefs, eminent statesmen, and, in a more modest sphere, the mere chiefs of small groups of men have always been unconscious psychologists, possessed of an instinctive and often very sure knowledge of the character of crowds, and it is their accurate knowledge of this character that has enabled them to so easily establish their mastery. Napoleon had a marvellous insight into the psychology of the masses of the country over which he reigned, but he, at times, completely misunderstood the psychology of crowds belonging to other races and it is because he thus misunderstood it that he engaged in Spain, and notably in Russia, in conflicts in which his power received blows which were destined within a brief space of time to ruin it. A knowledge of the psychology of crowds is to-day the last resource of the statesman who wishes not to govern them—that is becoming a very difficult matter—but at any rate not to be too much governed by them. It is only by obtaining some sort of

insight into the psychology of crowds that it can be understood how slight is the action upon them of laws and institutions, how powerless they are to hold any opinions other than those which are imposed upon them, and that it is not with rules based on theories of pure equity that they are to be led, but by seeking what produces an impression on them and what seduces them. For instance, should a legislator, wishing to impose a new tax, choose that which would be theoretically the most just? By no means. In practice the most unjust may be the best for the masses. Should it at the same time be the least obvious, and apparently the least burdensome, it will be the most easily tolerated. It is for this reason that an indirect tax, however exorbitant it be, will always be accepted by the crowd, because, being paid daily in fractions of a farthing on objects of consumption, it will not interfere with the habits of the crowd, and will pass unperceived. Replace it by a proportional tax on wages or income of any other kind, to be paid in a lump sum, and were this new imposition theoretically ten times less burdensome than the other, it would give rise to unanimous protest. This arises from the fact that a sum relatively high, which will appear immense, and will in consequence strike the imagination, has been substituted for the unperceived fractions of a farthing. The new tax would only appear light had it been saved farthing by farthing, but this economic proceeding involves an amount of foresight of which the masses are incapable. The example which precedes is of the simplest. Its appositeness will be easily perceived. It

did not escape the attention of such a psychologist as Napoleon, but our modern legislators, ignorant as they are of the characteristics of a crowd, are unable to appreciate it. Experience has not taught them as yet to a sufficient degree that men never shape their conduct upon the teaching of pure reason. Many other practical applications might be made of the psychology of crowds. A knowledge of this science throws the most vivid light on a great number of historical and economic phenomena totally incomprehensible without it. I shall have occasion to show that the reason why the most remarkable of modern historians, Taine, has at times so imperfectly understood the events of the great French Revolution is, that it never occurred to him to study the genius of crowds. He took as his guide in the study of this complicated period the descriptive method resorted to by naturalists; but the moral forces are almost absent in the case of the phenomena which naturalists have to study. Yet it is precisely these forces that constitute the true mainsprings of history. In consequence, merely looked at from its practical side, the study of the psychology of crowds deserved to be attempted. Were its interest that resulting from pure curiosity only, it would still merit attention. It is as interesting to decipher the motives of the actions of men as to determine the characteristics of a mineral or a plant. Our study of the genius of crowds can merely be a brief synthesis, a simple summary of our investigations. Nothing more must be demanded of it than a few suggestive views. Others will

work the ground more thoroughly. To-day we only touch the surface of a still almost virgin soil..FROM THE BOOKS.

Japanese American Relocation in World War II Roger W. Lotchin,2018-05-03 In this revisionist history of the United States government relocation of Japanese-American citizens during World War II, Roger W. Lotchin challenges the prevailing notion that racism was the cause of the creation of these centers. After unpacking the origins and meanings of American attitudes toward the Japanese-Americans, Lotchin then shows that Japanese relocation was a consequence of nationalism rather than racism. Lotchin also explores the conditions in the relocation centers and the experiences of those who lived there, with discussions on health, religion, recreation, economics, consumerism, and theater. He honors those affected by uncovering the complexity of how and why their relocation happened, and makes it clear that most Japanese-Americans never went to a relocation center. Written by a specialist in US home front studies, this book will be required reading for scholars and students of the American home front during World War II, Japanese relocation, and the history of Japanese immigrants in America.

Unleashing the Crowd Ann Majchrzak, Arvind Malhotra, 2019-11-06 This book disrupts the way practitioners and academic scholars think about crowds, crowdsourcing, innovation, and new organizational forms in this emerging period of ubiquitous access to the internet. The authors argue that the current approach to crowdsourcing unnecessarily limits the crowd to offering ideas, locking out those of us with knowledge about a problem. They use data from 25 case studies of flash crowds – anonymous strangers answering online announcements to participate in a 7-10 day innovation challenge – half of whom were unleashed from the limitations of focusing on ideas. Yet, these crowds were able to develop new business models, new product lines, and offer useful solutions to global problems in fields as diverse as health care insurance, software development, and societal change. This book, which offers a theory of collective production of innovative solutions explaining the practices that the crowds organically followed, will revolutionize current assumptions about how innovation and crowdsourcing should be managed for commercial as well as societal purposes.

The Figure of the Crowd in Early Modern London I. Munro, 2005-04-15 The Figure of the Crowd in Early Modern London examines the cultural phenomenon of the urban crowd in the context of early modern London's population crisis. The book explores the crowd's double function as a symbol of the city's growth and as the necessary context for the public performance of urban culture. Its central argument is that the figure of the crowd acts as a supplement to the symbolic space of the city, at once providing a tangible referent for urban meaning and threatening the legibility of that meaning through its motive force and uncontrollable energy.

John Paul II Raymond Flynn, Robin Moore, Jim Vrabel, 2001 Drawing on years of personal interaction with the pope, and on his unique understanding of the intersection of religion and politics, former U.S. ambassador to the vatican and mayor of Boston Ray Flynn shows how John Paul II changed the papacy, perhaps forever. Unlike any other pope, and indeed, unlike any other person, John Paul II has reached out, creating dialogue or creating uproar, but always striving to unite the human community. Flynn (with co-authors Robin Moore and Jim Vrabel) gives an intimate, compelling, and comprehensive portrait of John Paul II's controversial papacy, from his origins in Poland to his impact on the American people and their politics, and his travels to the far corners of the world. AUTHOR BIO: Ray Flynn served as U.S. Ambassador to the Vatican from 1993-1997, and as the Mayor of Boston from 1984-1993. He

hosts a daily, nationally syndicated political television talk show and lives in Boston with his wife and six children. Robin Moore is the bestselling author of *The French Connection* and *The Green Berets*, as well as more than thirty other novels and nonfiction books. He lives with his wife in Concord, Massachusetts. Jim Vrabel is a former newspaper reporter and speechwriter. He lives with his wife and daughter in Brookline, Massachusetts.

The Aesthetics and Politics of the Crowd in American Literature Mary Esteve, 2003-02-27 Mary Esteve provides a study of crowd representations in American literature from the antebellum era to the early twentieth century. As a central icon of political and cultural democracy, the crowd occupies a prominent place in the American literary and cultural landscape. Esteve examines a range of writing by Poe, Hawthorne, Lydia Maria Child, Du Bois, James, and Stephen Crane among others. These writers, she argues, distinguish between the aesthetics of immersion in a crowd and the mode of collectivity demanded of political-liberal subjects. In their representations of everyday crowds, ranging from streams of urban pedestrians to swarms of train travellers, from upper-class parties to lower-class revivalist meetings, such authors seize on the political problems facing a mass liberal democracy - problems such as the stipulations of citizenship, nation formation, mass immigration and the emergence of mass media. Esteve examines both the aesthetic and political meanings of such urban crowd scenes.

Crowd psychology. Philosophical and Literary Works. Illustrated Edition Jean-Jacques Rousseau, Gustave Le Bon, Sigmund Freud, Charles Mackay, Wilfred Trotter, Everett Dean Martin, 2023-10-24 **Crowd Psychology: Philosophical and Literary Works - Illustrated Edition** is a comprehensive collection that delves into the intricate dynamics of human behavior and group psychology. This anthology assembles influential philosophical and literary works that explore the collective consciousness of crowds, their impact on society, and

the power of the masses. Included in this edition are *The Social Contract* by Jean-Jacques Rousseau, *The Crowd: A Study of the Popular Mind* by Gustave Le Bon, *Group Psychology and The Analysis of the Ego* by Sigmund Freud, and *Extraordinary Popular Delusions and the Madness of Crowds* by Charles Mackay. In *The Social Contract*, Rousseau contemplates the nature of legitimate authority and the social contract that binds individuals into a collective body. His ideas on governance and the relationship between the individual and the state remain influential in political philosophy. Gustave Le Bon's *The Crowd* is a pioneering study of how crowds can exhibit unique behaviors and characteristics that differ from those of individuals. Le Bon's exploration of the psychology of crowds offers profound insights into their influence on culture, politics, and decision-making. Sigmund Freud's *Group Psychology and The Analysis of the Ego* delves into the dynamics of group behavior and the impact of group dynamics on the individual psyche. Freud's work explores the way in which individuals function within a collective and the subconscious forces at play. *Extraordinary Popular Delusions and the Madness of Crowds* by Charles Mackay is a fascinating study of historical examples of mass hysteria, speculative bubbles, and popular delusions. Mackay's work serves as a cautionary exploration of the irrational tendencies that can grip large groups of people. Crowd Dynamics, Volume 3 Nicola Bellomo, Livio Gibelli, 2022-02-28 This contributed volume explores innovative research in the modeling, simulation, and control of crowd dynamics. Chapter authors approach the topic from the perspectives of mathematics, physics, engineering, and psychology, providing a comprehensive overview of the work carried out in this challenging interdisciplinary research field. In light of the recent COVID-19 pandemic, special consideration is given to applications of crowd dynamics to the prevention of the spreading of contagious diseases. Some of the specific topics covered in this volume include: - Impact of physical distancing on the evacuation of crowds- Generalized solutions of opinion dynamics models- Crowd dynamics coupled with models for infectious disease spreading- Optimized strategies for leaders in controlling the dynamics of a crowd *Crowd Dynamics, Volume 3* is ideal for mathematicians, engineers, physicists, and other researchers working in the rapidly growing field of modeling and simulation of human crowds.
