Signos da mobilidade Silvio Koiti Sato,2017-10-03 Este livro analisa o sistema que envolve a comunicação das marcas e o consumo, particularmente no contexto atual da mobilidade, com o uso das tecnologias de informação e comunicação, onipresentes em nosso cotidiano. A obra estudou a comunicação móvel, com o uso da telefonia celular, em países que estão em distintos estágios de popularização e adoção: Angola, Brasil e Portugal. Em uma análise abrangente da comunicação das marcas do setor e a sua relação com o universo dos consumidores, foi identificado um processo evolutivo dos significados da inovação. Nesse processo, os consumidores adaptam-se e criam novas práticas sociais que envolvem um processo de aprendizagem, naturalização e apropriação, estimulado pelas estratégias de comunicação das marcas e vivenciado de forma dialogada entre instâncias antes separadas e com escopos delimitados. Por tratar de assuntos como comunicação, gestão de marcas e consumo diante do cenário tecnológico em transformação, é uma leitura recomendada para todos que se interessam por esses temas.

Mobile Learning John Traxler,Agnes Kukulska-Hulme,2015-11-06 Mobile Learning: The Next Generation documents the most innovative projects in context-aware mobile learning in order to develop a richer theoretical understanding of learning in modern mobile-connected societies. Context-aware mobile learning takes advantage of cell phone, mobile, and pervasive personal technologies to design learning experiences that exploit the richness of both indoor and outdoor environments. These technologies detect a learner's presence in a particular place, the learner's history in that place or in relation to other people and objects nearby, and adapt learning experiences accordingly, enabling and encouraging learners to use personal and social technologies to capture aspects of the environment as learning resources, and to share their reactions to them.

Mind and Media Patricia M. Greenfield,2014-11-20 Patricia M. Greenfield was one of the first psychologists to present new research on how various media can be used to promote social growth and thinking skills. In this now classic, she argues that each medium can make a contribution to development, that each has strengths and weaknesses, and that the ideal childhood environment includes a multimedia approach to learning. In the Introduction to the Classic Edition, Greenfield shows how the original edition set themes that have extended into contemporary research on media and child development, and includes an explanation of how the new media landscape has changed her own research and thinking.
