Twelve Years a Slave Solomon Northup, 2013-01-04

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Passing of the Aborigines Daisy Bates, 2022-08-28
Daisy May Bates, CBE (born Margaret Dwyer; 16 October 1859 - 18 April 1951) was an Irish-Australian journalist, welfare worker and lifelong student of Australian Aboriginal culture and society. She was known among the native people as Kabbarli (a kin term found in a number of Australian languages which means grandmother or granddaughter). Daisy Bates conducted fieldwork amongst several Indigenous nations in western and southern Australia. She supported herself largely by writing articles for urban newspapers on such topics as 'native cannibalism' and the 'doomed' fate of Indigenous peoples. Bates also published her work on Indigenous kinship systems, marriage laws, language and religion in books and articles. She was appointed a Commander of the Order of the British Empire (CBE) for Aboriginal welfare work in 1934. (wikipedia.org)

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before

executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents

Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and

popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

Python for Probability, Statistics, and Machine Learning

José Unpingco, 2019-06-29 This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes provided. The author develops key intuitions in machine learning by working meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are new and updated *Programming Tips* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 runnable code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all

generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

Asār-us-Sanadid Sir Sayyid Aḥmad Khān,2018 This volume joins together in English for the first time the two editions of Sir Sayyid Ahmed Khan's classic account of the monuments and environs of precolonial Delhi. Translator Rana Safvi's annotations and appendices trace the historical development of the text between 1847 and 1854, before the cataclysmic events of 1857 changed Delhi forever. The volume includes sketches from the original Urdu edition. It is a valuable resource for urban historians and scholars of Delhi's monumental history.
