Time and Time-tellers James W. Benson,2024-03-10 Reprint of the original, first published in 1875.

Time and Time-Tellers James W. Benson,2015-03-10 [...]Persians from sunrise to sunrise. The astronomical and nautical day is computed from noon to noon, and is reckoned by 24 hours, not by twice 12, -as, for instance, instead of writing half-past four in the morning of, we will say, Jan. 2, the astronomer would write Jan. 1. 16 h. 30 m. Our ordinary English day is reckoned from 12 to 12 at midnight, after the fashion set by Ptolemy, which has this advantage over the method of reckoning from sunrise or sunset, that the latter periods are continually varying with the seasons of the year. The grouping of seven days into a week is shown in Genesis, but the seventh day is there alone specially named. The Sabbath is still kept by the Jews on the seventh day, but Christians keep the first day of the week in honour of Christ's resurrection, and call it the Lord's Day. After the older planetary method, Sunday was named in honour of the Sun, Monday of the Moon, Tuesday of Tuesco, or Mars, [...].

Time and Time-Tellers (Classic Reprint) James W. Benson,2015-07-27 Excerpt from Time and Time-Tellers Time cannot be thoroughly defined, nor even properly comprehended by mankind, for our personal acquaintance with it is so brief that our longest term is compared to a span, and to 'the grass which in the morning is green and groweth up, and in the evening is cut down and withered,' The ordinary thinker can scarcely carry his idea of Time beyond that small portion of it which he has known, under the name of life-time. The metaphysician classes Time with those other mysteries, - Space, Matter, Motion, Force, Consciousness, which are the Gordian knots of Mental Science. Time and time-tellers James William Benson,1902

Time and Time-Tellers James W. Benson,2016-07-04 An excerpt from the beginning. Time cannot be thoroughly defined, nor even properly comprehended by mankind, for our personal acquaintance with it is so brief that our longest term is compared to a span, and to 'the grass which in the morning is green and groweth up, and in the evening is cut down and withered.' The ordinary thinker can scarcely carry his idea of Time beyond that small portion of it which he has known, under the name of life-time. The metaphysician classes Time with those other mysteries,-Space, Matter, Motion, Force, Consciousness, which are the Gordian knots of Mental Science. Time is naturally divided into three most unequal parts,-whereof the Past includes all that has happened until now from that far-distant period when 'Heaven and Earth rose out of chaos;' the Present is but a moment, expended in a breath, to be again like that breath momentarily renewed; the Future is, as the Past, - 'a wide unbounded prospect' an 'undiscovered country' into which Prophecy itself penetrates but partially, and even then bears back to us but small information; for its language catches the character of a grander clime, and the denizens of this lower earth are incapable of understanding its gorgeous metaphors; the brightness is as blinding as the darkness. We may attempt to pierce the Future by the light which History throws from the Past, but History's record is imperfect; her chronicles are of the rudest and most unreliable character; her most valued memorials serve but to make Past 'darkness visible/ her most ancient registers reach back but a short distance compared with those testimonies which geologists have discovered, and given us veritable 'sermons in stones' about. The Past is, indeed, scarcely less of a mystery than the Future; even the Present we only know in part, but we do know that the brief term during which man 'flits across the stage' of time ere he goes hence and is no more seen, is of inestimable value. Most of us soon make the discovery that the world has much to teach which there is little time to learn and still less time to apply to good purpose. Ars longa, vita brevis est, is the general expression of human experience. For every man there are duties and labors for which time is all too short; just as he begins to understand and to perform his work wisely and successfully, the 'spirit of the destinies' as Mr. Carlyle would say, 'calls him away;' but whither he goeth is as great a mystery as whence he cometh. This, however, we do know, no wise man ever disregarded Time, inasmuch as of this treasure there is no laying in a fresh store when life's supply has been exhausted; the wasters, the 'killers' of Time, like the foolish virgins who neglected their lamps, are met invariably with the 'Not so,-as the door of opportunity is shut in their faces.

Edward Teller Centennial Symposium Stephen B. Libby,Karl A. Van Bibber,2010 This proceedings volume, for the symposium in honor of Edward Teller's 100th anniversary, focuses on Teller's scientific legacy. This legacy includes some of the most fundamental insights into the quantum behaviors of molecules, nuclei, surfaces, solid state and spin systems and plasmas. Many of these are brand names from the canon of 20th-century physics and chemistry, such as Gamow-Teller transitions, the Jahn-Teller effect, Goldhaber-Teller resonances, the Lyddane-Sachs-Teller relation, the Brunauer-Emmett-Teller equation of state, and the MR2T2 algorithm. All of these have had a profound and continuing impact on science - as has Teller's work on level crossing, diamagnetism, and plasma and statistical physics. The legacies of these discoveries are discussed in this volume, as is Teller's role in applied science and education.

Nine Quarters of Jerusalem Matthew Teller,2022-09-27 This unique, absorbing biography of Jerusalem brings to light its overlooked histories and diverse contemporary voices. In Jerusalem, what you see and what is true are two different things. The Old City has never had “four quarters” as its maps proclaim. And beyond the crush and frenzy of its major religious sites, many of its quarters are little known to visitors, its people ignored and their stories untold. Nine Quarters of Jerusalem lets the communities of the Old City speak for themselves. Ranging from ancient past to political present, it evokes the city’s depth and cultural diversity. Matthew Teller’s highly original “biography” features the Old City’s Palestinian and Jewish communities, but also spotlights its Indian and African populations, its Greek and Armenian and Syriac cultures, its downtrodden Dom Gypsy families, and its Sufi mystics. It discusses the sources of Jerusalem’s holiness and the ideas—often startlingly secular—that have shaped lives within its walls. It is an evocation of place through story, led by the voices

of Jerusalemites.
