Sustainable Development in Organizations Mattias Elg, Per-Erik Ellström, Magnus Klofsten, Malin Tillmar, 2015-11-27 An increasingly competitive environment can lead to considerable problems for many organizations as they struggle to adapt to change. As a result, they fail to create the conditions that can lead to sustainable development over the long term, thus affecting the capabilities of employees. This book provides a fresh perspective on sustainable change and development in organizations, as well as a critical perspective on lean implementation, work environment and sustainability. The expert contributors address the development in, and of, organizations, as well as the development process between organizations, such as in networks or clusters. They discuss topics, such as the role of customers in the development of public organizations; developing knowledgeable practice at work; exploring evidence-based practice and the challenge of regional gender contracts. Undergraduates and postgraduates in different management fields including organizational theory, innovation, human resources, quality development

and entrepreneurship will find this book to be of interest. The empirical results and interdisciplinary approach will appeal to practitioners and policy-makers at national, as well as international levels.

Smart Specialisation Dominique Foray, 2014-08-13 This is the first book on a new policy approach that has been widely adopted in Europe and beyond. It analyses the concept of smart specialisation and discuss the need for smart specialisation strategies, explains why the approach is new and different from more standard policy processes and explores what are the conditions for successful implementation. Smart Specialisation: Opportunities and Challenges for Regional Innovation Policy describes the origin of the concept, explains when a smart specialisation policy is necessary, provides a detailed analysis of the design principles of the policy and discuss the pertinence of this approach according to regional development levels. Finally the book discuss the practical implementation phase of the process – based on the first feedback acquired from certain regions engaged in the preparation of their smart specialisation strategy. The book is original in that it provides the first full analysis of smart specialisation strategies both at theoretical and practical levels. It has been written at the critical period of the implementation of smart specialisation strategies in every region in Europe. The fact that the EU has adopted smart specialisation as a mandatory principle for every region and member states will make this book well received by and very useful for: i) policy makers in regional and national administrations in Europe, ii) policy makers in other parts of the world who are in charge of regional policy and have heard about the concept, iii) consultants, analysts and experts who are active on the markets for smart specialisation diagnosis and expertise, iv) scholars, researchers and graduate students working in the field of regional studies, technology policy and geography of innovation.

Large Scale Renewable Power Generation Jahangir Hossain, Apel Mahmud, 2014-01-28 This book focuses on the issues of integrating large-scale renewable power generation into existing grids. The issues covered in this book include different types of renewable power generation along with their transmission and distribution, storage and protection. It also contains the development of medium voltage converters for step-up-transformer-less direct grid integration of renewable generation units, grid codes and resiliency analysis for large-scale renewable power generation, active power and frequency control and HVDC transmission. The emerging SMES technology for controlling and integrating large-scale renewable power systems is also discussed. Since the protection issues with large-scale distributed renewable power systems are different compared to the existing protection system for one way power flow, this book includes a new protection technique for renewable generators along with the inclusion of current status of smart grid. This book is a good reference for the researchers who are working the area of renewable power generation and smart grids.

World Energy Outlook 2017 Agence internationale de l'énergie, International Energy Agency, 2018-01-19 The global energy scene is in a state of flux. Large-scale shifts include: the rapid deployment and steep declines in the costs of major renewable energy technologies; the growing importance of electricity in energy use across the globe; profound changes in China's economy and energy policy, moving consumption away from coal; and the continued surge in shale gas and tight oil production in the United States. These changes provide the backdrop for the World Energy Outlook-2017, which includes a full update of energy demand and supply projections to 2040 based on different scenarios. The projections are accompanied by detailed analyses of their impact on energy industries and investment, as well as implications for energy security and the environment. The report this year includes a focus on China, which examines how China's choices could reshape the global outlook for all fuels and technologies. A second focus, on natural gas, explores how the rise of shale gas and LNG are changing the global gas market as well as the

opportunities and risks for gas in the transition to a cleaner energy system. Finally, the WEO-2017 introduces a major new scenario - the Sustainable Development Scenario - that outlines an integrated approach to achieving internationally agreed objectives on climate change, air quality and universal access to modern energy.

The Control of Candy Jones Donald Bain, 1976-12-15 Candy Jones was the stage name of Jessica Wilcox (b. 1921) who became famous as a model and pinup girl in the early 1940s. Her story seems too bizarre to be true. One of America's most famous models, brainwashed by the CIA? Yes, it is another example of truth being stranger than fiction. The story begins with Candy's wedding to Long John Nebel, New York's most successful radio talk-show host. During the wedding, and regularly thereafter, Candy's personality would seem to shift. She would suddenly change from her affable, self-effacing self to a brusque, aggressive stranger. For the first few months of the marriage, these shifts were infrequent enough that Nebel didn't worry much about it, but as time went on, they got worse. Nebel began trying to relax his wife by hypnotizing her. Although Candy insisted that she couldn't be hypnotized, she slipped easily into a relaxed state, and then into a healthy, deep sleep. But during the third session, with no suggestion from Nebel, Candy spontaneously regressed to a young age. After that, Nebel began to record their sessions. The result of these sessions was that Nebel discovered his wife had been brainwashed into having a second identity, Arlene, whom a CIA doctor had used to carry messages all over the world. Eventually, Candy was tortured at CIA headquarters, so that her doctor could display her successful programming. *The Control of Candy Jones* sent shockwaves through the corridors of power when it was first published in 1976. After reportedly being suppressed by the CIA, it became an instant classic, and remains so today.
