Deep Maps and Spatial Narratives David J. Bodenhamer, John Corrigan, Trevor M. Harris, 2015-02-04 Deep maps are finely detailed, multimedia depictions of a place and the people, buildings, objects, flora, and fauna that exist within it and which are inseparable from the activities of everyday life. These depictions may encompass the beliefs, desires, hopes, and fears of residents and help show what ties one place to another. A deep map is a way to engage evidence within its spatio-temporal context and to provide a platform for a spatially-embedded argument. The essays in this book investigate deep mapping and the spatial narratives that stem from it. The authors come from a variety of disciplines: history, religious studies, geography and geographic information science, and computer science. Each applies the concepts of space, time, and place to problems central to an understanding of society and culture, employing deep maps to reveal the confluence of actions and evidence and to trace paths of intellectual exploration by making use of a new creative space that is visual, structurally open, multi-media, and multi-layered.

Time Will Tell Mari Riess Jones, 2018-11-19 Attention is a central concept in psychology. The term 'attention' itself has persisted, even though it implies a static, insulated capacity that we use when it is necessary to focus upon some relevant or stimulating event. Riess Jones presents a different way of thinking about attention; one that describes it as a continuous activity that is based on energy fluctuating in time. A majority of attention research fails to examine influence of event time structure (i.e., a speech utterance) on listeners' moment-to-moment attending. General research ignores listeners endowed with innate, as well as acquired, temporal biases. Here, attending is portrayed as a dynamic interaction of an individual within his or her surroundings. Importantly, this interaction involves synchronicity between an attender and external events. This emphasis on time and synchronicity distinguishes the author's theory, called Dynamic Attending Theory (DAT), from other approaches to attending which characterize attention metaphorically as a filter, resource pool, spotlight, and so on. Recent research from neuroscience has lent support to Riess Jones' theory, and the goal of this book is to bring this new research as well as her own to the wide audience of psychologists interested in attention more broadly.

Subjective Time Valtteri Arstila, Dan Lloyd, 2021-12-14 Interdisciplinary perspectives on the feature of conscious life that scaffolds every act of cognition: subjective time. Our awareness of time and temporal properties is a constant feature of conscious life. Subjective temporality structures and guides every aspect of behavior and cognition, distinguishing memory, perception, and anticipation. This milestone volume brings together research on temporality from leading scholars in philosophy, psychology, and neuroscience, defining a new field of interdisciplinary research. The book's thirty chapters include selections from classic texts by William James and Edmund Husserl and new essays setting them in historical context; contemporary philosophical accounts of lived time; and current empirical studies of psychological time. These last chapters, the larger part of the book, cover such topics as the basic psychophysics of psychological time, its neural foundations, its interaction with the body, and its distortion in illness and altered states of consciousness. When Pencil Met the Markers Karen Kilpatrick,Luis O. Ramos, Jr.,2020-07-21 A purple marker shows his friends that being creative means sometimes coloring outside the lines in When Pencil Met the Markers, the imaginative, inspiring, and colorful follow-up to When Pencil Met Eraser from writers Karen Kilpatrick and Luis O. Ramos, Jr., and illustrator German Blanco. Meet the Markers! They love to color. But Purple Marker colors everywhere—even outside the lines. When the other markers call his creativity a mistake, it’s up to Pencil and Eraser to help Purple discover how making mistakes and making art go hand-in-hand. This hilarious and clever picture book allows Pencil and Eraser to show Purple Marker—and the rest of us—how to turn our messes into successes and do what makes us happy. When Pencil Met the Markers brings engaging art, adorable characters, and a clever story to the everyday. The result? A funny, effective message about how the best art can come from trying something new. An Imprint Book An Amazon Best Book of the Month
