**From Plural to Institutional Agency** Kirk Ludwig, 2017-10-20 Kirk Ludwig presents a philosophical account of institutional action, such as action by corporations and nation states, arguing that it can be understood exhaustively in terms of the agency of individuals and concepts constructed out of materials that are already at play in our understanding of individual action. He thus argues for a strong form of methodological individualism. The book provides a new account of the logical form of grammatically singular group action sentences (e.g. 'Company laid off 10,000 workers'), and features new analyses of the concepts of a constitutive rule, status function, status role, collective acceptance, and proxy agency. He also provides an analysis of the structure of corporate action, including the status of corporations as legal persons, and of the nature of state action in relation to its citizens. This is the companion volume to *From Individual to Plural Agency* (OUP 2016), extending the multiple-agents account of collective action set out in the earlier volume.

**Calculation ERROR**, 16th November 2013, publication date of Calculation ERROR. In Warsaw will be the UN Summit of total failure. A will say: We must do more to protect the climate. B shall say: We are deeply in debt, we have no money And my book will carry a new message to the world: Calculation ERROR! With an earlier and more intense change to renewable energy and electric mobility, we would have today a much better situation. Why are we in such a bad situation? Because the economic science has refused to answer since 4 decades the three most burning questions about the future of our civilization, which were raised in the 1972 Limits to Growth: 1.) Are alternative supply chains available for the same service? 2.) What are the possible future shortages and price developments of these supply chains? 3.) How do we switch from one supply chain to another before a shortage hits the economy? Instead to research these 3 questions, economics thought only of their own dogma, that the perfect market solves all problems. The refusal of Economics to use different facts and computational methods brings our civilization to the brink of the abyss. We need a new world view, a new approach for all our serious problems: \* Peak Oil Gas Coal Uranium will be

reached soon. □ \* Climate Change □ \* Many countries in crisis: trade deficit greater than oil imports. □ \* The Lost Generation - youth unemployment. □ \* Working poor - the pay is not enough to live. □ \* Too little investment in the real economy. Only with a new global movement, we can have a livable future. This is the book, to design this new view of the world to establish this new global movement.

**PM Teachers Guide Orange** Jenny Bird, Raewyn Hickey, 2000-09 The PM Teacher's Guides offer invaluable support and guidance to help you gain the maximum benefit from each of the Story Books, Non-fiction Books and Traditional Tales and Plays.

**Getting to the Common Core** Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards. Teaching to standards is not a new concept; teachers have adapted to new standards every few years for quite some time. And teachers are adaptable, as can be seen in this book. We are writing this book to demonstrate how teachers use research-based strategies to meet Common Core Standards while still focusing on students. Our goal is to help teachers visualize students in action as other teachers describe the implementation of research-based strategies in their own classrooms, show student work samples, and provide reflections of student success in achieving the standards. Many Common Core Standards books focus on the standards, but our approach focuses on strategies that engage the students in the classroom--showing how different teachers at varying grade levels have used the strategies to meet the standards. With this focus, we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas. We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms. We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools—one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice. We begin by laying out a rationale in our first chapter---The Core Value(s) of Education. Then, each chapter focuses on a strategy, including 1) a brief description about the research supporting each strategy and 2) several examples from different grade levels, which include a description of how the strategy was used, student work samples, and a reflection on the use of the strategy. The research descriptions are fairly short because, while we believe professional educators (aka teachers, in this case) should know the research that supports practice, we know they are not typically interested in long diatribes about the research.
