**Resource Guide for Towing Industry Support Specialists** Towing And R Association of America Inc,2021-05-20 TRAA is publishing this guide as a resource for those working in the towing and recovery industry who are not themselves towing operators. In this advanced level, we will expand on the topics previously discussed in the Resource Guide for Support Professionals (Book 1) and build on that knowledge base to introduce new topics specific to higher level support staff such as company safety managers, compliance directors, non-operator company owners, etc. Additionally, this guide may be used a study guide to prepare for the TRSCP(R) Advanced Level certification exam available on [www.towcert.com](http://www.towcert.com). Background For towing and recovery professionals to effectively do their jobs, they rely on other industry professionals serving in supportive roles who are not themselves tow operators. While many don't work directly on the roadways, support personnel such as dispatchers, scene safety supervisors, compliance directors, and office managers are an integral part of the towing and recovery team. The role of support personnel is critical to effective incident management. Many of these individuals respond to incident sites or work behind the scenes to dispatch equipment and resources that are necessary to facilitate the clearance. They also handle communication, documentation, and track the incident for safety compliance thereby contributing to quick clearance needs. While the TRSCP(R) was developed specifically for the towing and recovery industry, the program is open to all qualified candidates in other associated fields that meet the requirements. If you are an agency dispatcher in law enforcement, 911, TIM, Department of Transportation (DOT), etc. we hope this program will enhance your understanding of the equipment, resources, and logistics necessary for an efficient towing and recovery response and, thereby, increase interdisciplinary communication. If you are a non-agency party that may be present at an incident scene (such as Public Information Officers (PIO), media, fleet safety directors, and insurance adjusters), we hope this will expand your knowledge base of incident management and quick clearance. These materials are intended for educational purposes only.

Participants must demonstrate that they meet these predetermined standards by successfully completing the corresponding assessment. As the voice of America's towing industry the Towing and Recovery Association of America, Inc. ® (TRAA) has created this resource guide to define the basic towing services, skills, topics, and procedures that should be known by a light duty tow truck operator within the United States. For the purposes of this guide, a light duty tow truck operator is defined as a person capable of executing the proper and safe towing and recovery of vehicles under 10,001 GVWR and related services. These materials are intended for educational purposes only.

**Aerotowing Gliders** John Marriott,2011-06-01 This is an extract from the main text) This book on aerotowing gliders was written because there is little reference material published about the subject worldwide. So because of the lack of published information, I thought it important to gather the wealth of knowledge that is out there on the subject, collate it and present it to our community in the interests of safety and efficiency The book is intended as a comprehensive guide to glider towing operations, with that all important emphasis on safety. The intent is to provide all the relevant information in one straightforward, easy to read book. The notes are intended to be very generic and non-country specific. Even though local procedures differ, hopefully the information should be useful to any glider tug pilot, anywhere in the world. Each gliding organisation has its operating environment and problems, therefore should adapt, further or improve these suggestions to suit their own needs. It is fundamental that every tug pilot be a person who is both trustworthy and highly reliable as it is a flying task with huge responsibility placed on the pilot. Aerotowing is expensive, can be noisy and has its own special hazards. These factors have a bearing on the very existence of gliding and it is therefore essential that glider aerotowing be carried out safely, efficiently and thoughtfully, paying particular regard to our neighbours. Your particular aerotowing should of course be carried out in accordance with national laws, regulations, procedures and in conjunction with your organisations flying rules. As the pilots in command of an aircraft you are ultimately responsible for the safe conduct of the flight and the actions that you choose to take. The glider pilots requirements should of course be accommodated as far as possible. Glider aerotowing should be good for your general flying skills. As a flying and gliding instructor for over twenty five years, I have noticed that most glider tug pilots are often also glider pilots and have above average handling and situational awareness skills. Flying tugs should of course also be quite good fun! It is hoped that this comprehensive book will meet the ground school requirements of any current or future glider towing ratings.
