📖 [INFORMED URBAN TRANSPORT SYSTEMS](#) JOSEPH CHOW, 2018-07-25 Informed Urban Transport Systems examines how information gathered from new technologies can be used for optimal planning and operation in urban settings. Transportation researchers, and those from related disciplines, such as artificial intelligence, energy, applied mathematics, electrical engineering and environmental science will benefit from the book’s deep dive into the transportation domain, allowing for smarter technological solutions for modern transportation problems. The book helps create solutions with fewer financial, social, political and environmental costs for the populations they serve. Readers will learn from, and be able to interpret, the information and data collected from modern mobile and sensor technologies and understand how to use system optimization strategies using this information. The book concludes with an evaluation of the social and system impacts of modern transportation systems. Takes a fresh look at transportation systems analysis and design, with an emphasis on urban systems and information/data use Serves as a focal point for those in artificial intelligence and environmental science seeking to solve modern transportation problems Examines current analytical innovations that focus on capturing, predicting, visualizing and controlling mobility patterns Provides an overview of the transportation systems benefitting from modern technologies, such as public transport, freight services and shared mobility service models, such as bike sharing, peer-to-peer ride sharing and shared taxis

📖 [UNDERGROUND CITIES](#) MARK OVENDEN, 2020-09-08 With over 60 per cent of the world’s population living in cities, the networks beneath our feet – which keep the cities above moving – are more important than ever before. Yet we never truly see how these amazing feats of engineering work. Just how deep do the tunnels go? Where do the sewers, bunkers and postal trains run? And, how many tunnels are there under our streets? Each featured city presents a ‘skyline of the underground’ through specially commissioned cut-away illustrations and unique cartography. Drawing on geography, cartography and historical oddities, Mark Oviden explores what our cities look like from the bottom up.

📖 [SHOOT TORONTO GUIDE](#) DON WESTGATE, 2015-07-07 Shoot Toronto is a self guided walking tour of the eastern part of downtown Toronto, Ontario, Canada. It was conceived to inspire photographers of all levels, both amateur and professional. It doesn’t matter whether you use the most basic of mobile devices, or the latest and greatest camera equipment. In fact, you can enjoy just walking the route of the tour without even making photos. But at some point you’ll likely wish you had your camera with you. The Shoot Toronto Guide, now in its 3rd edition, uses a map and detailed written descriptions to guide you along your way. It also includes some basic information about many of the sights on the tour. This info is designed to help you better understand what you are photographing, and to be useful when you are looking at your photos later and want to be able to identify the subjects. It also mentions establishments of interest to photographers, such as camera stores, on or near the tour route. An appendix contains pertinent addresses, phone numbers, and internet links. Shoot Toronto points out both the obvious and the subtle. It encourages you to keep an eye open for what others walk right past without really seeing. Shoot Toronto is designed to appeal to both visitors and long time Toronto residents alike. It not only takes in some famous landmarks, but also gets you off the beaten path to see sights you never realized were there.

📖 [RAPID EXCAVATION AND TUNNELING CONFERENCE 2021 PROCEEDINGS](#) JARRETT E. CARLSON, GREGG W. DAVIDSON, 2021-06-06 Every two years, industry leaders and practitioners from around the world gather at the Rapid Excavation and Tunneling Conference (RETC), the authoritative program for the tunneling profession, to learn about the most recent advances and breakthroughs in this unique field. The information presented helps professionals keep pace with the ever-changing and growing tunneling industry. This book includes the full text of 106 papers presented at the 2021 conference. Though the tunneling industry continues to develop both technically and contractually, one notable adaptation of the last two years has been the onset and management of COVID-19. The hallmarks of tunneling professionals include adaptability, resiliency, optimism, and management of change. These are traits that have been recently put to an entirely new challenge over the last year or so. We have truly witnessed why what we do is deemed “essential” infrastructure. The COVID-19 pandemic has impacted each of us, personally and professionally, and while times have been hard, we are fortunate to work in a field that is able to meet the challenge and thrive thereafter. Congratulations are in order to everyone in our industry for keeping the planning and development of projects moving forward and for maintaining safe and productive worksites in these challenging times.
