*Civil War Time* Cheryl A. Wells,2012-06-01 In antebellum America, both North and South emerged as modernizing, capitalist societies. Work bells, clock towers, and personal timepieces increasingly instilled discipline on one's day, which already was ordered by religious custom and nature's rhythms. The Civil War changed that, argues Cheryl A. Wells. Overriding antebellum schedules, war played havoc with people's perception and use of time. For those closest to the fighting, the war's effect on time included disrupted patterns of sleep, extended hours of work, conflated hours of leisure, indefinite prison sentences, challenges to the gender order, and desecration of the Sabbath. Wells calls this phenomenon "battle time." To create a modern war machine military officers tried to graft the antebellum authority of the clock onto the actual and mental terrain of the Civil War. However, as Wells's coverage of the Manassas and Gettysburg battles shows, military engagements followed their own logic, often without regard for the discipline imposed by clocks. Wells also looks at how battle time's effects spilled over into periods of inaction, and she covers not only the experiences of soldiers but also those of nurses, prisoners of war, slaves, and civilians. After the war, women returned, essentially, to an antebellum temporal world, says Wells. Elsewhere, however, postwar temporalities were complicated as freedmen and planters, and workers and industrialists renegotiated terms of labor within parameters set by the clock and nature. A crucial juncture on America's path to an ordered relationship to time, the Civil War had an acute effect on the nation's progress toward a modernity marked by multiple, interpenetrating times largely based on the clock.

*Time, Genetics and Complex Disease* Guang-Zhong Wang,Christoph W Turck,Louying Zhang,2023-06-22 Biological traits and diseases tend to be very complex. Time is an aspect that deserves particular attention to study and decipher biological traits and

disease mechanisms: many processes including biological rhythms, neurodevelopmental and neurodegenerative mechanisms, and aging have a time-dependent trajectory. Biological rhythms, such as circadian rhythms are a reflection of biological processes over 24 hours. In the case of developmental and aging processes, they reflect biological activities over a much longer time scale, typically across years or even decades. In recent years these research fields have been cross-fertilizing each other. Examples include apparent alterations of circadian regulation in adult and aging individuals and a potential link between circadian disruption and Autism Spectrum Disorders, Alzheimer's Disease, and Major Depressive Disorder. Recent research aimed at decoding these time-related complexities has led to the implementation and utilization of various -omics methods. Transcriptomics and proteomics have matured into "standard" methods for profiling expression changes on a large scale across different time points. Single-cell sequencing technology will gain popularity for decoding cell-type diversity. With regard to data analysis, the identification of differentially expressed genes and proteins across time is of great interest. Granted, there are also topic-specific methods too. For circadian rhythm research, molecules that show rhythmic activity signals are of prime interest, whereas for life span studies the major focus is the identification of genes whose expression changes over long time periods. These topic-specific research methods can greatly benefit from each other's expertise.

*Biological Rhythms* Vinod Kumar, 2013-04-17 (Chapters 11 to 14) summarise important features of the biological clock at the level of whole animal covering all vertebrate classes (fish to mammal). Chapters 15 and 16 are on long term (seasonal) rhythms in plants and

higher vertebrates. Short term rhythms (ultradian rhythms), the significance of having a clock system in animals living in extreme (arctic) environments, and the diversity of circadian responses to melatonin, the key endocrine element involved in regulation of biological rhythms, have been discussed in Chapters 17 to 19. Finally, a chapter on sensitivity to light of the photoperiodic clock is added which, using vertebrate examples, illustrates the importance of wavelength and intensity of light on circadian and non-circadian functions. A well-known expert writes each chapter. When presenting information, the text provides consistent thematic coverage and feeling for the methods of investigation. Reference citation within the body of the text adequately reflects the literature as subject is developed. A chapter begins with an abstract that enables a reader to know at the first glance the important points covered in that chapter. The chapter concludes with a full citation of references included in the text, which could be useful for further reading. The book ends with a comprehensive subject index that may be useful for quick searches.

*Historical Perspectives on Social Identities* Alyson Brown,2009-01-14 This collection of work on the theme of identities was the result of a conference held in the spring of 2005 at Edge Hill under the auspices of The Centre for Liverpool and Merseyside Studies. Whilst a significant proportion of the research focused on Liverpool and the North West, the theme of identities was sufficiently broad to entice scholars from diverse and varied fields. This collection, therefore, reflects the range of work presented and discussed at the conference

and the multi-layered and multi-faceted nature of identity. Contributors to this edited collection examined the concept of identity in Britain through a range of historical perspectives, concerning themselves primarily with the later modern period. They reflect the extent to which nineteenth and twentieth century British social, cultural and political change has given rise to pluralist, fragmented and fractured identities and highlight the extent to which class, gender, religious and institutional frameworks have shifted continually. This publication will therefore be of interest to those working in diverse fields but who share an interest in the importance of identity as a decisive cultural, social, economic and political determinant. Questions of identity have centred a good deal of debate in the social sciences, especially since the reception of Foucault's work in the English-speaking world in the last couple of decades. This has often taken a theoretical form. Attempts to link theory with analytical practice have been strongest in the field that might be characterised as the 'politics of identity'. At any rate this has provided an important instance of theoretical and practical conflict. Here the focus of the debate has been around questions of gender, nation, language, economy, security and race. It has tried to clarify crucial divisions in the analysis of identity as between explanatory and constitutive models, and between positivist and post-positivist procedures. For the most part these intense and extensive concerns have passed by largely unnoticed among historians practising in Britain in the well-found but conventional idioms of political and social history. What this conference volume seeks to do is to help redress the deficit, to domesticate some of the theoretical and polemical exchanges around 'identity' into a world of practical, yet conceptually aware historical work. This is a difficult but surely worthwhile

task: to broach various imaginaries of identity, issues of identitarian politics, and questions of identity formation on a series of relatively familiar historical contexts. Of course, no selection of subjects for practical research in this way can be exhaustive. The group of essays offered here is sufficiently wide, and occasionally gratifyingly unexpected, at least to begin the job, to stimulate others and, most importantly, to interject theoretical concern into historical fields sometimes lacking it. Ten essays are included, together with the editor's introduction. The pieces are bound together by a common strategy not a shared empirical territory. They range from studies of gendered identity formation, to regional identities formed around seaside resorts, to empirical questions of class and capitalism and their identitarian politics, to historical analysis of mourning, and on to language, nationality, deafness, motherhood and their inflection in identity in past time. This well-edited combination of shared conceptual purpose and variety of empirical form seems to me to work well. The book will be widely used in a variety of historical fields, not least in those which have been the most resistant to recent theoretical innovations in the social sciences. Keith Nield Editor SOCIAL HISTORY 'This is a fascinating and wide-ranging collection of essays linked by the over-riding theme of identity. While primarily historical in their focus, the essays will be of interest to more than just historians. They raise a variety of interesting conceptual and theoretical issues, from, for instance, the significance of the staymaker in the formation of eighteenth-century female identity, to the relationship between regional identity and late-nineteenth and early twentieth century Lancashire seaside resorts.' Sam Davies, Professor of History, School of Social Science, Liverpool John Moores University
