Social Stories Patricia Okker, 2003 Largely ignored in American literary history, the magazine novel was extremely popular throughout the nineteenth century, with editors describing the form as a virtual necessity for magazines. Unlike many previous studies of periodicals that focus often exclusively on elite literary magazines, *Social Stories* treats a variety of magazines and authors, ranging from Ann Stephens's novels in fashionable magazines for women to William Dean Howells's anxious investigation of modern mass culture in *A Modern Instance*. William Gilmore Simms's pro-Southern antebellum novels, the publication of Martin Delany's *Blake* in an African American magazine, Jeremy Belknap's investigation of the racial and national politics of the early national period, and Rebecca Harding Davis's efforts to make sense of race during Reconstruction all receive Patricia Okker's careful attention. By exploring how magazine novelists addressed audiences that differed from one another in terms of race, region, class, and gender, *Social Stories* offers a narrative of the American magazine novel that emphasizes its direct engagement with social, political, and cultural issues of its day. Rejecting the association of novel reading with notions of the private, Okker convincingly argues that nineteenth-century magazine novels were indeed fiercely social. Created collaboratively with readers, editors, and authors, and read among a community of readers and other texts, the serial novel of the 1800s proved to be an ideal form for exploring the strategies Americans used and the obstacles they faced in forming and sustaining a collective sense of themselves. They are, in short, novels that tell stories about how--and whether--individuals can come together to form a society.

Patricia Okker is Associate Professor of English at the University of Missouri, Columbia, and the author of *Our Sister Editors: Sarah J. Hale and the Tradition of Nineteenth-Century American Women Editors*.

Social Media and Democracy Nathaniel Persily, Joshua A. Tucker, 2020-09-03 A state-of-the-art account of what we know and do not know about the effects of digital technology on democracy.

The Twittering Machine Richard Seymour, 2020-09-22 A brilliant probe into the political and psychological effects of our changing relationship with social media. Former social media executives tell us that the system is an addiction-machine. We are users, waiting for our next hit as we like, comment and share. We write to the machine as individuals, but it responds by aggregating our fantasies, desires and frailties into data, and returning them to us as a commodity experience. *The Twittering Machine* is an unflinching view into the calamities of digital life: the circus of online trolling, flourishing alt-right subcultures, pervasive corporate surveillance, and the virtual data mines of Facebook and Google where we spend considerable portions of our free time. In this polemical tour de force, Richard Seymour shows how the digital world is changing the ways we speak, write, and think. Through journalism, psychoanalytic reflection and insights from users, developers, security experts and others, Seymour probes the human side of the machine, asking what we're getting out of it, and what we're getting into. Social media held out the promise that we could make our own history—to what extent did we choose the nightmare that it has become?

Social Media and the Public Interest Philip M.

Napoli, 2019-08-27 Facebook, a platform created by undergraduates in a Harvard dorm room, has transformed the ways millions of people consume news, understand the world, and participate in the political process. Despite taking on many of journalism's traditional roles, Facebook and other platforms, such as Twitter and Google, have presented themselves as tech companies—and therefore not subject to the same regulations and ethical codes as conventional media organizations. Challenging such superficial distinctions, Philip M. Napoli offers a timely and persuasive case for understanding and governing social media as news media, with a fundamental obligation to serve the public interest. *Social Media and the Public Interest* explores how and why social media platforms became so central to news consumption and distribution as they met many of the challenges of finding information—and audiences—online. Napoli illustrates the implications of a system in which coders and engineers drive out journalists and editors as the gatekeepers who determine media content. He argues that a social media-driven news ecosystem represents a case of market failure in what he calls the algorithmic marketplace of ideas. To respond, we need to rethink fundamental elements of media governance based on a revitalized concept of the public interest. A compelling examination of the intersection of social media and journalism, *Social Media and the Public Interest* offers valuable insights for the democratic governance of today's most influential shapers of news.
