The Oxford Handbook of Ergativity Jessica

Coon, Diane Massam, Lisa deMena Travis, 2017 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity, a grammatical patterning whereby direct objects are in some way treated like intransitive subjects, to the exclusion of transitive subjects. This pattern differs markedly from nominative/accusative marking whereby transitive and intransitive subjects are treated as one grammatical class, to the exclusion of direct objects. While ergativity is sometimes referred to as a typological characteristic of languages, research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages. Chapters in this volume look at approaches to ergativity within generative, typological, and functional paradigms, as well as approaches to the core morphosyntactic building blocks of an ergative construction; related constructions such as the anti-passive; related properties such as split ergativity and word order; and extensions and permutations of ergativity, including nominalizations and voice systems. The volume also includes results from experimental investigations of ergativity, a relatively new area of research. A wide variety of languages are represented, both in the theoretical chapters and in the 16 case studies that are more descriptive in nature, attesting to both the pervasiveness and diversity of ergative patterns.

Molecular Mechanisms of Retina Pathology and Ways of its Correction Svetlana Trofimova, 2020-07-16

This book discusses the pathology of the retina, and reviews current research on the use of cell replacement therapy and short peptides to restore functional activity in retinal neurons. As the book describes, pathologies of the retina,

including age-related macular degeneration, diabetic retinopathy, and retinitis pigmentosa, present a long-standing challenge in the practice of clinical ophthalmology. Modern treatment for these conditions, which lead to irreversible blindness, includes laser exposure, surgical intervention, and drugs. These treatments aim to reduce the risk of new complications in the eye; pathogenetic therapy of degenerative diseases of the retina is practically absent in current ophthalmic practice. The first section of the book reviews the molecular mechanisms of age-related macular degeneration, diabetic retinopathy, and retinitis pigmentosa, and reports on methods of treatment. The second section presents the results of recent experimental studies of the effects of short peptides on pluripotent embryonic cells; on proliferative activity in retinal cells and pigment epithelium; on expression of markers of differentiation of retinal neurons and pigment epithelium; and on the course of hereditary retinal pigmentation in Campbell rats. The third section offers results of clinical studies on the effectiveness of short peptides in patients with macular degeneration, and in patients with retinitis pigmentosa. The author concludes that the regular use of peptides in the treatment of degenerative diseases of the retina can slow the progression of the pathological process and preserve the patient's vision for some 10-15 years. In addition, in 80 percent of patients, it is possible to increase visual function by increasing visual acuity, improving the boundaries of the visual field and the fundus.

Cavallaro,Thomas B. Moeslund,Sebastiano Battiato,Qiang Ji,2017-03-28 This book constitutes the proceedings of the Third Workshop on Video Analytics for Audience Measurement, VAAM 2016, and the Second International Workshop on Face and Facial Expression Recognition from Real World Videos, FFER 2016, held at the 23rd International Conference on Pattern Recognition, ICPR 2016, in Cancun, Mexico, in December 2016. The 11 papers presented in this volume were carefully reviewed and selected from 13 submissions. They deal with: re-identification; consumer behavior analysis; utilizing pupillary response for task difficulty measurement; logo detection; saliency prediction; classification of facial expressions; face recognition; face verification; age estimation; super resolution; pose estimation; and pain recognition.

Pearlman,2012-12-06 Professor GOSTA KARPE GOSTA KARPE was born in Vadstena, Sweden, 1908. His medical education started in 1927 at the Karolinska Institute in Stockholm During his study he worked parttime in the department of physiology. KARPE served as a resident in the ophthalmological department of Serafiner lasarettet from 1937 till 1941. That year, the university eye clinic was transferred to the newly built Karolinska Sjukhuset, where KARPE became assistant-head of the out-patient department, and lecturer in ophthalmology. In 1949 he was appoin ted professor in ophthalmology at the Karolinska Institute and head of the department of ophthalmology at Karolinska Sjukhuset. KARPE received his doctor degree in 1945 upon completion of his thesis: 'The basis of clinical electroretinography'. This original work opened up a

completely new field of clinical investigation. Soon Swedish and foreign pupils flocked into his department to study his new method, a technique at present accepted as an indispensable tool in ophthalmic practice. Since 1945 his work as well as that of his pupils have been devoted mainly to this field of research.

Deconstructing Ergativity Maria Polinsky,2016-04-01

Nominative-accusative and ergative are two common alignment types found across languages. In the former type, the subject of an intransitive verb and the subject of a transitive verb are expressed the same way, and differently from the object of a transitive. In ergative languages, the subject of an intransitive and the object of a transitive appear in the same form, the absolutive, and the transitive subject has a special, ergative, form. Ergative languages often follow very different patterns, thus evading a uniform description and analysis. A simple explanation for that has to do with the idea that ergative languages, much as their nominative-accusative counterparts, do not form a uniform class. In this book, Maria Polinsky argues that ergative languages instantiate two main types, the one where the ergative subject is a prepositional phrase (PP-ergatives) and the one with a noun-phrase ergative. Each type is internally consistent and is characterized by a set of well-defined properties. The book begins with an analysis of syntactic ergativity, which as Polinsky argues, is a manifestation of the PP-ergative type. Polinsky discusses diagnostic properties that define PPs in general and then goes to show that a subset of ergative expressions fit the profile of PPs. Several alternative analyses have been proposed to

account for syntactic ergativity; the book presents and outlines these analyses and offers further considerations in support of the PP-ergativity approach. The book then discusses the second type, DP-ergative languages, and traces the diachronic connection between the two types. The book includes two chapters illustrating paradigm PP-ergative and DP-ergative languages: Tongan and Tsez. The data used in these descriptions come from Polinsky's original fieldwork hence presenting new empirical facts from both languages.

Successful Technological Integration for Competitive Advantage in Retail Settings Pantano, Eleonora, 2015-04-30 The advent of new technologies has been an impetus for rapid development in several industries, including the area of retail services. These recent advances push industry leaders to infuse new innovations into their various systems and processes. Successful Technological Integration for Competitive Advantage in Retail Settings examines the various effects of changing markets and subsequently how these changes cause retailers to meet consumer demand by integrating more sophisticated, advanced innovations in their daily practices. Focusing on corporate strategies, innovation management, and relevant case studies, this book is a

pivotal reference source for researchers, practitioners, and developers interested in recent innovation trends within the retailing industry.

Microparameters in the Grammar of Basque

Beatriz Fernández, Jon Ortiz de Urbina, 2016-09-09 This book is an endeavor to present and analyze some standard topics in the grammar of Basque from a micro-comparative perspective. From case and agreement to word order and the left periphery, and including an incursion into determiners, the book combines fine-grained theoretical analyses with empirically detailed descriptions. Working from a micro-parametric perspective, the contributions to the volume address in depth some of the exuberant variation attested in the different dialects and subdialects of Basque. At the same time, although the contributions focus mainly on Basque data, cross-linguistic evidence is also presented and discussed. After all, the goal pursued in this book is to attempt to explain variation in Basque as a particular instantiation of variation in human language at large. The volume presents and analyzes a wide range of empirical phenomena, many typologically marked among European languages, and will therefore be a welcome resource to linguists looking for detailed description and/or theoretical discussion.

Niuean Diane Massam, 2020-04-09 This volume explores the grammar of Niuean, an endangered Polynesian language spoken on the island of Niue and in New Zealand, with a focus on the issue of predication. Since Aristotle, it has been claimed that a sentence consists of a subject and a predicate. Niuean constitutes the perfect testing ground for this claim: it displays verb-subject-object word order, in which the subject interrupts the predicate, and has an ergative case system, in which subjects are not clearly distinguished from objects in their marking for grammatical

case. Diane Massam uses the framework of generative grammar to carry out a detailed analysis of the internal structure of Niuean predicates and arguments, as well as the relations between them, touching on many other topics including the nature of displacement, word formation, determiners, and thematic roles. The proposal is that Niuean complex predicates are formed via successive inversion, prior to the merge of all arguments (high argument merge), and that the predicate undergoes fronting to initial position across the arguments, with the same structure found also in nominal clauses. The conclusion is that Niuean does not have a subject in the usual sense, and this is related to the fact that the language has isolating morphology, lacking all tense and agreement inflection and nominative case. Instead, the language exhibits low absolutive predication, applicative ergative agents, and predicate fronting in lieu of subject extraction. The book extends our understanding of cross-linguistic sentence structure and grammatical case, and will be of interest to scholars in the fields of Austronesian linguistics, typology, and theoretical linguistics.

Parameter Hierarchies and Universal Grammar Ian Roberts, 2019-06-27 This book develops a minimalist approach to cross-linguistic morphosyntactic variation. Ian Roberts argues that the essential insight of the principles-and-parameters approach to variation can be maintained - albeit in a somewhat different guise - in the context of the minimalist program for linguistic theory. The central idea is to organize the parameters of Universal Grammar (UG) into hierarchies that define the ways in which properties of individually variant categories and features may act in concert. A further leading idea, which is consistent with the overall goal of the minimalist programme to reduce the content of UG, is that the parameter hierarchies are not

directly determined by UG, and are instead emergent properties stemming from the interaction of the three factors in language design. Cross-linguistic variation in word order, null subjects, incorporation, verb-movement, case/alignment, wh-movement, and negation are all analyzed in the light of this approach. This book represents a significant new contribution to the formal study of cross-linguistic morphosyntactic variation on both the empirical and theoretical levels, and will appeal to researchers and students in all areas of theoretical linguistics and comparative syntax.

La Calabria nel cuore Peppino Accroglia, Santo Strati, 2016-04-15 Questo ebook - ideato e realizzato dal giornalista Santo Strati - raccoglie trent'anni di storie di calabresi, scovati in ogni angolo della terra da Peppino Accroglia, fondatore e presidente del C3 International, la più importante Associazione internazionale dei calabresi nel mondo. Un'associazione che dal 1986 ha l'obiettivo - sempre centrato - di unire i calabresi nel solco della serietà, del rigore, dell'onestà e dell'impegno, e segnalarli come modello ed esempio luminoso per i giovani, indicando nella cultura la vera risposta al sottosviluppo e alla delinquenza mafiosa. La Calabria racconta, purtroppo, una lunghissima storia di emigrazione, ma non soltanto di braccia, bensì anche e soprattutto di "cervelli" che - dovunque nel mondo - come si vede in queste pagine, hanno non solo saputo farsi valere e conquistare posizioni di grandissimo prestigio ma hanno mantenuto alto un senso profondo di attaccamento alla propria terra. Quella "calabresità" che - come dice il poeta Corrado Calabrò - contraddistingue e marca in positivo tantissimi conterranei che la vita, la professione, l'impegno civile ha portato o spinge lontano dalla propria terra. Sfogliando queste pagine si legge perciò una storia infinita di successi e di grandi protagonisti,

accomunati - con grande orgoglio - dalla medesima origine. È la storia di un premio Nobel, di quattro presidenti della Corte Costituzionali, di uomini delle istituzioni, di grandi manager, di protagonisti della vita civile, di scienziati, intellettuali, politici, sportivi, imprenditori. Non ultimo, il nuovo presidente della Repubblica Argentina, Mauricio Macri, che Accrogliaò ha individuato e premiato in tempi non sospetti: i calabresi sanno creare storie di successo che inorgogliscono e danno lustro alla propria terra e si deve ad Accrogliaò il merito di aver condiviso questa soddisfazione. Il Premio "La Calabria nel Mondo" in 25 anni ha dato meritatissimi riconoscimenti ad oltre 500 personaggi che rivelano un segreto che tale non è: portano tutti la Calabria nel cuore. «La Calabria nel cuore» è dunque il racconto di una passione e di un entusiasmo che Peppino Accrogliaò ha saputo infondere, con orgoglio e determinazione ma anche con autentico amore, tra migliaia e migliaia di calabresi, sparsi in ogni angolo della terra. Uno sconfinato amore per la Calabria condiviso con centinaia di protagonisti e testimoniato da racconti, ricordi, interventi e contributi di calabresi illustri che hanno dato lustro e fanno onore alla propria terra ovunque si trovino. Testi e immagini, oltre milletrecento fotografie, più di mille nomi: una piccola enciclopedia, una specie di "garzantina" che ripercorre trent'anni di vita calabrese visti dall'osservatorio privilegiato di un grande e degno figlio di Calabria.
