Resuscitation and Stabilization of the Critically Ill Child Derek S. Wheeler,Hector R. Wong,Thomas P. Shanley,2008-12-17 The care of the critically ill or injured child begins with timely, prompt, and aggressive res- citation and stabilization. Ideally, stabilization should occur before the onset of organ failure in order to achieve the best possible outcomes. In the following pages, an international panel of experts provides an in-depth discussion of the early recognition, resuscitation, and stabilization of the critically ill or injured child. Once again, we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe. Derek S. Wheeler Hector R. Wong Thomas P. Shanley V Preface to Pediatric Critical Care Medicine: Basic Science and Clinical Evidence The ? eld of critical care medicine is growing at a tremendous pace, and tremendous advances in the understanding of critical illness have been realized in the last decade. My family has directly bene? ted from some of the technological and scienti? c advances made in the care of critically ill children. My son Ryan was born during my third year of medical school. By some peculiar happenstance, I was nearing completion of a 4-week rotation in the newborn intensive care unit (NICU). The head of the pediatrics clerkship was kind enough to let me have a few days off around the time of the delivery—my wife, Cathy, was 2 weeks past her due date and had been scheduled for elective induction.

Giving Blood Johanne Charbonneau,André Smith,2015-07-24 Giving Blood represents a new agenda for blood donation research. It explores the diverse historical and contemporary undercurrents that influence how blood donation takes place, and the social meanings that people attribute to the act of giving blood. Drawing from empirical studies conducted in the United States, Canada, France, Australia, China, India, Latin America and Africa, the book's chapters turn our attention to the evolution of blood donation worldwide, examining: the impact of technology advances on blood collection practices the shifting approaches to donor recruitment and retention the governance and policy issues associated with the establishment of blood clinics the political and legal challenges of regulating blood systems. This innovative examination moves the focus from individual explanations of rates of blood donation to a social, structural explanation. It will appeal to international scholars and students working in the areas of sociology, medical anthropology, health care, public policy, socio-legal studies, comparative politics, organizational management, health and illness, the history of medicine, and public health ethics.

Siblings Without Rivalry: How to Help Your Children Live Together So You Can Live Too Adele Faber,Elaine Mazlish,2012-04-09 The #1 New York Times best-selling guide to reducing hostility and generating goodwill between siblings. Already best-selling authors with How to Talk So Kids Will Listen & Listen So Kids Will Talk, Adele Faber and Elaine Mazlish turned their minds to the battle of the siblings. Parents themselves, they were determined to figure out how to help their children get along. The result was Siblings Without Rivalry. This wise, groundbreaking book gives parents the practical tools they need to cope with conflict, encourage cooperation, reduce competition, and make it possible for children to experience the joys of their special relationship. With humor and understanding—much gained from raising their own children—Faber and Mazlish explain how and when to intervene in fights, provide suggestions on how to help children channel their hostility into creative outlets, and demonstrate how to treat children unequally and still be fair.
