The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence

that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Women of the Harlem Renaissance Cheryl A. Wall, 1995-09-22 Wall's writing is lively and exuberant. She passes her enthusiasm for these writers' works on to the reader. She captures the mood of the times and follows through with the writers' evolution -- sometimes to success, other times to isolation.... Women of the Harlem Renaissance is a rare blend of thorough academic research with writing that anyone can appreciate. -- Jason Zappe, Copley News Service By connecting the women to one another, to the cultural movement in which they worked, and to other early 20th-century women writers, Wall deftly defines their place in American literature. Her biographical and literary analysis surpasses others by following up on diverse careers that often ended far past the end of the movement. Highly recommended... Â -- Library Journal Wall offers a wealth of information and insight on their work, lives and interaction with other writers... strong critiques... -- Publishers Weekly The lives and works of women artists in the Harlem Renaissance -- Jessie Redmon Fauset, Nella Larsen, Zora Neale Hurston, Bessie Smith, and others. Their achievements reflect the struggle of a generation of literary women to depict the lives of Black people, especially Black women, honestly and artfully.

Triadic Game Design Casper Hartevelde, 2011-02-26 Many designers, policy makers, teachers, and other practitioners are beginning to understand the usefulness of using digital games beyond entertainment. Games have been developed for teaching, recruiting and to collect data to improve search engines. This book examines the fundamentals of designing any game with a serious purpose and provides a way of thinking on how to design one

successfully. The reader will be introduced to a design philosophy called "Triadic Game Design."; a theory that all games involve three worlds: the worlds of Reality, Meaning, and Play. Each world is affiliated with aspects. A balance needs to be found within and between the three worlds. Such a balance is difficult to achieve, during the design many tensions will arise, forcing designers to make trade-offs. To deal with these tensions and to ensure that the right decisions are made to create a harmonic game, a frame of reference is needed. This is what Triadic Game Design offers.

It's All a Game Tristan Donovan, 2017-05-30 [A] timely book...It's All a Game provides a wonderfully entertaining trip around the board, through 4,000 years of game history. -The Wall Street Journal Board games have been with us longer than even the written word. But what is it about this pastime that continues to captivate us well into the age of smartphones and instant gratification? In *It's All a Game*, British journalist and renowned games expert Tristan Donovan opens the box on the incredible and often surprising history and psychology of board games. He traces the evolution of the game across cultures, time periods, and continents, from the paranoid Chicago toy genius behind classics like Operation and Mouse Trap, to the role of Monopoly in helping prisoners of war escape the Nazis, and even the scientific use of board games today to teach artificial intelligence how to reason and how to win. With these compelling stories and characters, Donovan ultimately reveals why board games have captured hearts and minds all over the world for generations.

The World's Most Instructive Amateur Game Book Dan Heisman, 2012 Teaches amateur chess players how to improve their chess skills so they can become better players.

Maze Christopher Manson, 1985-11-15 This is not really a book. This is a building in the shape of a book...a maze. Each numbered page depicts a room in the maze. Tempted? Test your wits against mine. I guarantee that my maze will challenge you to think in ways you've never thought before. But beware. One wrong turn and you may never escape!

The Internet Is Not the Answer Andrew Keen, 2015-01-06 The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." -Po Bronson, #1 New York Times-bestselling author

P Is for Pterodactyl Raj Haldar, Chris Carpenter, 2018-11-13 A New York Times Bestseller! A raucous trip through the odd corners of our alphabet. —The New York Times Let's get real—the English language is bizarre. A might be for apple, but it's also for aisle and aeons. Winning Ways for Your Mathematical Plays, Volume 2 Elwyn R. Berlekamp, John H. Conway, Richard K. Games C. Thi Nguyen, 2020 Games are a unique art form. The game designer doesn't just create a world; they create who you will be in that world. They tell you what abilities to use and what goals to take on. In other words, they specify a form of agency. Games work in the medium of agency. And to play them, we take on alternate agencies and submerge ourselves in them. What can we learn about our own rationality and agency, from thinking about games? We learn that we have a considerable degree of fluidity with our agency. First, we have the capacity for a peculiar sort of motivational inversion. For some of us, winning is not the point. We take on an interest in winning temporarily, so that we can play the game. Thus, we are capable of taking on temporary and disposable ends. We can submerge ourselves in alternate agencies, letting them dominate our consciousness, and then dropping them the moment the game is over. Games are, then, a way of recording forms of agency, of encoding them in artifacts. Our games are a library of agencies. And exploring that library can help us develop our own agency and autonomy. But this technology can also be used for art. Games can sculpt our practical activity, for the sake of the beauty of our own actions. Games are part of a

crucial, but overlooked category of art - the process arts. These are the arts which evoke an activity, and then ask you to appreciate your own activity. And games are a special place where we can foster beautiful experiences of our own activity. Because our struggles, in games, can be designed to fit our capacities. Games can present a harmonious world, where our abilities fit the task, and where we pursue obvious goals and act under clear values. Games are a kind of existential balm against the difficult and exhausting value clarity of the world. But this presents a special danger. Games can be a fantasy of value clarity. And when that fantasy leaks out into the world, we can be tempted to oversimplify our enduring values. Then, the pleasures of games can seduce us away from our autonomy, and reduce our agency.--
