### Basic Lumber Engineering for Builders Max

Schwartz, 1997 The beam and lumber requirements for your jobs aren't always clear, especially with changing building codes and lumber products. If you need to figure any type of on-the-job lumber engineering, this book will help fill the gap between what you can find in building code span tables and the complex calculations that you need to hire a certified engineer to do. The book covers most building types and framing systems, including door, window and roof framing. And there's a chapter on connections, retrofitting with anchor bolts, framing anchors and tie-downs, plus the latest requirements for cross-bridging and anchoring. Also included is an important chapter on designing concrete formwork -- figuring the pressures, tolerances, and thickness for plywood, Plyform, composition, and fiber-reinforced plastic. In the back of the book you'll find a computer disk with an easy-to-use version of Northbridge Software's Wood Beam Sizing TM. Just follow the step-by-step instructions in the program to find out what size member you need for the spans and loads that you require based on the wood species that you're using. Requires Windows 3.1 or higher.

### **Medici ~ Ascendancy** Matteo Strukul, 2019-09-05

Florence, 1429 Giovanni de' Medici is dead. A lifetime of shrewd investment, strategic alliance and sly manipulation saw Giovanni climb from mere money-lender to the top echelon of Florentine society. But success has left a slew of bitter enemies in his wake - and there are whispers his untimely demise wasn't accidental. Florence is a nest of vipers, and with the Medici family's wealth in the hands of Giovanni's untested sons, Cosimo and Lorenzo, there are

those who feel that now is the time to strike, to destroy the upstarts and seize their holdings. First in an award-winning, bestselling quartet charting ten generations of rise to power. Praise for Matteo Strukul: 'Strukul has a brilliant style and a rare imagination' TIM WILLOCKS 'One of the most important new voices in Italian crime fiction' JOE R. LANSDALE

*Nematode Parasites of Vertebrates* Roy C.

Anderson, 2000-02-08 This well illustrated book provides an historical and unified overview of a century and a half of research on the development, life cycles, transmission and evolution of the nematodes found in vertebrates throughout the world. This second, expanded edition includes relevant data from some 450 new references that have appeared from 1989 to 1999. The volume includes nematode parasites of humans, domestic animals and wildlife including fish. After an introductory chapter outlining general principles, the author systematically describes the biological characteristics of the 27 superfamilies of nematodes, followed by families, subfamilies, genera and species.

*The Snake Pit Book* Ben Snakepit, 2014-11-28 By now you know the drill: Ben White draws his life everyday in 3 comic panels. This was his first book, collecting quite a few various zines. After describing dozens of various Snakepit titles I'm going to defer to the wisdom of Jimmi Payne's Punk Zine, Taken individually, each strip resembles what a friend would say if you asked what they had done that day. Ben sifts through the minutiae of life as well as the full experience of time in a day. This is different than James Kochalka's work as there is no pretense at narrative or point. The narratives in Snakepit open up on the macro

level. If Snakepit is to be read on the toilet, a mere bowel movement is enough time to live months through the protagonist's eyes. Patterns emerge and story arcs materialize and years of common actions load into a highly concentrated snapshot that wakes you up to the ongoing machinations of life beyond your present day. This has led many to label Snakepit an existential text. Introduction about doing cocaine by Aaron Cometbus.

Radical Coherency David Antin, 2012-03-15 “We got to talking”—so David Antin begins the introduction to *Radical Coherency*, embarking on the pursuit that has marked much of his breathless, brilliantly conversational work. For the past forty years, whether spoken under the guise of performance artist or poet, cultural explorer or literary critic, Antin’s innovative observations have helped us to better understand everything from Pop to Postmodernism. Intimately wedded to the worlds of conceptual art and poetics, *Radical Coherency* collects Antin’s influential critical essays and spontaneous, performed lectures (or “talk pieces”) for the very first time, capturing one of the most distinctive perspectives in contemporary literature. The essays presented here range from the first serious assessment of Andy Warhol published in a major art journal, as well as Antin’s provocative take on Clement Greenberg’s theory of Modernism, to frontline interventions in present debates on poetics and fugitive pieces from the ’60s and ’70s that still sparkle today—and represent a gold mine for art historians of the period. From John Cage to Allan Kaprow, Mark Rothko to Ludwig Wittgenstein, Antin takes the reader on an idiosyncratic, personal journey through twentieth-century culture with his trademark antiformalist panache—one that will be welcomed by any fan of this consummate trailblazer.

A Good Doctor's Son Steven Schwartz,1998-01-21  
When sixteen-year-old David Nachman accidentally kills three-year-old Sarah Vale while drag racing, his world is thrown into turmoil and his life changes forever. Set in Chester, Pennsylvania, in the 1960s, a town experiencing a renaissance, the story of Sarah's death is in stark contrast to the hopeful events swirling around David's community. He must find his place in this optimistic world in which Sarah's tragic death makes him feel like an outsider. Although tragedy lies at the center of *A Good Doctor's Son*, the story is life-affirming and laced with humor, and David's voice is keenly alive. His search for peace after the accident and the choices he makes to find it are written in a compelling and honest style.

*Early Postmodernism* Paul A. Bové,1995 In the decade that followed 1972, the journal *boundary 2* consistently published many of the most distinguished and most influential statements of an emerging literary postmodernism. Recognizing postmodernism as a dominant force in culture, particularly in the literary and narrative imagination, the journal appeared when literary critical study in the United States was in a period of theory-induced ferment. The fundamental relations between postmodernism and poststructuralism were being initially examined and the effort to formulate a critical sense of the postmodern was underway. In this volume, Paul A. Bové, the current editor of *boundary 2*, has gathered many of those foundational essays and, as such, has assembled a

basic text in the history of postmodernism. Essays by noted cultural and literary theorists join with Bové's contemporary preface to represent the important and unique moment in recent intellectual history when postmodernism was no longer seen primarily as an architectural term, had not yet come to describe the wide range of culture it does now, but was finding power and place in the literary realm. These essays show that the history of postmodernism and its attendant critical theories are both more complex and more deeply bound with literary criticism than often is acknowledged today. Early Postmodernism demonstrates not only the significance of these literary studies, but also the role played by literary critical postmodernism in making possible newer forms of critical and cultural studies. Abraham Lincoln and the Forge of National Memory

Barry Schwartz,2000 Abraham Lincoln has long dominated the pantheon of American presidents. From his lavish memorial in Washington and immortalization on Mount Rushmore, one might assume he was a national hero rather than a controversial president who came close to losing his 1864 bid for reelection. In *Abraham Lincoln and the Forge of National Memory*, Barry Schwartz aims at these contradictions in his study of Lincoln's reputation, from the president's death through the industrial revolution to his apotheosis during the Progressive Era and First World War. Schwartz draws on a wide array of materials—painting and sculpture, popular magazines and school textbooks, newspapers and oratory—to examine the role that Lincoln's memory has played in American life. He explains, for example, how dramatic funeral rites elevated Lincoln's reputation even while funeral eulogists questioned his presidential actions, and how his reputation diminished and grew over the next four decades. Schwartz links transformations of Lincoln's image to changes in the society. Commemorating Lincoln helped Americans to think about their country's development from a rural republic to an industrial democracy and to articulate the way economic and political reform, military power, ethnic and race relations, and nationalism enhanced their conception of themselves as one people. Lincoln's memory assumed a double aspect of mirror and lamp, acting at once as a reflection of the nation's concerns and an illumination of its ideals, and Schwartz offers a fascinating view of these two functions as they were realized in the commemorative symbols of an ever-widening circle of ethnic, religious, political, and regional communities. The first part of a study that will continue through the present,

Abraham Lincoln and the Forge of National Memory is the story of how America has shaped its past selectively and imaginatively around images rooted in a real person whose character and achievements helped shape his country's future.
