Apologia Pro Vita Mea Richard D. Chessick,2023-04-28 This book is a narrative in dialogue form in which the author, now an octogenarian who is a psychiatrist, psychoanalyst, and a PhD in philosophy, describes his intellectual evolution from a published laboratory researcher to engagement in the full-time clinical teaching and practice of psychoanalysis, psychodynamic psychotherapy, and philosophy. He reviews the development of his ideas through his many publications and offers commentary on the nature of the origin, environment, and content of his thinking at the time each of these were written, also referring to his voluminous diaries. This serves as a running report on the changing fashions in the field of psychiatry, psychoanalysis, and philosophy over the past sixty-five years, along with the author's opinions about the nature and source of these changes. The book is divided into five parts, arranged chronologically from 1953 to the present time.

Technics and Time, 1 Bernard Stiegler,1998 What is a technical object? At the beginning of Western philosophy, Aristotle contrasted beings formed by nature, which had within themselves a beginning of movement and rest, and man-made objects, which did not have the source of their own production within themselves. This book, the first of three volumes, revises the Aristotelian argument and develops an innovative assessment whereby the technical object can be seen as having an essential, distinct temporality and dynamics of its own. The Aristotelian concept persisted, in one form or another, until Marx, who conceived of the possibility of an evolution of technics. Lodged between mechanics and biology, a technical entity became a complex of heterogeneous forces. In a parallel development, while industrialization was in the process of overthrowing the contemporary order of knowledge as well as contemporary social organization, technology was acquiring a new place in philosophical questioning. Philosophy was for the first time faced with a world in which technical expansion was so widespread that science was becoming more and more subject to the field of instrumentality, with its ends determined by the imperatives of economic struggle or war, and with its epistemic status changing accordingly. The power that emerged from this new relation was unleashed in the course of the two world wars. Working his way through the history of the Aristotelian assessment of technics, the author engages the ideas of a wide range of thinkers--Rousseau, Husserl, and Heidegger, the paleo-ontologist Leroi-Gourhan, the anthropologists Vernant and Detienne, the sociologists Weber and Habermas, and the systems analysts Maturana and Varela.

How to Paint Muscle Cars & Show Cars Like a Pro Tony Thacker,2018-07-16 The value and collectability of muscle cars has never been higher. Models that sold for \$30,000 at auction 10 years ago are now going for quadruple that in many cases. The charts showing auction results, sale prices, and car value have a continuous upward trajectory. As such, some rare models of muscle cars are now valued in the realm of historically high-valued classic, sports, and show cars. Who would have dreamed that a Hemi 'Cuda convertible would be selling for Duesenberg or Ferrari money these days? Of course, when values of muscle cars increase to such an extent, the care and detail spent on restoration becomes vitally important, putting them into the exotic and show car realm. Naturally, the most visible aspect of a full-blown restoration is the paintwork. Veteran author Tony Thacker teams up with LA-based award-winning painter extraordinaire Mick Jenkins to bring you this complete guide to show-quality painting. Included is all the information on how to create a show-quality finish, including chapters on making a plan, the tools needed for the job, complete disassembly information, repair versus replacement decisions, metal prep, the latest and best paint products, application, custom finishes, and more.
