Weather Permitting Chris St. Clair, 2022-11-08 From the longtime host of The Weather Network comes a behind-the-scenes look at Canada's biggest weather events and climate phenomena. For more than twenty-five years, Chris St. Clair was on the frontline of Canada's biggest weather events as a popular presenter on The Weather Network. For the first time, he shares his never-before-told stories covering the country's most astounding weather events. From the flooding of the Red River in Winnipeg to the ice storm in Montreal, the hurricanes in Newfoundland, the devastating wildfires in Fort McMurray, the hailstorm in Calgary, and the heat dome and horrifying floods in British Columbia, St. Clair recalls these extreme weather events and relays their impact on communities across the country. He also follows Canadian snowbirds south to Florida and recounts their dramatic escape from record-breaking Hurricanes Matthew and Irma. A vivid personal narrative with accessible scientific explanations and meteorological analysis, *Weather Permitting* tells the story of how the weather has shaped the character and psyche of our nation, and is an homage to the strength and resilience of Canadian communities from coast to coast.

An Aristotelian Account of Induction Louis Groarke, 2009-11-01 In *An Aristotelian Account of Induction* Groarke discusses the intellectual process through which we access the first principles of human thought - the most basic concepts, the laws of logic, the universal claims of science and metaphysics, and the deepest moral truths. Following Aristotle and others, Groarke situates the first stirrings of human understanding in a creative capacity for discernment that precedes knowledge, even logic. Relying on a new historical study of philosophical theories of inductive reasoning from Aristotle to the twenty-first century, Groarke explains how Aristotle offers a viable solution to the so-called problem of induction, while offering new contributions to contemporary accounts of reasoning and argument and challenging the conventional wisdom about induction.

Bear v. Shark Chris Bachelder, 2002-02-19 So it's kind of like a parlor game, then?... The question is apparently of Ancient Eastern extraction.... It seems to be a gut thing. The answer just feels right and then you come up with reasons.... Given a relatively level playing field -- i.e., water deep enough so that a Shark could maneuver proficiently, but shallow enough so that a Bear could stand and operate with its characteristic dexterity -- who would win in a fight between a Bear and a Shark? In this brilliant satire of our media-saturated culture, the sovereign nation of Las Vegas -- the entertainment capital of the world -- is host to *Bear v. Shark II*. After a disappointing loss in the first matchup between the land and the sea, the bear is back with a vengeance and out for blood. All of America is obsessed with the upcoming spectacle, so tickets are hard to come by. With an essay entitled *Bear v. Shark: A Reason to Live*, young Curtis Norman wins a national writing contest and four tickets to the event. The Normans load up their SUV and embark on a road trip to Vegas. As they head cross-country, the family is besieged by a dizzying barrage of voices: television and radio personalities, public service announcements, bear and shark pundits, Freudians, theologians, and self-published authors, in addition to the *Bear v. Shark* fanatics, cultists, and resisters they meet at roadside gas stations and restaurants. Overwhelmed by factoids, statistics, and ten-second debates, the Normans -- along with the rest of country -- can't seem to get their facts straight, much less figure out a way to actually communicate with one another. Sound bites and verbal tics predominate; misheard, misunderstood, and just plain mistaken information is absorbed, mangled, and regurgitated to hilarious effect; and the most inane subjects -- from the disappearance of Dutch culture to the Shakespearean bias toward the bear -- are vigorously and obsessively debated. These

meaningless exchanges of misinformation leave Mr. Norman disenchanted, world-weary, and ambivalent about the impending show, but the family eventually makes it to Vegas for an apocalyptic and surprisingly emotional ending. Written in quick, commercial-like segments that mirror the media it satirizes, Chris Bachelder's debut is a fiercely funny, razor-sharp novel about the odd intersection of zealotry and trivia, about the barriers to human connection in a society that values entertainment above all else. Through a clever act of novelistic subterfuge, Bachelder makes us laugh at our penchant for absurd and useless information while drawing us into a dazzling spectacle of his own imagination.

He also delves into how climate change affects weather, forecasts, and other events, such as devastating wildfires and historic hurricanes churning across the Atlantic Ocean. *The Skies Above* provides readers with a deeper understanding of the processes and events that fill our skies, which not only soothes the anxiety produced by raucous storms, but instills a stronger and more meaningful appreciation of the beauty of days both stormy and calm.

Blame It on the Weather David W. Phillips, Michael Parfit, Suzanne Chisholm, 2002-01-01 Little wonder we are obsessed with the weather. In this delightful, humorous and informative look at weather, climatologist David Phillips answers many of our most common questions about weather phenomena, describes fascinating moments in weather history, and delves into weather folklore and trivia from across North America. David Phillips is the country's most popular weatherperson. He is Senior Climatologist with Environment Canada's Atmospheric Environment Service and appears regularly on The Weather Network's 'Ask the Expert.' He also writes the 'Weatherwise' column for Canadian Geographic magazine and is the originator of Environment Canada's Canadian Weather Trivia Calendar.

Frank Batten Connie M. Sage, 2011-08-29 Frank Batten Sr. (1927-2009) created the Weather Channel in 1982, despite mocking by colleagues in the media that around-the-clock weather broadcasts would be as exciting as watching paint dry. The network, and later its companion website, Weather.com, became the largest private weather company in the world and an American cultural icon.

Yet few have heard of Batten, a media pioneer whose Virginia newspaper was the only major daily to back school integration. At a time when American corporate greed was making headlines, without fanfare and limelight Batten built a media empire centered on honesty, integrity, and ethics. Starting out in his uncle's newspaper business in Norfolk, Virginia, as a reporter and advertising salesman, he assumed leadership of the Virginian-Pilot and Ledger-Star at the age of twenty-seven and grew Landmark Communications into a media powerhouse. He championed racial equality, a position not often taken in Virginia during the 1950s. His flagship newspaper, the Pilot, was the only daily paper in Virginia to back court-ordered school desegregation. He created two billion-dollar businesses and gave away more than \$400 million to charity, nearly all of it to education. As chairman of the Associated Press from 1982 to 1987, he helped guide the news agency back on a sound financial footing. Batten also faced a tremendous personal challenge that would have sidelined many: he lost his vocal cords to cancer two years before starting the Weather Channel. This is the untold story of a man whose name few recognize, yet who helped change the face of the media in the twentieth century.

The Mobile Photographer Robert Fisher, 2014-11-17 It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that statement—that camera phones aren't "real" cameras and that the people who use them aren't "real" photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more "serious" equipment. In this book, Fisher guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the "base" camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.

Integrated Pest Management Dharam P Abrol,2013-08-28 Integrated Pest Management: Current Concepts and Ecological Perspective presents an overview of alternative measures to traditional pest management practices using biological control and biotechnology. The removal of some highly effective broad-spectrum chemicals, caused by concerns over environmental health and public safety, has resulted in the development of alternative, reduced risk crop protection products. These products, less toxic to the environment and easily integrated into biological control systems, target specific life stages or pest species. Predation — recognized as a suitable, long-term strategy — effectively suppresses pests in biotechnological control systems. Integrated Pest Management covers these topics and more. It explores the current ecological approaches in alternative solutions, such as biological control agents, parasites and predators, pathogenic microorganisms, pheromones and natural products as well as ecological approaches for managing invasive pests, rats, suppression of weeds, safety of pollinators, role of taxonomy and remote sensing in IPM and future projections of IPM. This book is a useful resource to entomologists, agronomists, horticulturists, and environmental scientists. Fills a gap in the literature by providing critical analysis of different management strategies that have a bearing on agriculture, sustainability and environmental protection Synthesizes research and practice on integrated pest management Emphasizes an overview of management strategies, with critical evaluation of each in the larger context of ecologically based pest management
