Sebastian Brünink

Agent, Action, and Reason Robert W. Binkley, R.N. Brounagh, Ausonio Marras, 1971-12-15 This volume contains the papers and commentaries presented at the fourth philosophy colloquium at the University of Western Ontario in November 1968. The papers examine, from different points of view, the central problems in the philosophy of action. They include: "Agency" by Donald Davidson with comments by James Cornman; "On the Logic on International Action" by Roderick Chisholm with comments by Bruce Aune and a reply by Roderick Chisholm; "Wanting: Some Pitfalls" by R.M. Hare with comments by David Gauthier and D.F. Pears; "Two Problems about Reasons for Actions" by D.F. Pears with comments by Irving Thalberg. Also included is an extensive bibliography of recent work in the philosophy of action. The contributors are all well known for their work in this branch of philosophy; their papers present a cross section of the best work being done in the area at the present time.

Black Women, Agency, and the New Black Feminism Maria del Guadalupe Davidson, 2017-02-17 The powerful Beyoncé, formidable Rihanna, and the incalculable Nikki Minaj. Their images lead one to wonder: are they a new incarnation of black feminism and black women's agency, or are they only pure fantasy in which, instead of having agency, they are in fact the products of the forces of patriarchy and commercialism? More broadly, one can ask whether black women in general are only being led to believe that they have power but are really being drawn back into more complicated systems of exploitation and oppression. Or, are black women subverting patriarchy by challenging notions of their subordinate and exploitable sexuality? In other words, 'who is playing who'? *Black Women, Agency, and the New Black Feminism* identifies a generational divide between traditional black feminists and younger black women. While traditional black feminists may see, for example, sexualized images of black women negatively and as an impediment to progress, younger black women tend to embrace these new images and see them in a positive light. After carefully setting up this divide, this enlightening book will suggest that a more complex understanding of black feminist agency needs to be developed, one that is adapted to the complexities faced by the younger generation in today's world. Arguing the concept of agency as an important theme for black feminism, this innovative title will appeal to scholars, teachers, and students interested in black feminist and feminist philosophy, identity construction, subjectivity and agency, race, gender, and class.

Leading Medicaid Managed Care Plans Arlene Davidson, 2017-10-19 *Leading Medicaid Managed Care Plans* examines leadership actions necessary to successfully operate a Medicaid managed care plan with emphasis on the relationship with the state Medicaid agency the health plan is contracted with. With appropriate operational and governance oversight, and with solid mutually respectful relationships with the state agency, Medicaid health plans are more likely to sustain success and prosperity for the long term. The approach of *Leading Medicaid Managed Care Plans* builds on key infrastructure elements that need to be in place when contracting with a state agency, and for overall success of the organization. It takes a pragmatic and methodical approach, interspersed with real-life examples of what to do for success and what actions to avoid that frequently lead to failure. This approach is different from most managed care books (Medicaid or otherwise) as those mostly focus on the process of the business (such as details around claims payment, or provider contracting) and ignore the role of the state Medicaid agency and its importance in retaining the contractual relationship. This book differs also on its emphasis on organizational foundational elements and strategic leadership skills necessary to sustain success. The author has years of experience in turning around failing Medicaid managed care plans and observing what they all had in common that contributed to those failures. One common feature was the deterioration of the relationship with the state Medicaid agency they were contracted with, and how close they all came to losing their multi-million dollar businesses. The purpose of this book is to educate and inspire managed care executives and senior leaders who operate Medicaid health plans and to help them understand what elements are needed for successful health plans and a sustainable relationship with the people directing the state Medicaid agency.

Donald Davidson on Action, Mind and Value Syraya Chin-Mu Yang, Robert H. Myers, 2020-09-28 This book brings together a wide range of innovative reflections on the pivotal role that Davidson's concept of agency plays in his later philosophy and its impact on his epistemology, his philosophy of language and mind, and his philosophy of values. The authors critically assess central elements of Davidson's program and offer reappraisals of his seminal contributions to, and his continuing influence on, the development of contemporary philosophy. By focusing on agency, the book reveals Davidson's views to have been more dynamic and less reductive than previously acknowledged – pointing toward important new possibilities not only in the theory of knowledge, but also in the philosophy of mind. It is a valuable resource both for experts on Davidson's philosophy and for those interested in central topics in the theory of action, the philosophy of mind and language, epistemology, moral philosophy, and the philosophy of values. It is also of interest to researchers in adjoining disciplines, such as cognitive science, linguistics, and psychology.

From Individual to Plural Agency Kirk Ludwig, 2016 Kirk Ludwig develops a novel reductive account of plural discourse about collective action and shared intention. He argues that collective action is a matter of there being multiple agents of an event and requires no group agents, while shared intentions are distributions of intentions across members of the group.

From Plural to Institutional Agency Kirk Ludwig, 2017 Kirk Ludwig presents a philosophical account of institutional action, such as action by corporations and nation states, arguing that it can be understood exhaustively in terms of the agency of individuals and concepts constructed out of

materials that are already at play in our understanding of individual action. He thus argues for a strong form of methodological individualism. The book provides a new account of the logical form of grammatically singular group action sentences (e.g. 'Company laid off 10,000 workers'), and features new analyses of the concepts of a constitutive rule, status function, status role, collective acceptance, and proxy agency. He also provides an analysis of the structure of corporate action, including the status of corporations as legal persons, and of the nature of state action in relation to its citizens. This is the companion volume to *From Individual to Plural Agency* (OUP 2016), extending the multiple-agents account of collective action set out in the earlier volume.

Autonomous Agents Alfred R. Mele, 1995-08-03 This book addresses two related topics: self-control and individual autonomy. In approaching these issues, Mele develops a conception of an ideally self-controlled person, and argues that even such a person can fall short of personal autonomy. He then examines what needs to be added to such a person to yield an autonomous agent and develops two overlapping answers: one for compatibilist believers in human autonomy and one for incompatibilists. While remaining neutral between those who hold that autonomy is compatible with determinism and those who deny this, Mele shows that belief that there are autonomous agents is better grounded than belief that there are not.

Donald Davidson Ernie Lepore, Kirk Ludwig, 2005-03-03 Donald Davidson (1917-2003) was one of the most important philosophers of the late twentieth century. His work on language and the theory of meaning has been particularly influential. Two of the world's leading authorities on Davidson's philosophy, Ernest Lepore and Kirk Ludwig, provide a systematic exposition of his work in this field and of his contributions to philosophy of mind, metaphysics, and epistemology which spring from it. Their second aim is to assess Davidson's program critically, to mark its successes, but also to identify where its accomplishments fall short of its ambitions, and, since it is an on-going research program, to assess its prospects for the future, and to contribute to the expansion of that program. Criticizing and extending Davidson's thought, as well as providing an introduction to it, Lepore and Ludwig address a broad academic audience. Their work will be of fundamental importance for those who are coming to Davidson's work for the first time; while some philosophical sophistication and training is presupposed, it is accessible both to advanced undergraduates and to graduate students. It will also be welcomed by professional philosophers, linguists, and anyone wishing to assess and understand Davidson's remarkable intellectual legacy.

Action and Existence J. Swindal, 2011-11-08 Since the pioneering work of Donald Davidson on action, many philosophers have taken critical stances on his causal account. This book criticizes Davidson's event-causal view of action, and offers instead an agent causal view both to describe what an action is and to set a framework for how actions are explained.

Shared and Institutional Agency Michael Bratman, 2022 A fundamental feature of our individual, human agency is its organization over time. Think again about growing food in a garden, or taking a trip, or writing a book. A central idea is that our capacity for planning agency is at the heart of this cross-temporal organization of our individual, human agency. Appeal to this role of our capacity for planning agency both fits our commonsense self-understanding and, I conjecture, would be a part of an empirically informed psychological theory that begins with-- but potentially adjusts--this commonsense self-understanding. The basic thought is that we are resource-limited agents who achieve cross-temporal organization in part by settling in advance on prior, partial plans. These somewhat stable partial plans help pose problems of means and preliminary steps, and in pursuit of needed

coordination help filter potential options. They thereby provide a background framework for downstream thought and action--

Public Acts of the State of Tennessee Tennessee, 1915

Agency and Responsibility Jeanette Kennett, 2001-01-04 Is it ever possible for people to act freely and intentionally against their better judgement? Is it ever possible to act in opposition to one's strongest desire? If either of these questions are answered in the negative, the common-sense distinctions between recklessness, weakness of will and compulsion collapse. This would threaten our ordinary notion of self-control and undermine our practice of holding each other responsible for moral failure. So a clear and plausible account of how weakness of will and self-control are possible is of great practical significance. Taking the problem of weakness of will as her starting point, Jeanette Kennett builds an admirably comprehensive and integrated account of moral agency which gives a central place to the capacity for self-control. Her account of the exercise and limits of self-control vindicates the common-sense distinction between weakness of will and compulsion and so underwrites our ordinary allocations of moral responsibility. She addresses with clarity and insight a range of important topics in moral psychology, such as the nature of valuing and desiring, conceptions of virtue, moral conflict, and the varieties of recklessness (here characterised as culpable bad judgement) - and does so in terms which make their relations to each other and to the challenges of real life obvious. *Agency and Responsibility* concludes by testing the accounts developed of self-control, moral failure, and moral responsibility against the hard cases provided by acts of extreme evil.
