Genetic Glass Ceilings Jonathan Gressel,2020-03-03 As the world’s population rises to an expected ten billion in the next few generations, the challenges of feeding humanity and maintaining an ecological balance will dramatically increase. Today we rely on just four crops for 80 percent of all consumed calories: wheat, rice, corn, and soybeans. Indeed, reliance on these four crops may also mean we are one global plant disease outbreak away from major famine. In this revolutionary and controversial book, Jonathan Gressel argues that alternative plant crops lack the genetic diversity necessary for wider domestication and that even the Big Four have reached a “genetic glass ceiling”: no matter how much they are bred, there is simply not enough genetic diversity available to significantly improve their agricultural value. Gressel points the way through the glass ceiling by advocating transgenics—a technique where genes from one species are transferred to another. He maintains that with simple safeguards the technique is a safe solution to the genetic glass ceiling conundrum. Analyzing alternative crops—including palm oil, papaya, buckwheat, tef, and sorghum—Gressel demonstrates how gene manipulation could enhance their potential for widespread domestication and reduce our dependency on the Big Four. He also describes a number of ecological benefits that could be derived with the aid of transgenics. A compelling synthesis of ideas from agronomy, medicine, breeding, physiology, population genetics, molecular biology, and biotechnology, *Genetic Glass Ceilings* presents transgenics as an inevitable and desperately necessary approach to securing and diversifying the world's food supply.

Living as Form Nato Thompson,2012 'Living as Form' grew out of a major exhibition at Creative Time in New York City. Like the exhibition, the book is a landmark survey of more than 100 projects selected by a 30-person curatorial advisory team; each project is documented by a selection of colour images.

Mosby's Comprehensive Review of Nursing for the NCLEX-RN® Examination Patricia M. Nugent,Judith S. Green,Mary Ann Hellmer Saul,Phyllis K. Pelikan,2011-11-08 A classic resource that has helped nurses pass the NCLEX exam for over 60 years, Mosby's Comprehensive Review of Nursing for the NCLEX-RN® Examination, 20th Edition is fully updated to reflect the newest NCLEX-RN test plan. Nugent. This title includes additional digital media when purchased in print format. For this digital book edition, media content may not be included.

African Conflicts and Informal Power Mats Utas,2012-09-13 In the aftermath of an armed conflict in Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and polities are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent’s conflict areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain.

It Happens That Fast Jon M Obermeyer,2017-08-16 Santa Barbara, CA (pop. 92,000) is known for producing a wide variety of literary talent, notably Ross MacDonald, Sue Grafton, John Sanford and T.C. Boyle. Memoirs like Hannibal by the Sea and Montecito Boy speak to growing up in the early 20th century. Christopher Buckley has written an excellent Santa Barbara memoir *Cruising State* yet not much has been written about growing up in Santa Barbara in the 1960's and 1970's, particularly the more suburban provincial Goleta Valley, west of town along Highway 101. Jon Obermeyer spent the summer of 2017 going down the worm holes of memory each day, spelunking in the caves of his Santa Barbara childhood (Goleta and Montecito) and his early adult years living off Micheltorena Street.Jon observes, The challenge of memoir is avoiding a tepid, shallow Sears Roebuck catalogue of artifacts and trivia and examining thoughtfully why and how these events made me the person I became. He adds, for almost four decades, my poems (some published) have covered much of this territory, yet it's been enjoyable to work in the flexibility of a prose narrative.A stroke survivor, Jon took up the memoir genre in 2016 as part of a therapy assignment, writing a cradle-to-grave memoir in early 2017. He found the Santa Barbara sections more compelling and entertaining, and decided to focus on the first 25 years of life He wanted to explore how a childhood in Santa Barbara was a formative and distinct experience. This eclectic memoir draws on the fields of popular music, natural history, biology, geology, psychology, neurobiology, California history, sports (surfing, hiking), economics, linguistics and etymology, literature and examines themes like childhood trauma, depression, creative expression and spirituality.The book also features a unique Mix Tape compilation of A side and B side popular music from the years 1958-1983 and a Santa Barbara literary bibliography titled 'D' is For Dectective Fiction.Jon moved from Santa Barbara in 1983. With the exception of three years living and working in San Francisco recently, he has lived on the East Coast for the past thirty years. Writing from a geographical distance, might be an advantage, he guesses. I'm not there everyday, driving on Shoreline Drive or Hollister or A.P.S. I have to pull this out of my brain.Jon no longer has immediate family living in Santa Barbara, although his cousin and uncle live in Ventura. Due to multiple cross-country moves, he has misplaced most of his family photographs and his Olive and Gold S.B.H.S. yearbooks from 1974-76.Jon uses topical prompts to begin and develop each chapter. He also credits two Santa Barbara Facebook groups for inspiration and obscure fact checking. For example, who was the Santa Barbara High teacher (and assistant football coach) who wore a toga in Roman History class? Answer: Mr. Everett.

Accelerando Charles Stross,2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber’s son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

On the Short Waves, 1923-1945 Jerome S. Berg,2007-03-28 As radio developed in the early 1920s, the focus for most people was the AM band and stations such as KDKA, the first broadcast station. There was, however, another broadcast method that was popular among many early enthusiasts--shortwave radio. As is true today, the transmission of news and entertainment programs over shortwave frequencies permitted reception over great distances. For many in America and beyond, shortwave was an exciting aspect of the new medium. Some still tune the shortwave bands to enjoy the programming. Others pursue broadcasts for the thrill of the hunt. This book fully covers shortwave broadcasting from its beginning through World War II. A technical history examining the medium's development and use tells the story of a listener community that spanned the globe. Included are overviews of the primary shortwave stations operating worldwide in the 1930s, along with clubs and competitions, publications and prizes. A rich collection of illustrations includes many QSLs, the cards that stations sent to acknowledge receipt of their transmissions and that are much prized by long-distance collectors.

A Gravity's Rainbow Companion Steven C. Weisenburger,2011-03-15 Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's indispensable guide to Thomas Pynchon's Gravity's Rainbow. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such subdialects of English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of Gravity's Rainbow--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal American editions of Gravity's Rainbow: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty Great Books of the Twentieth Century.

The Forgotten Revolution Lucio Russo,Silvio (translator) Levy,2013-12-01 The period from the late fourth to the late second century B. C. witnessed, in Greek-speaking countries, an explosion of objective knowledge about the external world. While Greek culture had reached great heights in art, literature and philosophy already in the earlier classical era, it is in the so-called Hellenistic period that we see for the first time — anywhere in the world — the appearance of science as we understand it now: not an accumulation of facts or philosophically based speculations, but an organized effort to model nature and apply such models, or scientific theories in a sense we will make precise, to the solution of practical problems and to a growing understanding of nature. We owe this new approach to scientists such as Archimedes, Euclid, Eratosthenes and many others less familiar today but no less remarkable. Yet, not long after this golden period, much of this extraordinary development had been reversed. Rome borrowed what it was capable of from the Greeks and kept it for a little while yet, but created very little science of its own. Europe was soon smothered in the obscurantism and stasis that blocked most avenues of intellectual development for a thousand years — until, as is well known, the rediscovery of ancient culture in its fullness paved the way to the modern age.

The Superpower Space Race Robert REEVES,2013-11-11 When the U.S.S.R. launched the first satellite into Earth orbit on October 4, 1957, a wave of fear and awe shook the world. In the heart of the Cold War, this first satellite was a threatening show of power and the decisive event that led to the infamous space rivalry between the U.S.S.R. and the United States. Launching missile after missile skyward, each superpower goaded its rival with impressive feats in space, each determined to prove to the world its technological superiority. As this engrossing work so clearly shows, it was in this pressure cooker of competition that each country achieved undreamed-of advances, stretching the boundaries of humankind's domain and giving us the first thrilling close-ups of the heavenly bodies in our solar system. The Space Age proved to be a rare instance in history, an era when two nations managed to call on their best and brightest to work single-mindedly toward a goal. Funded by millions of dollars and employing the talents of the top scientists and engineers from universities, the military, and, in the United States, the private sector, the space programs on each side of the Iron Curtain worked with determination and genius to build the incredible craft that would take us to the Moon and beyond. Robert Reeves, a respected historian of the Space Age and contributor to Astronomy, Amateur Astronomy, and Deep Sky Journal, describes the massive power and capabilities of these spaceships. Designed to overcome staggering obstacles, our spaceships accomplished what was once deemed impossible. Both the Soviets and the Americans succeeded in landing craft with amazing precision on the nearly airless surface of the Moon. American space probes touched down on the rocky surface of Mars, while the Soviets succeeded in building probes that could withstand the hellish heat and deadly pressure of the Venusian surface, transmitting photographs and readings that were inaccessible from Earth. Scientists today are still analyzing this invaluable information, deducing the story of our solar system by studying the craters on the Moon, the mysterious channels on Mars, and the nightmarish surface of Venus. Reeves illuminates the brilliant achievements and bitter tragedies of conquering the inner solar system. Fueled by pride and national honor, funded by politicians, and designed by the leading engineers of the world, each hard-earned mission was at once a political triumph for each nation and a scientific triumph for humankind. Reeves traces this most exciting history from its extraordinary genesis to the present and looks toward future cooperative ventures which will, with funding, luck, and united effort, yield knowledge and adventure beyond our wildest dreams.
