

The Whip Blog

Erik Ringmar

Whips of the West David W. Morgan, 2007 This book is designed to bring together and record the development of whips in the United States. It covers the production of buggy whips in Westfield MA, a center for the growth of the Industrial Revolution in New England and carries on to the Diamond Whip Company in Chicago and the handcrafted whips of the far West. The book is liberally illustrated and records essential historical documentation in the appendices.

A Blogger's Manifesto Erik Ringmar, 2007-10-15 An expansive and captivating interrogation of free speech in the modern world, exploring the limitations of the digital age.

Horses, Power and Place Neil Ward, 2023-12-05 Horses, Power and Place explores the evolution of humanity's relationship with horses, from early domestication through to the use of the horse as a draught animal, an agricultural, industrial and military asset, and an animal of sport and leisure. Taking an historical approach, and using Britain as a case study, this is the first book-length exploration of the horse in the more-than-human geography of a nation. It traces the role and implications of horse-based mobility for the evolution of settlement structure, urban morphology and the rural landscape. It maps the growth and various uses of horses to the point of 'peak horse' in the early twentieth century before considering the contemporary place of the horse in twenty-first century economy and society. It assesses the role of the horse in the formation of places within Britain and in the formation of the nation. The book reflects on the implications of this historical and contemporary equine geography for animal geographies and animal studies. It argues for the study of animals in general in how places are made, not just by humans. Written in a clear and accessible style, this book will be essential reading for students and scholars of animal geography and animal studies more widely.

Insecure Majorities Frances E. Lee, 2016-08-23 "[A] tour de force. Building upon her argument in *Beyond Ideology*, she adds an important wrinkle into the current divide between the parties in Congress." —*Perspectives on Politics* As Democrats and Republicans continue to vie for political advantage, Congress remains paralyzed by partisan conflict. That the last two decades have seen some of the least productive Congresses in recent history is usually explained by the growing ideological gulf between the parties, but this explanation misses another fundamental factor influencing the dynamic. In contrast to politics through most of the twentieth century, the contemporary Democratic and Republican parties compete for control of Congress at relative parity, and this has dramatically changed the parties' incentives and strategies in ways that have driven the contentious partisanship characteristic of contemporary American politics. With *Insecure*

Majorities, Frances E. Lee offers a controversial new perspective on the rise of congressional party conflict, showing how the shift in competitive circumstances has had a profound impact on how Democrats and Republicans interact. Beginning in the 1980s, most elections since have offered the prospect of a change of party control. Lee shows, through an impressive range of interviews and analysis, how competition for control of the government drives members of both parties to participate in actions that promote their own party's image and undercut that of the opposition, including the perpetual hunt for issues that can score political points by putting the opposing party on the wrong side of public opinion. More often than not, this strategy stands in the way of productive bipartisan cooperation—and it is also unlikely to change as long as control of the government remains within reach for both parties.

Religion, Thesis Dr. Everett C Borders Jr., 2017-07-11 A forward truth, real truth, is never offensive except for the blinders of personal perspectives of latent benign ambiguities of realities and historical perceptions. Without positive cognitive change, something sleeps inside us all and seldom awakens. This sleeper began to awaken in the mid 1950s and has stayed awake ever since as many and all have eyes but cannot fully or truly see, as an eye for an eye will always leave you blind.

Whips and Whipmaking David W. Morgan, 2004 Whipmaking is the highest refinement of the art of leather braiding. This revised edition introduces another major category of whipsthose made in the Mongol tradition. Braiding details are shown in an extensive selection of photographs that also serve to document the geographic distribution of the whips; their historic use and characteristics are explained in detailed captions. A new chapter describes the evolution of a whip design that became world famous through its association with Hollywood. The whips used by Indiana Jones were all made by the author, David W. Morgan, and the films prompted an immediate revival of interest in whips for performance and sport use.

Blogging America Aaron Barlow, 2007-11-30 As blogs have evolved over the last few

years, they have begun to take on distinct characteristics depending on audience and purpose. Though political blogs remain the most high profile (and most read), other types of blogs are gaining in strength and visibility. This book—a follow-up volume to Barlow's Rise of the Blogosphere, which examined the historical context for the modern blog—provides an examination of the many current aspects of the blogosphere, from the political to the professional to the personal, with many stops in between. Given that millions of blogs have been created over the past five years and yet more come online at an undiminished rate, and given that enthusiasm for both reading them and writing them has yet to wane, it is likely that the blog explosion will continue indefinitely. The Lost Blogs Paul Davidson, 2009-11-29 Over 13,000,000 people are currently blogging with thousands being created each day. But what about the blogs you haven't seen, written by the iconic men and women you're dying to know the most intimate details about but who died before the internet was invented? This original take on the biggest literary development since the paperback offers 200 blogs inspired by the most famous minds in history, detailing their hysterical personal revelations, such as: John Lennon's thoughts after meeting Yoko Ono (and her obsession with the Beatles' publishing rights): Marilyn Monroe's annoyance at her new beau 'J', who breaks off their dates with excuses like having to avert a war in Costa Rica: Read Shakespeare on a treatment for a new play about two princes who misplace their horse and carriage and spend the entire play trying to find it or how a stray hot dog nearly derailed Ghandi's hunger strike: There's also the transcript of Neil Armstrong and Buzz Aldrin's intensely competitive game of Rocks, Paper, Scissors, to decide who would be the first man to set foot on the moon and much, much more. In this book Paul Davidson proves that matters, proving there's no such thing as too much information.
