Solitaire Tic-Tac-Toe Michael Birken,2005 What a great idea: a way to play tic-tac-toe when a partner's not available. Each space in the grid has a page number and a letter. Fill one in, then turn to that page and find out what move the book wants to make. Keep on going until the game is done. There's just one way to come out a winner in each game--but it's not easy! Great for travelers, those waiting on line, or a child sick at home.

Introduction To Evolutionary Informatics Marks Ii Robert J, Dembski William A, Ewert Winston,2017-02-27 Science has made great strides in modeling space, time, mass and energy. Yet little attention has been paid to the precise representation of the information ubiquitous in nature. Introduction to Evolutionary Informatics fuses results from complexity modeling and information theory that allow both meaning and design difficulty in nature to be measured in bits. Built on the foundation of a series of peer-reviewed papers published by the authors, the book is written at a level easily understandable to readers with knowledge of rudimentary high school math. Those seeking a quick first read or those not interested in mathematical detail can skip marked sections in the monograph and still experience the impact of this new and exciting model of nature's information. This book is written for enthusiasts in science, engineering and mathematics interested in understanding the essential role of information in closely examined evolution theory.
