The Best That Money Can't Buy Jacque Fresco & Roxanne Meadows, FEW TECHNOLOGICAL ACHIEVEMENTS are as impressive as the ability to see our own planet from outer space. The beautiful sphere suspended against the black void of space makes plain the bond that the billions of us on Earth have in common. This global consciousness inspires space travellers who then provide emotional and spiritual observations. Their views from outer space awaken them to a grand realization that all who share our planet make up a single community. They think this viewpoint will help unite the nations of the world in order to build a peaceful future for the present generation and the ones that follow. Many poets, philosophers, and writers have criticized the artificial borders that separate people preoccupied with the notion of nationhood. Despite the visions and hopes of astronauts, poets, writers, and visionaries, the reality is that nations are continuously at war with one another, and poverty and hunger prevail in many places throughout the world, including the United States. So far, no astronaut arriving back on Earth with this new social consciousness has proposed to transcend the world's limitations with a world where no national boundaries exist. Each remains loyal to his/her particular nation-state, and doesn't venture beyond patriotism - my country, right or wrong - because doing so may risk their positions. Most problems we face in the world today are of our own making. We must accept that the future depends upon us. Interventions by mythical or divine characters in white robes descending from the clouds, or by visitors from other worlds, are illusions that cannot solve the problems of our modern world. The future of the world is our responsibility and depends upon decisions we make today. We are our own salvation or damnation. The shape and solutions of the future depend totally on the collective effort of all people working together.

Homo Deus Yuval Noah Harari, 2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

The Post-traumatic Theatre of Grotowski and Kantor Magda Romanska, 2014-10-01 Despite its international influence, Polish theatre remains a mystery to many Westerners. This volume attempts to fill in current gaps in English-language scholarship by offering a historical and critical analysis of two of the most influential works of Polish theatre: Jerzy Grotowski's 'Akropolis' and Tadeusz Kantor's 'Dead Class'. By examining each director's representation of Auschwitz, this study provides a new understanding of how translating national trauma through the prism of performance can alter and deflect the meaning and reception of theatrical works, both inside and outside of their cultural and historical contexts.

Patricia Neal Stephen Michael Shearer, 2021-03-16 Major Motion Picture Adaptation Coming Soon The internationally

acclaimed actress Patricia Neal (1926–2010) was a star on stage, film, and television for more than sixty years. On Broadway she appeared in such lauded productions as Lillian Hellman's *Another Part of the Forest*, winning the first Tony award. In Hollywood she starred opposite the likes of John Wayne, Paul Newman, John Garfield, and Gary Cooper in some thirty films. She is perhaps best known for her portrayal of Alma Brown in *Hud*, which earned her the 1963 Academy Award for Best Actress. But there was much more to Neal's life. She was born in Packard, Kentucky, though she spent most of her childhood in Knoxville, Tennessee. For a time, Neal became romantically involved with Gary Cooper, her married costar in *The Fountainhead*. In 1953, Neal wed famed children's author Roald Dahl, a match that would bring her five children and thirty years of dramatic ups and downs. At the pinnacle of her screen career, Neal suffered a series of strokes which left her in a coma for twenty-one days, and *Variety* even ran a headline erroneously stating that she had died. After a difficult recovery, Neal returned to film acting, earning a second Academy Award nomination for *The Subject Was Roses* (1968). She appeared in several television movie roles in the 1970s and 1980s and won a Golden Globe for Best Actress in a Dramatic TV Movie in 1971 for *The Homecoming*. Adapted as a major motion picture (filmed as *An Unquiet Life*) starring Hugh Bonneville, Keeley Hawes, and Sam Heughan, *Patricia Neal: An Unquiet Life* is the first critical biography detailing the actress's impressive film career and remarkable personal life. Author Stephen Michael Shearer conducted numerous interviews with Neal, her professional colleagues, and her intimate friends and was given access to the actress's personal papers. The result is an honest and comprehensive portrait of an accomplished woman who lived her life with determination and bravado.

Warez Martin Paul Eve, 2021-12-15 When most people think of piracy, they think of Bittorrent and The Pirate Bay. These public manifestations of piracy, though, conceal an elite worldwide, underground, organized network of pirate groups who specialize in obtaining media – music, videos, games, and software – before their official sale date and then racing against one another to release the material for free. *Warez: The Infrastructure and Aesthetics of Piracy* is the first scholarly research book about this underground subculture, which began life in the pre-internet era Bulletin Board Systems and moved to internet File Transfer Protocol servers (“topsites”) in the mid- to late-1990s. The “Scene, as it is known, is highly illegal in almost every aspect of its operations. The term “Warez itself refers to pirated media, a derivative of “software. Taking a deep dive in the documentary evidence produced by the Scene itself, Warez describes the operations and infrastructures an underground culture with its own norms and rules of participation, its own forms of sociality, and its own artistic forms. Even though forms of digital piracy are often framed within ideological terms of equal access to knowledge and culture, Eve uncovers in the Warez Scene a culture of competitive ranking and one-upmanship that is at odds with the often communalist interpretations of piracy. Broad in scope and novel in its approach, Warez is indispensable reading for anyone interested in recent developments in digital culture, access to knowledge and culture, and the infrastructures that support our digital age.

Sapiens Yuval Noah Harari,2015-02-10 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity’s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Zoroaster and His World Ernst Herzfeld,1974

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
