Cities around the World [2 volumes] Jing Luo,2019-07-10 This two-volume set offers a comprehensive overview of major challenges faced by cities worldwide in the 21st century, and how cities in different geographic, economic, and political conditions are finding solutions to them. This two-volume encyclopedia examines ten critical issues that face cities across the globe today—environmental and societal struggles that affect the daily lives of city dwellers. Readers will gain a better understanding of our global neighbors and will be able to use this book in order to compare and contrast different approaches to critical issues in our world. Volume One examines employment and jobs; energy and sustainability; green spaces; housing and infrastructure; and migration and demographic changes. Volume Two discusses pollution; schools; traffic and transportation; violence, corruption, and organized crime; and waste management. Each issue begins with an introduction providing an overview of the issue from a global perspective. Following the introduction are ten alphabetically arranged world city profiles of cities that are struggling with the issue and cities that have found innovative solutions to deal with the crisis. The profiles explain how the problem came to be; consequences inhabitants face, such as compromised health, limited access to education, and high taxes with low wages; and failed and successful initiatives taken by city management.

OECD Urban Policy Reviews: Mexico 2015 Transforming Urban Policy and Housing Finance OECD,2015-01-06 This book examines how Mexico can develop more competitive, sustainable and inclusive cities; improve the capacities of institutions and foster greater collaboration among them, and how they can better fulfill their pension mandate.

Urban Agglomeration Mustafa Ergen,2018-03-21 People living in rural areas migrate to urban areas to secure better qualities of life, education, and health facilities and also because they believe that urban settings offer more livable conditions. These appealing features have led to rapid population growth in urban areas, which has resulted in problems that need to be solved through different urban planning and design approaches. In conjunction with this book, a supplemental resource, which both provides and proposes solutions based on innovative approaches to urbanization problems that emerge from urban agglomeration, has been created. This resource supplement shall also serve as a guide to future urban development efforts. In effect, this book will play an important role in compensating for the limited number of resource books on urbanization. This book is intended to be a reference source for scientists and students interested in the subject.

How to Get More from Your Satnav R T Scanlon,2012-08 Do you use a satnav or smartphone satnav app? If so, *How to Get More from Your Satnav* is for you? This unique exploration of the satnav, by an experienced professional driver, provides a penetrating analysis of the difficulties and problems associated with using it. In addition, a wealth of practical advice is offered and many fascinating insights. The 'bells and whistles' associated with satnavs are avoided and instead author Bob Scanlon concentrates on straightforward road navigation. The problem of arriving at the wrong destination is given an in-depth consideration and a simple practical solution offered. Route planning is explored and a range of techniques are proposed to help. Pointers are provided to advanced routing. How you use your satnav on the move is a much neglected area of concern and guidance and advice is provided here too. A review of a high specification satnav with HD live traffic is included and lastly, the satnav as a concept is evaluated. This is a sorely needed contribution to the practice of road navigation and provides an invaluable guide to getting more from your satnav.

Raising the Bar for Productive Cities in Latin America and the Caribbean María Marta Ferreyra, Mark Roberts, 2018-06-07 With more than 70 percent of its population living in cities, Latin America and the Caribbean (LAC) is among the most urbanized regions in the world. Yet, although its cities are, on average, more productive than those elsewhere in the world, their productivity lags that of North American and Western European cities. Closing this gap provides LAC with the opportunity to raise living standards and join the ranks of the world's richest countries. Raising the Bar: Cities and Productivity in Latin America and the Caribbean is about the productivity of cities in LAC and the factors that help to explain its determination. Based on original empirical research, the report documents the high levels of population density and other features of LAC cities that mark them out from those in the rest of the world. The report also studies the role of three key factors – urban form, skills, and access to markets – in determining the productivity of LAC cities. It shows that while excessive congestion forces and inadequate metropolitan coordination seem to be stifling the benefits of agglomeration, LAC cities benefit from strong human capital externalities. It also finds that, within individual LAC countries, cities are poorly integrated with one another, which contributes to large differences in performance across cities and undermines their aggregate contribution to productivity at the national level.

Habitats and Biota of the Gulf of Mexico: Before the Deepwater Horizon Oil Spill C. Herb Ward, 2017-06-26 This book is open access under a CC BY-NC 2.5 license. The Gulf of Mexico is an open and dynamic marine ecosystem rich in natural resources but heavily impacted by human activities, including agricultural, industrial, commercial and coastal development. The Gulf of Mexico has been continuously exposed to petroleum hydrocarbons for millions of years from natural oil and gas seeps on the sea floor, and more recently from oil drilling and production activities located in the water near and far from shore. Major accidental oil spills in the Gulf are infrequent; two of the most significant include the Ixtoc I blowout in the Bay of Campeche in 1979 and the Deepwater Horizon Oil Spill in 2010. Unfortunately, baseline assessments of the status of habitats and biota in the Gulf of Mexico before these spills either were not available, or the data had not been systematically compiled in a way that would help scientists assess the potential short-term and long-term effects of such events. This 2-volume series compiles and summarizes thousands of data sets showing the status of habitats and biota in the Gulf of Mexico before the Deepwater Horizon Oil Spill. Volume 2 covers historical data on commercial and recreational fisheries, with an analysis of marketing trends and drivers; ecology, populations and risks to birds, sea turtles and marine mammals in the Gulf; and diseases and mortalities of fish and other animals that inhabit the Gulf of Mexico.

Placing Latin America Edward L. Jackiewicz, Fernando J. Bosco, 2020-01-17 Placing Latin America offers a thematic approach to the study of the diverse geographies of a globalizing region. This comprehensive text focuses on the dynamic connections between people, places, and environments rather than on predefined notions about the region. The book's well-rounded and accessible analysis includes discussions of borders and migration, transnationalism and globalization, urbanization and landscapes of cities, the connections between economic development and political change, the physical environment and human-environmental interactions, and natural resources in the context of a global economy. The authors also explore social and cultural themes such as the illegal drug trade, social movements, tourism, and children and young people. Providing a nuanced and clear perspective, this book will be an invaluable guide for all those interested in the politics, economy, and society of a rapidly changing continent.

The Routledge Companion to Media and the City Erica Stein, Germaine R. Halegoua, Brendan Kredell, 2022-07-29 Bringing together leading scholars from around the world and across scholarly disciplines, this collection of 32 original chapters provides a comprehensive exploration of the relationships between cities and media. The volume showcases diverse methods for studying media and the city and posits media urbanism as an approach to the co-construction and interactions among media texts and technologies, media users, media industries, media histories, and urban space. Chapters serve as a guide to humanities-based ways of studying urban imaginaries, infrastructures and architectures, development and redevelopment, and strategies and tactics as well as a provocation toward new lines of inquiry that further explore the dense interconnectedness of media and cities. Structured thematically, the chapters are organized into four distinct sections, introduced with editorial commentary that places the chapters into conversation with each other and frames them in relation to an overarching question, problem, or method. Part I: Imaginaries and cityscapes focuses on screen representations and mediated experiences of urban space produced and consumed by various actors; Part II: Architectures and infrastructures highlights the different ways in which built environments and socio-technical substrates that sustain differential mobilities, urban rhythms, and systems of circulation and exchange are intertwined with various forms of media and mediation; Part III: Development and redevelopment examines efforts by urban planners and designers, municipal governments, and community organizers to utilize media forms to imagine and shape the construction of the space and meaning of the city; finally, Part IV: Strategies and tactics uses categories for practices of control and resistance to investigate media and struggles for power within urban environments from surveillance and place-branding to activist media and the right to the city. The Routledge Companion to Media and the City provides a definitive reference for both scholars and students of urban cultures and media within the humanities.

Navigating the New Retail Landscape Alan David Treadgold, Jonathan Reynolds, 2016 No longer is the act of retailing solely the preserve of traditional retail enterprises as internet-enabled businesses, technology, logistics, suppliers and financial services enterprises all seek direct relationships with the shopper. The new landscape of retailing is an unforgiving one. Success can be achieved more quickly than has ever been possible before but failure is equally rapid. The opportunities in the new landscape of retailing are profound, but so too are the challenges. Part 2 of this book discusses the structures, skills and capabilities retail enterprises will need if they are to be successful in this new landscape and the skills and perspectives that will be required of the leaders of

retail enterprises. Case studies of innovative and successful enterprises are presented throughout the book to illustrate the themes discussed.

The Feedback Fix Joe Hirsch,2017-04-18 The secret to giving better feedback isn't what we say - it's what others hear. Too often, people hear about a past they can't control, not a future they can. That changes with "feedforward" - a radical approach to sharing feedback that unleashes the performance and potential of everyone around us. From managers and coaches trying to energize their teams, to teachers hoping to motivate their students, to parents looking to empower their children, people from all walks of life want others to hear what they have to say. Through a lively blend of stories and studies, The Feedback Fix shows them how by presenting a six-part REPAIR plan that spreads feedforward across boardrooms, classrooms, and even dining rooms. Even with drastic changes in how we work and live, the experiences we create for others - joy or fear, growth or decline, success or failure - still hang on the feedback we share. The Feedback Fix makes a compelling argument for getting what we want by giving others what they need - all while rebuilding the way we lead, learn, and live.
