Minecraft Seeds Steve Ranger, Jr.,2016-01-12 Minecraft seeds are a great way to immerse yourself in the world which can be played by anyone and everybody. Minecraft seeds position the user in charge of what and where they would like to play inside a current world. Minecraft seeds are unique for each edition and version of the game. Differences among consoles are nonexistent regarding the seed algorithm. Both Minecraft 1.21 for the PlayStation systems, Minecraft TU30 for Xbox 360 and Minecraft CU18 have interchangeable seeds. These are different from the ones found in Minecraft 1.8.8 for PC as they use the programming language C++ instead of the infamous Java for the RNG. Minecraft PE 0.13.0 is the world in itself. As far as the world generator does not change, the seeds keep being useful after an update. The seeds we share here work for the versions stated above, but may break in the future.

The Miner's Seeds 2015 The Blokehead, 2015-01-20 World materialization in Minecraft is dependent upon the hard coded algorithm. The algorithm needs a seed that is a combination of alphanumeric characters in order to create a world. A seed can contain 1 to 32 characters allowing for numerous unique worlds. Do not confuse Minecraft seeds with plant seeds, which are planted by players within Minecraft worlds. Minecraft's world generating algorithm and seed values allow players to recreate the same world using said world's seed value. Simply put, when a seed value from a present world is inputted in the algorithm, that same world will be replicated. This rule remains the same no matter which game console or computer is used.
