Forgotten British Film Philip Gillett,2017-05-11 Some films are remembered long after they are released; others are soon forgotten, but do they deserve oblivion? Are factors other than quality involved? This book exhumes some of the films released in Britain over the last seventy years from Daybreak (1948) to 16 Years of Alcohol (2003), and considers the reasons for their neglect. As well as exploring the contributions of those involved in making the films, the book examines such issues as marketing and the response of critics and audiences. Films are grouped loosely into categories such as “B” films and television films. Some works were little seen when they were first released and have stayed that way; others were popular in their day, but have slipped into obscurity. In some cases, social change has overtaken them, making the attitudes or subjects they depict seem dated. Even being released as a DVD does not guarantee that a title will be rehabilitated. In addition, how significant is the American market? This book should appeal to lovers of British film, as well as to film studies students and everybody curious about the vagaries of success and failure in the arts.

Language, Cognition and Gender Alan Garnham,Jane Oakhill,Lisa von Stockhausen,Sabine Sczesny,2016-08-08 Gender inequality remains an issue of high relevance, and controversy, in society. Previous research shows that language contributes to gender inequality in various ways: Gender-related information is transmitted through formal and semantic features of language, such as the grammatical category of gender, through gender-related connotations of role names (e.g., manager, secretary), and through customs of denoting social groups with derogatory vs. neutral names. Both as a formal system and as a means of communication, language passively reflects culture-specific social conditions. In active use it can also be used to express and, potentially, perpetuate those conditions. The questions addressed in the contributions to this Frontiers Special Topic include: • how languages shape the cognitive representations of gender • how features of languages correspond with gender equality in different societies • how language contributes to social behaviour towards the sexes • how gender equality can be promoted through strategies for gender-fair language use These questions are explored both developmentally (across the life span from childhood to old age) and in adults. The contributions present work conducted across a wide range of languages, including some studies that make cross-linguistic comparisons. Among the contributors are both cognitive and social psychologists and linguists, all with an excellent research standing. The studies employ a wide range of empirical methods: from surveys to electro-physiology. The papers in the Special Topic present a wide range of complimentary studies, which will make a substantial contribution to understanding in this important area.

British Emigration, 1603-1914 A. Murdoch, 2004-10-15 The idea of Britain has been understood largely in terms of sectarian conflict and state formation, whereas emigration has most often been explored in terms of economic and social history. This book explores the relationship between two subjects normally studied in isolation, and includes emigration from Ireland as a social phenomenon which cannot be understood in isolation from modern British History, as well as the impact of British emigration on the ethos and identity of the British Empire at its zenith at the turn of the Nineteenth and Twentieth centuries.

Ultimate Film Ryan Gilbey, 2005-10-07 One of the most revealing snapshots of British cinema-going ever produced, The Ultimate Film is the definitive list of the all-time top 100 films based on UK cinema admissions. From the 1930s to the present, the chart shows the diverse tastes that come together to make up Britain's choice of film favourites. Is Harry Potter more popular than The Lord of the Rings? How does Bond compare with Bridget Jones? The Ultimate Film has the answers taking the reader from Carry on Nurse to A Clockwork Orange, South Pacific to Star Wars and Ben Hur all the way to Doctor Zhivago. Each film is looked at in turn. What did the critics think of it when it was released and, with the benefit of hindsight, were they right? Who were the stars and who directed the action? What happened behind the scenes? What other films were being lauded at the same time? What was happening in the country and the wider world that led the film to be made, and then made it so popular? Sure to provoke debate and discussion, this fascinating and lavishly illustrated book tells us much about our shared history, culture and attitudes and will undoubtedly rekindle memories and experiences as everyone will be able to point to their personal history, interwoven with some of these films. This is the first time a list has been compiled based on the films people have most wanted to see. Some of the results will come as a surprise and the list has much to tell us about how we once were, and how cinema going has played no small part in shaping our culture and helped make us the way we are today.

Administrative Law and The Administrative Court in Wales David Gardner, 2016-09-20 As we progress into the twenty-first century, Wales is acquiring a new identity and greater legislative autonomy. The National Assembly and the Welsh Government have power to create laws specifically for Wales. In parallel, the judicial system in Wales is acquiring greater autonomy in its ability to hold the Welsh public bodies to account. This book examines the principles involved in challenging the acts and omissions of Welsh authorities through the Administrative Court in Wales. It also examines the legal provisions behind the Administrative Court, the principles of administrative law, and the procedures involved in conducting a judicial review, as well as other Administrative Court cases. Despite extensive literature on public and administrative law, none are written solely from a Welsh perspective: this book examines the ability of the Welsh people to challenge the acts and omissions of Welsh authorities through the Administrative Court in Wales.

The Regulation of Animal Health and Welfare John McEldowney, Wyn Grant, Graham Medley, 2013-09-05 The Regulation of Animal Health and Welfare draws on the research of scientists, lawyers, economists and political scientists to address the current and future regulatory problems posed by the issues of animal health and disease. Recent events such as the outbreak of mad cow disease, epidemics of foot and mouth disease, concerns about bluetongue in sheep, and the entry into the food chain of the offspring of cloned cattle, have heightened awareness of the issues of regulation in animal disease and welfare. This book critically appraises the existing regulatory institutions and guiding principles of how best to maintain animal health in the context of social change and a developing global economy. Addressing considerations of sound science, the role of risk management, and the allocation of responsibilities, it also takes up the theoretical and practical challenges which here - and elsewhere - attend the co-operation of scientists, social scientists, lawyers and policy makers. Indeed, the collaboration of scientists and social scientists in determined and regulatory contexts such as that of animal disease is an issue of ever-increasing importance. This book will be of considerable value to those with interests in this issue, as well as those concerned with the law and policy relating to animal health and welfare.

Genealogical and Heraldic Dictionary of the Peerage and Baronetage of the British Empire , 1921 Some sections omitted from 2nd impression of the 105th ed.

Shemlan James Craig, 2016-07-27 Shemlan, a small, once unknown village in the hills overlooking Beirut, became notorious throughout the Middle East when Bertram Thomas chose it as the location for the Middle East Centre for Arab Studies (MECAS) in 1947. The knowledge that a western government was taking pains to teach its citizens Arabic and inform them of Arab history, society and religion made the Arabs suspicious. The success of MECAS in producing specialists who were the envy of other governments produced doubt and anxiety. The power of MECAS to attract British but also foreign diplomats and businessmen should have made it a profitable enterprise; instead there was constant penny-pinching and reluctance to invest. In retrospect it looks like an excellent idea developed by improvisation through its early troubles which was then allowed to die in its prime. Was it yet another example of a British invention unexploited?
