Organizing Paper @ Home: What to Toss and How to Find the Rest Barbara Hemphill,2011-11 Why can't I ever find the papers I need? Did I save that on the computer or is it in my file? Sound familiar? Despite all our technology, paper is still the No. 1 challenge in households nationwide. It covers desks and the kitchen counter, gets stuffed into file drawers and now, saved in electronic form on the computer. Instead of solving our problems, computers and smartphones have created another realm of disorganization, with files and systems of their own to mix in with the paper. From the home office to the kitchen counter, Barbara Hemphill offers a step-by-step solution to purging, sorting and taming that paper (AND electronic) tiger. Her practical solutions will help you manage every piece of paper or e-mail that comes into your house. She'll teach you how to make decisions about what to keep and where to keep and most importantly, how to find WHAT you need WHEN you need it!

Toss James Roberts Jr,2011-01-27 You would think waking up from a coma would be the best thing to ever happen to someone. A love triangle changed John forever. It left him with no trust in humanity. A new sense of bitterness, hate, confusion, scars and stitches. This is all dramatic but even worse is after his hospital stay is the fact that deep down he's not scared and unable to sleep which leads him to slowly lose his mind. He hears voices and begins to see things from sleep deprivation. The newly turned twisted loner soon finds that the only way he's able to sleep at all is from pills, drinking, any extreme high or from the aftermath of a adrenaline rush. Finding this "high" soon takes over his life. His new path turns him into a person he never thought he would be. He's finally alive and acting out trying everything that he never thought he never would have the nerve to try before which includes being a sexual deviant, drugs and even murder.

The Paper Boomerang Book Mark Latno,2010 Explains how to build, perfect and troubleshoot paper boomerangs.

Tag, Toss & Run Paul Boardway Tukey,Victoria Rowell,2012-01-01 Presents the rules for forty classic lawn games, including ghost in the graveyard, flag football, red rover, and double ball.

The Paper Boomerang Book Mark Latno,2010-06-01 When it comes to lightweight avionics, there's no beating a paper boomerang. Let all the others chase after their dull folded airplanes--you can now build a flying device that comes right back to you, every time! And unlike expensive, heavy wooden boomerangs, you won't endanger windows and skulls with paper boomerangs. The Paper Boomerang Book is the first-of-its-kind guide to this fascinating toy. Expert Mark Latno not only tells you how to build, perfect, and troubleshoot your paper boomerang, but about the 20,000-year history of the device, including Egyptian throwing sticks found in pharaoh's tombs, and the physics behind their circuitous flights. And once you've mastered the basic throw, return, and catch, it's on to more impressive tricks--the Behind-the-Back Toss, the Boomerang Juggle, the Under-the-Leg Catch, and the dreaded Double-Handed, Backward, Double-Boomerang Throw. For those who don't have the luxury of the wide-open outback on a clear Australian day, author Latno includes plans for Little Dragons, miniature versions of the paper boomerang that can be used indoors in almost any sized room, rain or shine.

More Good Questions Marian Small,Amy Lin,2010-05-15 We know that Differentiated Instruction (DI) helps all students to learn. Yet DI challenges teachers, and nowhere more than in mathematics. In this new book, written specifically for secondary mathematics teachers, the authors cut through the difficulties with two powerful and universal strategies that teachers can use across all math content: Open Questions and Parallel Tasks. Showing teachers how to get started and become expert with these strategies, this book also demonstrates how to use more inclusive learning conversations to promote broader student participation. Strategies and examples are organized around Big Ideas within the National Council of Teachers of Mathematics (NCTM) content strands. With particular emphasis on Algebra, chapters also address Number and Operations, Geometry, Measurement, and Data Analysis and Probability, with examples included for Pre-Calculus. To help teachers differentiate math instruction with less difficulty and greater success, this resource: Underscores the rationale for differentiating secondary math instruction. Provides specific examples for secondary math content. Describes two easy-to-implement strategies designed to overcome the most common DI problems that teachers encounter. Offers almost 300 questions and tasks that teachers and coaches can adopt immediately, adapt, or use as models to create their own, along with scaffolding and consolidating questions. Includes Teaching Tips sidebars and an organizing template at the end of each chapter to help teachers build new tasks and open questions. Shows how to create a more inclusive classroom learning community with mathematical talk that engages participants from all levels.
