Users are increasingly using these devices for activities beyond simple communication including gaming and e-commerce and to access confidential information including banking accounts and medical records. While mobile devices are being so widely used and accepted in daily life, and subsequently housing more and more personal data, it is evident that the security of these devices is paramount. A Deal with the Devil Blake Ellis, Melanie Hicken, 2020-07-21 “A personal how-to guide for investigative journalists, a twisted tale of a scam of huge proportions, and a really good read” (Bethany McLean, author of The Smartest Guys in the Room), this spellbinding true story follows a pair of award-winning CNN investigative journalists as they track down the mysterious psychic at the center of an international scam that stole tens of millions of dollars from the elderly and emotionally vulnerable. While investigating financial crimes for CNN Money, Blake Ellis and Melanie Hicken were intrigued by reports that elderly Americans were giving away thousands of dollars to mail-in schemes. With a little digging, they soon discovered a shocking true story. Victims received personalized letters from a woman who, claiming amazing psychic powers, convinced them to send money in return for riches, good health, and good fortune. The predatory scam had been going on unabated for decades, raking in more than \$200 million in the United States and Canada alone—with investigators from all over the world unable to stop it. And at the center of it all—an elusive French psychic named Maria Duval. Based on the five-part series that originally appeared on CNN’s website in 2016 and was seen by more than three million people, A Deal with the Devil picks up where the series left off as Ellis and Hicken reveal more bizarre characters, follow new leads, close in on Maria Duval, and connect the dots in an edge-of-your-seat journey across the US to England and France. A Deal with the Devil is a fascinating, thrilling search for the truth that will suck you “deep into the heart of a labyrinthine investigation that raises bigger questions about greed, manipulation, and the desperate hunger to believe” (Megan Abbott, author of You Will Know Me).

Good-Vs-Evil Anastacia Burrell, 2018-12-29 God is there to save you from harm. The devil can’t take no more then you can’t ever have in life on what you can have is yours in life who stands by the great waterfalls of life stands for ups and downs everything is meant for a reason because you wonder why your life is so block from others because something maybe missing in order to put common sense together which was unsaid and done that needs to be done. so you cherish the memory of that day of your life every stone you can ever take and every breath in your body, give it to god and glory and take a deep breath and praise God. Trials must be mistaken because whatever you do or whatever you did, it must be something or what you did needs to be fixed and prepared of a dislike compare to or a distance. A distance is a challenge, of course, or a state of mind. What people do for a living is the unit of life. It’s the bad things that you do that makes trials go wrong and bad rather then right. One way it is

or another, and one way it doesn't. What you do or what you don't do, you pick up the pieces of the puzzles and get it right on time, on the dot and line, and you take a piece of the pie—what you like and dislike and show and prove the way you want it. You talk about the good old times, and sometimes, it's about the wrong times of your life and the things you did in the past, whether it be good or bad in your wildest dream life. You take that and swipe your shoulders off. The greater it is, the badder it maybe. It can be fixable that same day or a couple of days a head. Trouble don't last always and not for long. That's how it works and what should be done, and you take it and fix everything that has been broken. You stand forward to that and be strong and have strength, and whatever that needs to be done and whatever that it is you can't do, you don't have to do it or put up with it. Be yourself and do all that you can do as possible, and that's all you can do. You cannot please everyone because it's gonna have a passing moment when you can do something or not and you will be tired of it. It also includes fatal attraction, breaking relationships, tragedies, boo thangs, lover and friends, blessings, curses, magic spells, cast of spells, Buddhism, voodoo, and many more.

E-mail In An Instant Karen Leland, Keith Bailey, 2009-02-01 The In An Instant series is a new brand of user-friendly, engaging, and practical reference guides on core business topics, which capitalizes on the authors' extensive experience and knowledge, as well as interviews they have conducted with leading business experts. Written in an upbeat and engaging style, the series presents 60 tips and techniques with anecdotes, examples, and exercises that the reader can immediately apply to make their work life more efficient, effective, and satisfying. Surveys show that people in corporations receive an average of 175 messages per day. Topping the list is e-mail, surpassing voice mail, faxes, and telephone messages as the most frequent type of message received. While e-mail is the biggest communication tool for business use, its remote nature—which eliminates tone of voice and body language—presents a huge potential for misunderstanding and misinterpretation. Many people find themselves dealing with dozens of e-mails every day whose impact has been lost in cyberspace and, as a result, frequently miss the mark. E-mail In An Instant helps readers to gain mastery over their electronic mail box and be more effective at getting their messages across with style and impact as well as managing and responding to the messages they receive. The book shows everyone from corporate executives to stay-at-home moms how to improve their e-mail efficiency by: Accelerating your workday by knowing what to send and what not to Assessing your e-mail writing style Adopting time management for your mailbox Learning to separate the trivial from the important Learning how to say no, e-mail style Writing business e-mails for other cultures

Evil Robots, Killer Computers, and Other Myths Steven Shwartz, 2021-02-09 Are AI robots and computers really going to take over the world? Longtime artificial intelligence (AI) researcher and investor Steve Shwartz has grown frustrated with the fear-inducing hype around AI in popular culture and media. Yes, today's AI systems are miracles of modern engineering, but no, humans do not have to fear robots seizing control or taking over all our jobs. In this exploration of the fascinating and ever-changing landscape of artificial intelligence, Dr. Shwartz explains how AI works in simple terms. After reading this captivating book, you will understand • the inner workings of today's amazing AI technologies, including facial recognition, self-driving cars, machine translation, chatbots, deepfakes, and many others; • why today's artificial intelligence technology cannot evolve into the AI of science fiction lore; • the crucial areas where we will need to adopt new laws and policies in order to counter threats to our safety and personal freedoms resulting from the use of AI. So although we don't have to worry about evil robots rising to power and turning us into pets—and we probably never will—artificial intelligence is here to stay, and we must learn to separate fact from fiction and embrace how this amazing technology enhances our world.

Phishing Rachael Lininger, Russell Dean Vines, 2005-05-06 Phishing is the hot new identity theft scam. An unsuspecting victim receives an e-mail that seems to come from a bank or other financial institution, and it contains a link to a Web site where s/he is asked to provide account details. The site looks legitimate, and 3 to 5 percent of people who receive the e-mail go on to surrender their information--to crooks. One e-mail monitoring organization reported 2.3 billion phishing messages in February 2004 alone. If that weren't enough, the crooks have expanded their operations to include malicious code that steals identity information without the computer user's knowledge. Thousands of computers are compromised each day, and phishing code is increasingly becoming part of the standard exploits. Written by a phishing security expert at a top financial institution, this unique book helps IT professionals respond to phishing incidents. After describing in detail what goes into phishing expeditions, the author provides step-by-step directions for discouraging attacks and responding to those that have already happened. In Phishing, Rachael Lininger: Offers case studies that reveal the technical ins and outs of impressive phishing attacks. Presents a step-by-step model for phishing prevention. Explains how intrusion detection systems can help prevent phishers from attaining their goal--identity theft. Delivers in-depth incident response techniques that can quickly shutdown phishing sites.
