Cumulative Effects in Wildlife Management Paul R Krausman, Lisa K. Harris, 2011-03-09 As humans continue to encroach on wildlands, quality and quantity of wildlife habitat decreases before our eyes. A housing development here, a shopping mall there, a few more trees cut here, another road put in there, each of these diminishes available habitat. Unless the cumulative effects of multiple simultaneous development projects are recognized and incorporated at the beginning of project development, we will continue to see wildlife habitat disappear at unprecedented rates. Divided into two parts, Cumulative Effects in Wildlife Management emphasizes the importance of recognizing cumulative effects and highlights the necessity of their bearing on future policy. It begins with an outline of the differences between direct, indirect, and cumulative effects of anthropogenic impacts on wildlife habitat and addresses the similarities and differences in US and Canadian policies, legal and economic ramifications, and the confusion that stems from lack of consideration, communication, and forward planning. Section 1 also describes the current standard means of quantifying cumulative effects as proposed by the Council on Environmental Quality. Section 2 presents a series of case studies that deepen our appreciation of how anthropogenic influences interconnect and how this heightened level of understanding influences our ability to make informed decisions. Case studies include cumulative effects in the Canadian Arctic, border issues with Mexico, suburban and exurban landscapes, scenic resources, and the cumulative impacts of energy development on sage-grouse. Without a conscious knowledge of what is happening around us, we will not be able to incorporate an effective land ethic, and natural resources will be the ultimate loser. Cumulative Effects in

Wildlife Management brings to light the crucial connections between human expansion and habitat destruction for those managers and practitioners charged with protecting wildlife in the face of changing landscapes.

Revisiting New Public Management and its Effects Abbas Strømme-Bakhtiar, Konstantin Timoshenko, 2021 Although, over time, numerous articles and books have been published on New Public Management (NPM), it is still being investigated with a sense of great urgency, as its effects, whether positive or negative, have not yet been fully gauged and comprehended. Given the rather controversial nature of the phenomenon of interest, the purpose of this edited volume is to re-invigorate and revisit the ongoing debate on NPM by providing a fresh perspective and novel insights into how NPM-driven changes have been approached and, more importantly, the effects they have produced in the context of Norway. The current volume comprises seven contributions penned by scholars and experts from all over Norway with a keen interest in NPM. Five of them are geared towards assessing the effects of NPM-style reforms on the Norwegian public healthcare sector in general and nursing in particular, one deals with the impacts of NPM on Norwegian primary and lower secondary education, and one traces the relationship between NPM and the most influential management accounting innovations of the last few decades. It is our profound hope that the book will trigger fruitful discussions and broaden our understanding of NPM and its effects by providing lessons from the empirical evidence presented in the different chapters. Captivating and instructive, it will be of great interest for all readers keeping an eye on NPM, including but not limited to students and scholars of public administration, practitioners and policymakers.

Handbook of Research on Interdisciplinary Reflections of Contemporary Experiential Marketing Practices
Akel, Gökhan, 2022-06-24 Technology has brought many innovations and changes in experiential design and experiential products and services. The digital transformations brought

about by technology have led to problem-solving, creative functioning, and unique improvements along with experiences. Human-digital experience interaction prevails in many areas of modern society, and in order to evaluate this interaction, a more balanced understanding of digital and experience processes is required. The Handbook of Research on Interdisciplinary Reflections of Contemporary Experiential Marketing Practices discusses innovative research on experiential marketing and evaluates the interdisciplinary reflections of practices from different perspectives. The book also explores how the concept of experience is developed, managed, and marketed according to current consumer needs and motivations. Covering critical topics such as experience economy and tourism experience management, this reference work is ideal for managers, marketers, hospitality professionals, academicians, practitioners, scholars, researchers, instructors, and students.

Pathways for Getting to Better Water Quality: The Citizen Effect Lois Wright Morton, Susan S. Brown, 2010-11-25 This book is about accomplishing change in how land is managed in agricultural watersheds. Wide-ranging case studies repeatedly document that plans, policies, and regulations are not adequate substitutes for the empowerment of people. Ultimately change on the land is managed and accomplished by the people that live on land within each watershed.

Hydrologic Effects of a Changing Forest Landscape National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Hydrologic Impacts of Forest Management, 2008-12-19 Of all the outputs

of forests, water may be the most important. Streamflow from forests provides two-thirds of the nation's clean water supply. Removing forest cover accelerates the rate that precipitation becomes streamflow; therefore, in some areas, cutting trees causes a temporary increase in the volume of water flowing downstream. This effect has spurred political pressure to cut trees to increase water supply, especially in western states where population is rising. However, cutting trees for water gains is not sustainable: increases in flow rate and volume are typically short-lived, and the practice can ultimately degrade water quality and increase vulnerability to flooding. Forest hydrology, the study of how water flows through forests, can help illuminate the connections between forests and water, but it must advance if it is to deal with today's complexities, including climate change, wildfires, and changing patterns of development and ownership. This book identifies actions that scientists, forest and water managers, and citizens can take to help sustain water resources from forests.

Government Institutions: Effects, Changes and Normative Foundations H. Wagenaar, 2000-10-31

Research on government institutions is one of the most exciting intellectual areas in political science and policy studies today. Increasingly it is recognized by scholars in these fields that effective and legitimate policies depend on the design and maintenance of complex institutional arrangements. This book brings together some of the leading scholars in institutional research in The Netherlands. Their work addresses such perennially difficult questions in institutional research such as: How do we understand institutional change? How do we measure the effects of institutions on societal sectors and public policy? How do the normative foundations of government institutions influence their

functioning? What are the principles of effective and legitimate institutional design? Through analysis of well-researched examples ranging from the fabled Dutch 'poldermodel', through the transformation of the welfare state, through privatizations of the Dutch telecommunications industry, to the work of welfare officials, these authors demonstrate the interpenetration of normative, empirical and design issues in institutional theory. The book is intended for scholars and graduate students in political science, public policy, public administration, and law.

Themes in Greek Linguistics II Brian D.

Joseph, Geoffrey C. Horrocks, Irene Philippaki-Warbuton, 1998-01-01 This volume brings together 11 original papers on a variety of themes in Greek linguistics, covering phonology, morphology, syntax, and semantics, both synchronically and diachronically. Collectively, these papers report on recent advances in the study of Greek grammar within the framework of generative grammar, and provide insights into such diverse topics as the analysis of consonant clusters, the representation of stress, the status of inflectional features, the relationship between compounds and projection, derived nominals, the occurrence of weak clitic pronouns in questions, small clauses, focus constructions, word order, the placement of clitics in Cappadocian dialects, and Medieval Greek relativisation strategies. Together, they show that Greek is a vital contributor to issues of current controversy in grammatical theory.

International Marketing and the Country of Origin Effect G. Bertoli, 2013-01-01 'The approach of the chapters that comprise this volume is academically rigorous and at the same time managerially relevant, which is why I believe the book helps to push the made-in research agenda forward at the same time as it provides practitioners with new ideas they can apply to their brands.' - Nicolas Papadopoulos, Carleton University, Canada The country of origin of goods and services can have positive or negative effect on customers' intentions to purchase. This book analyzes the impact of this effect on the international development of Italian companies in emerging markets. The chapters refer to a wide range of issues, including made-in effects in relation to ethnocentrism and to corporate social responsibility in small and medium-sized enterprises; the interactions and synergistic effects between product-related made-in images and the images of places as tourism destinations; distribution channel issues; 'made-in topics' in

relation to emerging markets; and a review of the relevant literature on country of origin effects. The contributors propose strategies and tools that companies might leverage to develop their international marketing and suggest policies that might strengthen these efforts. This original work will prove to be a valuable resource for students and researchers of international marketing and strategy as well as policy makers.

VIVO Katy Borner, Ying Ding, Mike Conlon, Jon Corson-Rikert, 2012-10-01 The world of scholarship is changing rapidly. Increasing demands on scholars, the growing size and complexity of questions and problems to be addressed, and advances in sophistication of data collection, analysis, and presentation require new approaches to scholarship. A ubiquitous, open information infrastructure for scholarship, consisting of linked open data, open-source software tools, and a community committed to sustainability are emerging to meet the needs of scholars today. This book provides an introduction to VIVO, <http://vivoweb.org/>, a tool for representing information about research and researchers -- their scholarly works, research interests, and organizational relationships. VIVO provides an expressive ontology, tools for managing the ontology, and a platform for using the ontology to create and manage linked open data for scholarship and discovery. Begun as a project at Cornell and further developed by an NIH funded consortium, VIVO is now being established as an open-source project with community participation from around the world. By the end of 2012, over 20 countries and 50 organizations will provide information in VIVO format on more than one million researchers and research staff, including publications, research resources, events, funding, courses taught, and other scholarly activity. The rapid growth of VIVO and of VIVO-compatible data sources

speaks to the fundamental need to transform scholarship for the 21st century. Public Vices, Private Virtues?: Assessing the Effects of Marketization in Higher Education Pedro N. Teixeira, David D. Dill, 2011-11-13 Recent years have seen the strengthening of a discourse that emphasises the virtues of markets, competition and private initiative, vis-à-vis the vices of public intervention in higher education. This volume presents a timely reflection about the effects this increasing marketization has been producing in many higher education systems worldwide. The various chapters of this volume analyse the impact of markets at the system level, with significant attention being devoted to the changes in modes of regulation, the strengthening of aspects such as privatization and inter-institutional competition in higher education systems, and the closer interaction between higher education and its economic environment. Several of the contributors devote attention as well to the implications of market forces for institutional change, notably regarding issues such as mission, organizational structure and governance and the way marketization is affecting the internal distribution of power and the definition of priorities. Finally, the volume includes several chapters focusing on the different markets of higher education, such as the academic labour market, undergraduate and postgraduate education, and research markets. Altogether these chapters provide important insights concerning the many national and institutional contexts in which the marketization

of higher education has been taking place around the world.
