The Orange and the Dream of California David Boulé,2014-02-23 A lively, literary and extraordinary visual look at the symbiotic and highly symbolic relationship between the Golden State and its 'golden apple'. Untold thousands of adventurers and health-seekers came West in the late C19th and early C20th, lured by postcards of orange blossoms on now-capped mountains. The orange became a symbol of everything California promised, and California became the centre of the Orange Empire. In 176 pages, author David Boule shares the absorbing story of the orange and its impact on the culture of California.

The Orange Robe Marsha Goluboff Low, 2011-06-15 After graduating from college, Marsha Low left home to spend eighteen years as an Ananda Marga yogic nun, living in countries throughout the Middle and Far East, Australasia, and Eastern Europe. After undergoing training with the organization, she taught meditation and yoga, opened schools, and performed social work and relief projects. Often skirting the law to further her organization's mission and raise money for it, she came face to face with—among other things—gun-toting border guards in Cyprus, the Russian KGB, and misunderstanding and rejection as a female spiritual teacher in the Middle East. In India, she faced harassment from government officials intent upon hunting down foreign members of her blacklisted organization. In *The Orange Robe: My Eighteen Years as a Yogic Nun*, the author also relates incidents from her family life growing up, her dreams, and the issues that she had to deal with upon returning to ordinary life. From her first encounter with the group to her eventual disillusionment with it and the reconciliation with her family, *The Orange Robe* chronicles the dangers, triumphs, misadventures, and heartaches she experienced on her journey. It also provides a unique window into the behavior and psychology of Ananda Marga and its founder, Shrii Shrii Anandamurti.

Aspects of the Orange Revolution VI Taras Kuzio, 2007-11-22 Post-communist democratic revolutions have, so far, taken place in six countries: Slovakia (1998), Croatia (1999-2000), Serbia (2000), Georgia (2003), Ukraine (2004), and Kyrgyzstan (2005). The seven chapters in this volume situate these events within a theoretical and comparative perspective. The book draws upon extensive experience and field research conducted by political scientists specializing in comparative democratization, regime politics, political transitions, electoral studies, and the post-communist world. The papers by Valerie Bunce and Sharon Wolchik, Henry Hale, Paul D'Anieri, David R. Marples, Taras Kuzio, Lucan A. Way and Steven Levitsky as well as Anika Locke Binnendijk and Ivan Marovic explore different regime types and opposition strategies in post-communist states, the diffusion of opposition strategies between states in which democratic revolutions were attempted, the strategic importance of youth NGO's in mobilizing oppositions towards democratic revolutions, the use of non-violent strategies by the opposition, path dependent, theoretical and comparative explanations of the sources of successful and failed democratic revolutions, and the factors that lie behind divergent post-revolutionary trajectories. The volume represents a breakthrough in our understanding of why and how democratic revolutions take place in the post-communist world. It provides an integrated analysis of why such upheavals succeed in some, but fail in other states. The contributions point to, among other issues, why the post-revolutionary breakthroughs in Serbia, Ukraine, and Kyrgyzstan have encountered obstacles, the ousted regime was never fully defeated and its representatives were able to launch counter-revolutions, as well as why, in Serbia and Ukraine, the political forces of the ousted regimes have returned to power in free elections held after democratic revolutions. *Post-Communist Democratic Revolutions in Comparative Perspective* is essential reading for scholars and policy makers alike.

Tribes of the Orange Sun Gene Shiles,2001-11 Future scientists, struggling with overpopulation and the ruin of Earth's natural environment, devise an ambitious plan to manage further growth of human numbers. Earth Government hastily implements the plan--the only alternative, forced population control, is not politically attractive. Adam Hampton, the newest member of the project's organizing team, objects to an overly optimistic use of old and some very new technologies. He suspects that the plan is fundamentally flawed, that the lives of the many young volunteers are at risk. But, in the beginning, he cannot point to anything specific. He can only watch and wait while three of his best friends--and millions of others--begin what they believe will be a great adventure and a new life. The eager volunteers reach their destination, but events don't go as planned. They must soon fight for bare survival--against an ancient menace that had plagued mankind and animalkind since life first began.
