Beginning AppleScript Stephen G. Kochan, 2004-12-17 What is this book about? Geared toward programmers with no prior development knowledge, Beginning AppleScript serves as a comprehensive guide to using AppleScript on the Mac OS X platform. This title introduces the reader to AppleScript, and then illustrates how to efficiently start writing scripts through sample programs as each concept is introduced. Exercises at the end of each chapter allow the reader to test and demonstrate their knowledge on how to write functional scripts. The appendices include a list of other resources for additional developer information, and a summary of the language suitable for reference.

An Interactive Multimedia Introduction to Signal Processing Ulrich Karrenberg,2002 This innovative book and CD-ROM learning system offers students and teachers a hands-on, interactive tool that makes the concepts and tools of modern, computer-based signal processing immediately understandable. Built around interactive software (DASYLab) and supported by 240 illustrations, Karrenberg's self-tutorial emphasizes the underlying principles of signals and systems while avoiding mathematical models and equations. This approach makes the material more accessible to readers who may lack mathematical and programming sophistication yet need to use or instruct others in the skills. The CD contains all programs, videos, manuals, and the complete text. The S-version of DASYLab for Windows provides an interactive development environment for the graphic programming of signal processing systems, and, more generally, microelectronics systems. Through active links, block diagrams, a pc sound card, and a microphone, users perform signal processing of real signals, attaining a visceral knowledge of the concepts and methods. More than 200 pre-programmed systems and transparencies are included. Interactive Multimedia Introduction to Signal Processing has been awarded a prestigious digita2002 award. Digita awards are one of the most important multimedia prizes in Germany's educational market. They are awarded annually to the best educational software in various categories.

A Data Scientist's Guide to Acquiring, Cleaning, and Managing Data in R Samuel E. Buttrey,Lyn R. Whitaker,2017-12-18 The only how-to guide offering a unified, systemic approach to acquiring, cleaning, and managing data in R Every experienced practitioner knows that preparing data for modeling is a painstaking, time-consuming process. Adding to the difficulty is that most modelers learn the steps involved in cleaning and managing data piecemeal, often on the fly, or they develop their own ad hoc methods. This book helps simplify their task by providing a unified, systematic approach to acquiring, modeling, manipulating, cleaning, and maintaining data in R. Starting with the very basics, data scientists Samuel E. Buttrey and Lyn R. Whitaker walk readers through the entire process. From what data looks like and what it should look like, they progress through all the steps involved in getting data ready for modeling. They describe best practices for acquiring data from numerous sources; explore key issues in data handling, including text/regular expressions, big data, parallel processing, merging, matching, and checking for duplicates; and outline

highly efficient and reliable techniques for documenting data and recordkeeping, including audit trails, getting data back out of R, and more. The only single-source guide to R data and its preparation, it describes best practices for acquiring, manipulating, cleaning, and maintaining data. Begins with the basics and walks readers through all the steps necessary to get data ready for the modeling process. Provides expert guidance on how to document the processes described so that they are reproducible. Written by seasoned professionals, it provides both introductory and advanced techniques. Features case studies with supporting data and R code, hosted on a companion website. A Data Scientist's Guide to Acquiring, Cleaning and Managing Data in R is a valuable working resource/bench manual for practitioners who collect and analyze data, lab scientists and research associates of all levels of experience, and graduate-level data mining students.
