**The Mad Science Book** Reto U. Schneider, 2008 You don't have to be an eccentric obsessive to be a scientist, but it helps... In *The Mad Science Book*, Reto Schneider tells the extraordinary tales of 100 of the more unusual experiments conducted across seven centuries of science. From the attempts of the 14th-century Dominican monk Theodoric von Freiberg to discover the cause of the rainbow, to the efforts of the 20th-century psychologist Harry Harlow to be the perfect mother to a family of reluctant rhesus monkeys, these are stories that are often bizarre, sometimes mind-boggling - occasionally stomach-churning - but always diverting, informative and enlightening. Among the myriad delights on display in this cabinet of scientific curiosities are the renowned doctor from Padua who sat in a pair of scales for 30 years, recording the minutest changes in his weight; the sheep, the duck and the rooster who became the world's first air passengers; the disgusting Dr Stubbins Ffirth, who swallowed other people's vomit in an attempt to prove that yellow fever cannot be transmitted from one person to another; the hapless soldier Alexis St Martin, left with a hole in his stomach after an accident with a musket; and the ever-optimistic Charles-Édouard Brown-Séquard, who injected himself with essence of guinea pigs' testicles as an anti-ageing remedy. There is trivia here in abundance, but also quirky, but genuinely influential, science, notably Merrill Flood's and Melvin Dresher's experiments with choices of outcomes, which have been widely influential as game theory. A fizzing cocktail of fascinating science and rich entertainment, *The Mad Science Book* tells the extraordinary stories of some truly, madly, geeky people. It should be top of every self-respecting science buff's Christmas 2008 wishlist.

**The Mad Scientist Hall of Fame:** Daniel H. Wilson, Anna C. Long, Illustrated by Daniel Heard, 2012-03-01 Muwahahahaha! Dr. Frankenstein. Marie Curie. Dr. Moreau. Captain Nemo. They're the most fascinating minds of all time--and now a science guru has teamed up with an expert in human psychology to coax them out of their laboratories and onto the analyst's couch. Real and fictional, famous and infamous, crazy and just crazily driven, these brilliant men and women exhibit a list of neuroses almost as impressive as their extraordinary accomplishments. At last, you can explore their early fixations, their ambitions, their successes and failures, and the particular quirks that have granted each induction into the Mad Scientist Hall of Fame, including: • Dr. Evil: Megalomaniacal doctor with antisocial personality disorder (and pathological dislike of his own son, Scotty) • Nikola Tesla: Real-life mad scientist with obsessive compulsive disorder (and he talked to aliens) • Dr. Jekyll/Mr. Hyde: Brilliant doctor gone bad, suffering from multiple personality disorder (and a penchant for strong chemical cocktails) • Lex Luthor: Villain and supergenius with manic mood disorder (and premature baldness) Witty, illuminating, and thoroughly entertaining, this one-of-a-kind book offers irrefutable proof that success, super-intelligence, and a mantelpiece full of Nobel prizes is no guarantee of sanity. Praise for Daniel H. Wilson Daniel H. Wilson and Anna C. Long have made an exhaustive study of the evil mind. It is complete, pulls no punches, and reveals secrets that have hitherto remained hidden. It is for these reasons that I must liquidate them. Great book! --Mike Myers, aka Dr. Evil from Austin Powers Forget about John Connor--it's Daniel H. Wilson who is going to save us from the Terminators. --Forbes on How to Survive a Robot Uprising A tribute to the far-fetched ideas that often drive progress. --Erik Sofge, Popular Mechanics, for Where's My Jetpack?

**The Mad Scientist's Guide to World Domination** John Joseph Adams, 2013-02-19  
 Blockbuster anthology of original evil genius stories by bestselling authors with a maniacal  
 glint in their eye. From Victor Frankenstein to Lex Luthor, from Dr. Moreau to Dr. Doom,  
 readers have long been fascinated by insane plans for world domination and the madmen  
 who devise them. Typically, we see these villains through the eyes of good guys. This  
 anthology, *The Mad Scientist's Guide to World Domination*, however, explores the world of  
 mad scientists and evil geniuses—from their own wonderfully twisted point of view. An all-  
 star roster of bestselling authors—including Diana Gabaldon, Daniel Wilson, Austin  
 Grossman, Naomi Novik, and Seanan McGuire...twenty-two great storytellers all  
 told—have produced a fabulous assortment of stories guaranteed to provide readers with  
 hour after hour of high-octane entertainment born of the most megalomaniacal mayhem  
 imaginable. Everybody loves villains. They're bad; they always stir the pot; they're much  
 more fun than the good guys, even if we want to see the good guys win. Their fiendish  
 schemes, maniacal laughter, and limitless ambition are legendary, but what lies behind  
 those crazy eyes and wicked grins? How—and why—do they commit these nefarious  
 deeds? And why are they so set on taking over the world? If you've ever asked yourself any  
 of these questions, you're in luck: It's finally time for the madmen's side of the story. At  
 the Publisher's request, this title is being sold without Digital Rights Management  
 Software (DRM) applied.

The Mad Scientist Raymond McDonald (pseud. of Edward Richard McDonald, 1873-  
 and Raymond Alfred Leger), 1908

**They Called Me Mad** John Monahan, 2010-12-07 Discover the true genius behind  
 history's greatest madmen. From Dr. Frankenstein to Dr. Jekyll, the image of the mad  
 scientist surrounded by glass vials, copper coils, and electrical apparatus remains a  
 popular fixture. In films and fiction, he's comically misguided, tragically misunderstood, or  
 pathologically evil. But the origins of this stereotype can be found in the sometimes-

eccentric real life men and women who challenged our view of the world and broke new scientific frontiers. They Called Me Mad recounts the amazing true stories of such historical luminaries as Archimedes, the calculator of pi and creator of the world's first death ray; Isaac Newton, the world's first great scientist and the last great alchemist; Nikola Tesla, who built the precursors of robots, fluorescent lighting, and particle beam weapons before the turn of the twentieth century-and more.

Mad Scientist Academy: The Space Disaster Matthew McElligott, 2017-07-11 Fans of Ada Twist, Scientist, will want to join Dr. Cosmic's class of clever monsters as they tackle gravity, comets, and many moons in the third book of the Mad Scientist Academy series. When Dr. Cosmic's class meets Commander Nova, the school astronomer, they know their next lesson will be out of this world! With the help of Dr. Cosmic's latest invention—a planetarium—the class must complete four challenges. Each time the planetarium shifts and the atmosphere changes, the students find themselves floating from planet to planet. They put their new magnetic antigravity belts and trusted handbooks to the test to figure out where in the solar system Dr. Cosmic's invention has “sent” them—and how to land safely back on Earth. Don't Miss Mad Scientist Academy: The Ocean Disaster! **The Mad Scientist's Guide to Composition - MLA 2021 Update** Jeffrey Andrew Weinstock, 2023-08-15 Considering the composition classroom as a mad scientist's laboratory, *The Mad Scientist's Guide to Composition* introduces different kinds of writing as experiments. Writing an essay is a task that can strike fear into a student's heart, but performing an experiment licenses creativity and doesn't presume that one knows the outcome from the start. *The Mad Scientist's Guide* covers the kinds of writing most often required on college campuses, while also addressing important steps and activities frequently overlooked in composition guides, such as revision and peer reviewing. Actual examples of student writing are included throughout, as are helpful reminders and tips to help students polish their skills. Above all, the *Mad Scientist's Guide* seeks to make writing fun.

*The Weather Disaster* Matthew McElligott, 2016 Dr. Cosmic's class of clever monsters must face down snow, floods, and a dangerous thunderstorm as freak weather conditions threaten the school.

The Mad Scientist of the West J.R. Roberts , A VOLATILE STATE OF AFFAIRS When Clint Adams receives a summons to appear before Grover Cleveland, he makes his way to Washington posthaste. After all, the Gunsmith is a man loyal to his leader and his country. At the White House, the president asks Clint to take on a job: bodyguard for famed scientist Nikola Tesla. Tesla's revolutionary research in electricity has caused some to call him a mad scientist, and it seems someone wants to put an end to his experiments. Clint heads to Colorado to meet up with Tesla, but it soon becomes clear that keeping the eccentric scientist out of trouble will be no easier than harnessing a bolt of lightning...

*Lunch Walks Among Us* Jim Benton, 2013-04-30 Franny K. Stein is not your average girl—she's a mad scientist. She prefers poison ivy to daisies, and when Franny jumps rope, she uses her pet snake. The kids in Franny's class think she's weird, wacky, and just plain creepy. Tired of being stared at, Franny decides to attempt her most dangerous experiment yet—she's going to fit in. But when a giant Monstrous Fiend attacks the class, everyone knows only a true mad scientist can save the day. But has Franny lost her creepy, crawly ways?

*Theo Gray's Mad Science* Theodore W. Gray, 2013 *The Skipper & Her Mate* is a book about the people, boats and wildlife on the Irish waterways. Told from the perspective of a woman with only a week's hire-boat experience learning to skipper a vintage timber cruiser, it is a journey through rivers and canals, and an apprenticeship in the ways of boating among a vibrant community of new and diverse people. When Nicki Griffin started boating in 2000, the inland waterways were occupied by older family boats. In the years to follow, however, she would witness these being replaced by larger cruisers and gin palaces, changing the character of Irish waterways, and threatening what was, for many, a unique and special way of life. Following in the wake of such works as Theo Dorgan's *Sailing for Home* and *Time on the Ocean*, and Dick Warner's television shows, *The Skipper & Her Mate* will appeal to the novice, the river rat and the non-boater alike.
