Digital Competition Law in Europe Marc Wiggers, Robin Struijlaart, Joost Dibbets, 2023-07-14 'Digital competition', a term and concept that has risen to the forefront of competition law, may be viewed as both promising and cautionary: on the one hand, it brings the promises of increased speed, efficiency and objectivity, and, on the other, it entails potential pitfalls such as hard-to-identify pathways to unfair pricing, dominant positions and their potential abuse, restriction of choice and abuse of personal data. Accordingly, jurisdictions around the world are taking measures to deal with the phenomenon. In this concise but thoroughly researched book – both informative and practical – lawyers from two prominent firms with specialised digital competition teams take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe, most of these forerunners in the field of digital competition policy and enforcement. The competition authorities surveyed are those of the European Union, the United Kingdom, France, Germany, the Netherlands and Belgium. For each, an overview, spanning the period from 2012 to mid-2022 but including as many landmark cases as possible up to and including December 2022, includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches, policy statements, industry surveys and research reports. Activities and enforcement practices of the various authorities include the following and more: degree of activity; focus of the activity; enforcement styles; enforcement instruments; visible effectiveness of enforcement; and important insights and outlooks. Each overview contains separate chapters on cartel prohibition, the prohibition of abuse of a dominant position and merger control. Additional chapters – partially written by guest authors (who are all without a doubt true thought leaders: Tristan Byrne, Giuseppe Colangelo, Ai Deng, Teodora Groza, Daniel Mândrescu, Wolf Sauter, Thibault Schrépel, and Gareth Shier) – evaluate the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated, the economic context, the most important game changers, and a concluding chapter offers recommendations. An indispensable guide to quickly and accessibly acquiring in-depth knowledge of competition law in the digital sector, this matchless volume is a must-read for any practitioner or academic who encounters competition law related to digital markets. The dilemmas and challenges of the new competition law reality – which is here already, like it or not – are clearly explained here for the benefit of regulators, academics, policymakers, judges, in-house counsel and lawyers specialising in competition law and intellectual property law.

Technologically Mediated Human Resource Management Anthony McDonnell, Ronan Carbery, John Burgess, Ultan Sherman, 2023-05-08 This book explores the enactment of technologically mediated Human Resource Management (HRM) in the gig economy from various perspectives. The gig economy offers a new form of work which is in line with the ongoing consumer desire for convenience. Also known as the online platform, on-demand or digital platform economy, the gig economy is perhaps one of the most distinctive and extreme sides of the increasingly digitalised and fragmented nature of work. This volume examines various challenges that exist between online labor platforms and human resource management in the realm of the gig economy. The chapters in this book explore issues like institutional complexity, technological supervision of gig workers, recruitment in the gig economy, quality of work and work fairness. They further illustrate

the importance of gig work being incorporated within the parameters of HRM research given the existence of many activities and practices that are typically associated with HR functions within traditional organisational forms. This book will be a beneficial read for advanced students and researchers of Management, Economics, Business and Marketing. It was originally published as a special issue of The International Journal of Human Resource Management.

Move to the Netherlands With the Dutch-American Friendship Treaty Joy San Diego, 2023-07-24 Have you ever wondered how to move to Europe? Are you adventurous and want to experience living in the EU? Or are you thinking of what life would be like in a more inclusive, equal, caring and social society? For Americans moving to the Netherlands is easier than you think! Other moving abroad books and guides focus on just the moving and integrating part, but they usually don't show you the actual immigration process of it or how to get a residence permit. This book lays out exactly how Americans can get residence permit and actually make the move to the Netherlands with the Dutch-American Friendship Treaty - spouses, partners and families included! The reality of moving anywhere abroad is that beyond 3-4 months you need a residence permit. The host government usually only issues residence permits when: - a company in the host country sponsors you, - your spouse is a citizen, or - you are a political refugee. The Dutch-American Friendship Treaty (DAFT) makes it easier for Americans to get residency and move to the Netherlands. Is the DAFT program for you? What is involved? How much does it cost to live in the Netherlands? What can I expect living there? This book will guide you through the exact steps and details including costs and expenses, culture and society, healthcare and insurance, utilities, shopping and the reality of living in the Netherlands (which is amazing!). Plus, I share my own experiences of moving here in 2019 - so you know what to expect and can make the most of living in this awesome country! If you've even had just the slightest interest in moving to Europe, this book is for you. Download and learn how easy moving to and living in the Netherlands is - and how much it is! The Dutch-American Friendship Treaty may not

be for everyone. Registration of a business, a deposit of €4500 (about \$4900) in a Dutch bank, and other items and fees are required. - - - - - Note: This book outlines how Americans can get a two-year residence permit in the Netherlands through the Dutch-American Friendship Treaty. It is not intended to serve as legal advice, to make any guarantees or to replace the expertise of a licensed immigration lawyer.

End Of Competition, The: The Impact Of The Network Economy C N A

Molenaar, 2020-05-14 The frictions that we experience when doing business, and in fact also in society, result from the impact of technology. There is a transition period from 'doing digital' to 'being digital'. This affects every aspect of our lives, both private and professional. Merely observing the changes, reading about conflicts of the old model in relation to the new model, is confusing. The current developments and frictions require more in-depth examination. Insights into these developments will be necessary in order to achieve success. Many more partnerships will develop; organisations will come together and combine forces and borders will disappear. This will lead to the changes from order entry to new digital business ecosystems, or rather from 'doing digital' to 'being digital'. In the book, *The End of Competition: The Impact of the Network Economy*, the author explores the indicators of change, the motives for change, and the changes that are yet to come. Concrete plans provide clarity regarding the steps that can be taken, and they indicate who is already going down that road. This book will cover the similarities and differences in the approach and developments in both the Western and Asian worlds. We are at the beginning of a new age: the age of 'being digital', and closing our eyes to this is to deny ourselves a future.

Samen pakken we de controle terug! In 'Digitale gremlins' werpt Rens van der Vorst een kritische blik op de invloed van digitale technologie op ons leven. Digitale technologie heeft ons leven een stuk gemakkelijker gemaakt. Van appen tot eten bestellen, er is altijd wel een digitale dienst waarmee het nóg sneller, simpeler en goedkoper kan. Maar meer efficiëntie betekent ook minder ruimte voor improvisatie, voor toeval, voor humor, voor spontane gesprekken. Eigenlijk helpen we vooral de grote technologiebedrijven aan nog meer geld, macht en data. Volgens technofilosof Rens van der Vorst is het tijd om de controle terug te pakken. Hoe? Je hoeft alleen maar de digitale gremlin in jezelf wakker te kussen. Een gremlin is een mythisch wezentje met aanleg voor mechanica. Hij saboteert het systeem. Een beetje. Op een slimme manier. Een manier die leuk is, weinig moeite kost en waar je niet technisch voor hoeft te zijn. Wil jij je beter voelen over je gebruik van digitale technologie?
