The Warmth of Other Suns Isabel Wilkerson, 2011-10-04 NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • NEW YORK TIMES BESTSELLER • In this beautifully written masterwork, the Pulitzer Prize-winner and bestselling author of *Caste* chronicles one of the great untold stories of American history: the decades-long migration of black citizens who fled the South for northern and western cities, in search of a better life. From 1915 to 1970, this exodus of almost six million people changed the face of America. Wilkerson compares this epic migration to the migrations of other peoples in history. She interviewed more than a thousand people, and gained access to new data and official records, to write this definitive and vividly dramatic account of how these American journeys unfolded, altering our cities, our country, and ourselves. With stunning historical detail, Wilkerson tells this story through the lives of three unique individuals: Ida Mae Gladney, who in 1937 left sharecropping and prejudice in Mississippi for Chicago, where she achieved quiet blue-collar success and, in old age, voted for Barack Obama when he ran for an Illinois Senate seat; sharp and quick-tempered George Starling, who in 1945 fled Florida for Harlem, where he endangered his job fighting for civil rights, saw his family fall, and finally found peace in God; and Robert Foster, who left Louisiana in 1953 to pursue a medical career, the personal physician to Ray Charles as part of a glitteringly successful medical career, which allowed him to purchase a grand home where he often threw exuberant parties.

Wilkerson brilliantly captures their first treacherous and exhausting cross-country trips by car and train and their new lives in colonies that grew into ghettos, as well as how they changed these cities with southern food, faith, and culture and improved them with discipline, drive, and hard work. Both a riveting microcosm and a major assessment, *The Warmth of Other Suns* is a bold, remarkable, and riveting work, a superb account of an “unrecognized immigration” within our own land. Through the breadth of its narrative, the beauty of the writing, the depth of its research, and the fullness of the people and lives portrayed herein, this book is destined to become a classic.

Environmental Cost and Face of Agriculture in the Gulf Cooperation Council Countries Shabbir A. Shahid, Mushtaque Ahmed, 2014-07-06 This volume presents the outcome of an Agriculture Workshop organized by the Gulf Research Centre Cambridge (GRCC) and held at Cambridge University, UK during the Gulf Research Meeting 11-14 July 2012. Co-directed by the editors, the workshop, entitled “Environmental Cost and Changing Face of Agriculture in the Gulf States” was attended by participants from Australia, Bahrain, India, Kuwait, Oman, Saudi Arabia, Turkey, UAE, UK and Morocco. These scientists, educators, researchers, policy makers and managers share their experience in agriculture in the Gulf States, with the aim of helping to improve agriculture production

and thus bridge the gap between local production and the food import. The papers gathered here were presented at the workshop and have all passed through rigorous peer review by renowned scientists. The diverse papers present various aspects of agriculture production in the evolving face of climate change and dwindling water resources in the region. The book covers topics such as the prospects of agriculture in a changing climate; the potential of climate-smart agriculture; the impact of food prices, income and income distribution on food security; improved efficiency in water use; challenges in using treated wastewater in agriculture; investment in foreign agriculture and agricultural research and development. The papers span the nations of the Gulf Cooperation Council, with specific case studies set in Oman, Bahrain and Kuwait.

Sweat the Technique Rakim, 2019-09-24 On the heels of Kendrick Lamar's Pulitzer Prize, as the world begins to recognize the creative side of Hip-Hop, comes a writing guide from a musician and The greatest MC of all time, Rakim. The musician and Hip Hop legend—hailed as “the greatest MC of all time” and compared to Thelonious Monk—reimagines the writing handbook in this memoir and guide that incorporates the soulful genius, confidence, and creativity of a master artist. When he exploded on the music scene, musical

genius Rakim was hailed for his brilliant artistic style, adding layers, complexity, depth, musicality, and soul to rap. More than anyone, Rakim has changed the way MCs rhyme. Calm on the mic, his words combine in a frenzy of sound, using complicated patterns based on multisyllabic rhymes and internal rhythms. Rakim can tell a story about a down-on-his-luck man looking for a job and turn it into an epic tale and an unforgettable rhyme. He is not just a great songwriter—he's a great modern writer. Part memoir, part writing guide, *Sweat the Technique* offers insight into how Rakim thinks about words, music, writing, and rhyming as it teaches writers of all levels how to hone their craft. It is also a rare glimpse into Rakim's private life, full of entertaining personal stories from his youth on Long Island growing up in a home and community filled with musicians to the clubs of New York and the studios of Los Angeles during his rise to the top of popular music. Rakim celebrates the influences that shaped his development, including the jazz music of John Coltrane and the spirituality of the streets, and shares anecdotes spotlighting personalities such as L. L. Cool J. and Dr. Dre, among others. Filled with valuable lessons for every writer, *Sweat the Technique* reveals the heart and mind of an artist and his love for great storytelling, and always, the words.

Fair Trade Rebels Lindsay Naylor, 2019 *Fair Trade Rebels* is based on extensive fieldwork among rural coffee and corn farmers in Chiapas, Mexico. Examining these farmers' everyday experiences of resistance and daily

practice as they seek to address inequalities locally in what is really a global corporate agricultural chain, Naylor is interested in how these fair trade struggles are part of broader efforts on the part of local agricultural actors to create dignified livelihoods--

Broadcast Hysteria A. Brad Schwartz, 2015-05-05 On the evening of October 30, 1938, radio listeners across the United States heard a startling report of a meteor strike in the New Jersey countryside. With sirens blaring in the background, announcers in the field described mysterious creatures, terrifying war machines, and thick clouds of poison gas moving toward New York City. As the invading force approached Manhattan, some listeners sat transfixed, while others ran to alert neighbors or to call the police. Some even fled their homes. But the hair-raising broadcast was not a real news bulletin-it was Orson Welles's adaptation of the H. G. Wells classic *The War of the Worlds*. In *Broadcast Hysteria*, A. Brad Schwartz boldly retells the story of Welles's famed radio play and its impact. Did it really spawn a wave of mass hysteria, as *The New York Times* reported? Schwartz is the first to examine the hundreds of letters sent to Orson Welles himself in the days after the broadcast, and his findings challenge the conventional wisdom. Few listeners believed an actual attack was under way. But even so, Schwartz shows that Welles's broadcast became a major scandal, prompting a different kind of mass panic as Americans debated the bewitching power of the radio and the country's vulnerability in a time of crisis. When the debate was over,

American broadcasting had changed for good, but not for the better. As Schwartz tells this story, we observe how an atmosphere of natural disaster and impending war permitted broadcasters to create shared live national experiences for the first time. We follow Orson Welles's rise to fame and watch his manic energy and artistic genius at work in the play's hurried yet innovative production. And we trace the present-day popularity of fake news back to its source in Welles's show and its many imitators. Schwartz's original research, gifted storytelling, and thoughtful analysis make Broadcast Hysteria a groundbreaking new look at a crucial but little-understood episode in American history.

Satellite Remote Sensing of Terrestrial Hydrology Christopher Ndehedehe,2022-07-15 This book highlights several opportunities that exist in satellite remote sensing of large-scale terrestrial hydrology. It lays bare the novel concept of remote sensing hydrology and demonstrates key applications of advance satellite technology and new methods in advancing our fundamental understanding of environmental systems. This includes, using state-of-the-art satellite hydrology missions like the Gravity Recovery and Climate Experiment and other multi-mission satellite systems as important tools that underpin water resources planning and accounting. This book discusses and demonstrates how the efficacy, simplicity, and sophistication in novel computing platforms for big earth observation data can help facilitate environmental monitoring and improve contemporary understanding of climate change impacts on freshwater resources. It also provides opportunities for practitioners and relevant government agencies to leverage satellite-based information in a transdisciplinary context to address several environmental issues affecting society. This book provides a general framework and highlights methods to help improve our understanding of

hydrological processes and impact analysis from extreme events (e.g., droughts, floods) and climate change.

Raising Our Hands Jenna Arnold, 2020-06-16 White women are one of the most influential demographics in America—we are the largest voting bloc, with purchasing power that exceeds anybody else's, and when we unify to demand change, we are a force to be reckoned with. Yet, so many of us sit idly on the sidelines, opting out of raising our hands to do, learn, and engage in ways that could make a difference. Why? White American women are no monolith. Yet, as Women's March national organizer Jenna Arnold has learned over the past few years criss-crossing the US in conversations with white women about their identity and role in the country, we do possess common characteristics—ones that get in the way of us becoming more engaged as citizens. We're so focused on checking off our to-do lists, or so afraid of getting it wrong, or so busy trying to avoid conflict, that we are actively avoiding the urgent conversations we need to have. We are confused about how we got here and unsure how to do better. *Raising Our Hands* is the reckoning cry for white women. It asks us to step up and join the new frontlines of the fight against complacency—in our homes, in our behaviors, and in our own minds. Consider *Raising Our Hands* your starting place, your Intro to Being a White Woman in Today's World freshman-year class. In these pages, Jenna peels

back the history that's been kept out of textbooks and the cultural norms that are holding us back, so we can finally start really listening to marginalized voices and doing our part to promote progress. The American white woman is a powerful force—an essential participant—to mobilize alongside the rest of humanity on behalf of the world, and we can no longer make excuses for why we don't have time or don't know enough.

Widen the Window Elizabeth A. Stanley, PhD, 2019-09-24 I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does, while offering a comprehensive approach to healing. --from the foreword by Bessel van der Kolk A pioneering researcher gives us a new understanding of stress and trauma, as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging. Trauma is our response to an experience in which we feel powerless or lacking agency. Until now, researchers have treated these conditions as different, but they actually lie along a continuum. Dr. Elizabeth Stanley explains the significance of this continuum, how it affects our resilience in the face of challenge, and why an event that's stressful for one person can be traumatizing for another. This groundbreaking book examines the cultural norms that impede resilience in America, especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover. It explains the science of how to direct our attention to perform under stress and recover from trauma. With training, we can access agency, even in extreme-stress environments. In fact, any maladaptive behavior or response conditioned through stress or trauma can, with intentionality and understanding, be reconditioned and healed. The key is to

use strategies that access not just the thinking brain but also the survival brain. By directing our attention in particular ways, we can widen the window within which our thinking brain and survival brain work together cooperatively. When we use awareness to regulate our biology this way, we can access our best, uniquely human qualities: our compassion, courage, curiosity, creativity, and connection with others. By building our resilience, we can train ourselves to make wise decisions and access choice--even during times of incredible stress, uncertainty, and change. With stories from men and women Dr. Stanley has trained in settings as varied as military bases, healthcare facilities, and Capitol Hill, as well as her own striking experiences with stress and trauma, she gives readers hands-on strategies they can use themselves, whether they want to perform under pressure or heal from traumatic experience, while at the same time pointing our understanding in a new direction.
