📖 **TRANSLATING CHILDREN’S LITERATURE** Gillian Lathey, 2015-07-24 Translating Children’s Literature is an exploration of the many developmental and linguistic issues related to writing and translating for children, an audience that spans a period of enormous intellectual progress and affective change from birth to adolescence. Lathey looks at a broad range of children’s literature, from prose fiction to poetry and picture books. Each of the seven chapters addresses a different aspect of translation for children, covering: • Narrative style and the challenges of translating the child’s voice; • The translation of cultural markers for young readers; • Translation of the modern picture book; • Dialogue, dialect and street language in modern children’s literature; • Read-aloud qualities, wordplay, onomatopoeia and the translation of children’s poetry; • Retranslation, retelling and reworking; • The role of translation for children within the global publishing and translation industries. This is the first practical guide to address all aspects of translating children’s literature, featuring extracts from commentaries and interviews with published translators of children’s literature, as well as examples and case studies across a range of languages and texts. Each chapter includes a set of questions and exercises for students. Translating Children’s Literature is essential reading for professional translators, researchers and students on courses in translation studies or children’s literature.

📖 **WALK WITH WINGS** Tenne Edwards, 2018-07 Walk With Wings by Tene Edwards is a poetry collection split into five chapters: Monsoon Love, Winter Sorrow, Autumn Grace, Spring Resilient, and Summer Freedom. In short, poignant verses, Tene’s poems are a compilation of reflections on her experiences, thoughts, and feelings through love, loss, pain, healing and resilience. The collection takes you through the life story of the author while offering advice, notes, and affirmations, which were written to empower the author during difficult times. Walk With Wings tells the story of Tene falling in love, making bad decisions, learning from her mistakes, and discovering how to love her life and herself.

📖 **TWELVE YEARS A SLAVE** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup’s powerful slave narrative ‘Twelve Years a Slave’ depicts Nortup’s life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try ‘Uncle Tom’s Cabin’ by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir ‘Twelve Years a Slave’. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. ‘Twelve Years a Slave’ was published a year after ‘Uncle Tom’s Cabin’ by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup’s final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

📖 **HYDRODYNAMIC INSTABILITIES** François Charru, 2011-06-30 The instability of fluid flows is a key topic in classical fluid mechanics because it has huge repercussions for applied disciplines such as chemical engineering, hydraulics, aeronautics, and geophysics. This modern introduction is written for any student, researcher, or practitioner working in the area, for whom an understanding of hydrodynamic instabilities is essential. Based on a decade’s experience of teaching postgraduate students in fluid dynamics, this book brings the subject to life by emphasizing the physical mechanisms involved. The theory of dynamical systems provides the basic structure of the exposition, together with asymptotic methods. Wherever possible, Charru discusses the phenomena in terms of characteristic scales and dimensional analysis. The book includes numerous experimental studies, with references to videos and multimedia material, as well as over 150 exercises which introduce the reader to new problems.
